Flavor: The Science of Our Most Neglected Sense Bob Holmes, 2017-04-25 A journey into the surprising science behind our flavor senses Can you describe how the flavor of halibut differs from that of red snapper How the taste of a Fuji apple differs from a Spartan For most of us this is a difficult task flavor remains a vague undeveloped concept that we don t know enough about to describe or appreciate fully In this delightful and compelling exploration of our most neglected sense veteran science reporter Bob Holmes shows us just how much we re missing Considering every angle of flavor from our neurobiology to the science and practice of modern food production Holmes takes readers on a journey to uncover the broad range of factors that can affect our appreciation of a fine meal or an exceptional glass of wine He peers over the shoulders of some of the most fascinating food professionals working today from cutting edge chefs to food engineers to mathematicians investigating the perfect combination of pizza toppings He talks with flavor and olfactory scientists who describe why two people can experience remarkably different sensations from the same morsel of food and how something as seemingly unrelated as cultural heritage can actually impact our sense of smell Along the way even more surprising facts are revealed that cake tastes sweetest on white plates that wine experts eyes can fool their noses and even that language can affect our sense of taste Flavor expands our curiosity and understanding of one of our most intimate sensations while ultimately revealing how we can all sharpen our senses and our enjoyment of the things we taste Certain to fascinate everyone from gourmands and scientists to home cooks and their guests Flavor will open your mind and palette to a vast exciting sensory world **The Philosophy of the Commentators, 200-600 AD: Psychology (with ethics and religion)** Richard

Sorabji, 2005 This is the first work to draw on the four hundred years of transition from ancient Greek philosophy to the medieval philosophy of Islam and the West During this period philosophy was often written in the form of commentaries on the works of Plato and Aristotle Many ideas wrongly credited to the Middle Ages derive from these centuries such as that of impetus in dynamics and intentional objects in philosophy of mind The later Neoplatonist commentators fought a losing battle with Christianity but inadvertently made Aristotle acceptable to Christians by ascribing to him belief in a Creator God and

human immortality The commentators provide a panorama of up to a thousand years of Greek philosophy much of which would otherwise be lost They also serve as the missing link essential for understanding the subsequent history of Western philosophy Volume 1 deals with psychology which for the Neoplatonist commentators was the gateway to metaphysics and theology It was the subject on which Plato and Aristotle disagreed most and on which the commentators went furthest beyond them in their search for synthesis Ethics and religious practice fall naturally under psychology and are included in this volume All sources appear in English translation and are carefully linked and cross referenced by editorial comment and explanation Bibliographies are provided throughout The Horticulturist and Journal of Rural Art and Rural Taste ,1853
