Architect's Drawings A Selection of Sketches by World Famous Architects through History, 2025-08-31 Architect's Drawings A Selection of Sketches by Architects Through History is a fascinating journey into the role of sketches in the design process From the Renaissance to contemporary practice this book explores how architects have used drawings not just as technical tools but as instruments of imagination inspiration and communication *The Greenwood Encyclopedia of Homes through World History* James M. Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present *The Memorial to the Missing of the Somme* Gavin Stamp, 2010-08-06 Edwin Lutyens Memorial to the Missing of the Somme at Thiepval in Northern France visited annually by tens of thousands of tourists is arguably the finest structure

erected by any British architect in the twentieth century It is the principal tangible expression of the defining event in Britain's experience and memory of the Great War the first day of the Battle of the Somme on 1 July 1916 and it bears the names of 73 000 soldiers whose bodies were never found at the end of that bloody and futile campaign This brilliant study by an acclaimed architectural historian tells the origin of the memorial in the context of commemorating the war dead it considers the giant classical brick arch in architectural terms and also explores its wider historical significance and its resonances today So much of the meaning of the twentieth century is concentrated here the Thiepval Memorial to the Missing casts a shadow into the future a shadow which extends beyond the dead of the Holocaust to the Gulag to the disappeared of South America and of Tianenmen Reissued in a beautiful and striking new edition for the centenary of the Somme **Architect's**

The Sketch ,1913 **Sir John Soane? Influence on Architecture from 1791** Oliver Bradbury, 2017-07-05 Sir John

Soane's Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect's impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753-1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture

Lutyens, the Work of the English Architect Sir Edwin Lutyens (1869-1944) Sir Edwin Landseer Lutyens, Hayward Gallery, 1981

Lutyens Abroad Andrew Hopkins, Gavin Stamp, 2002 The studies in this volume offer the first serious examination of Sir Edwin Lutyens's hugely significant work beyond Great Britain With the exception of New Delhi far less attention has been paid to Lutyens's work abroad than to his work at home Sir Edwin Lutyens 1869-1944 made his name by designing romantic vernacular weekend houses at home in southern England however he also responded to opportunities offered by Britain's Imperial ambitions abroad The studies in this volume offer the first serious examination of Sir Edwin Lutyens's hugely significant work beyond Great Britain With the exception of New Delhi far less

attention has been paid to Lutyens's work abroad than to his work at home some buildings indeed being almost unknown although it is arguable that his finest creations works of transcendent humanity and originality within the Western tradition are to be found along the former battlefields of the Western Front and the hot plains of India Catalogue of the Library of the Graduate School of Design, Harvard University Harvard University. Practical Guide to Architectural Drawing Edward Denison, Guang Yu Ren, 2024-10-01 A visually stunning guide to architectural drawing from the RIBA Collections for students and those wanting to understand how to develop their graphic and representation skills Illustrated exclusively with drawings from the world's largest and most prestigious architectural drawing collection it features an international span of works ranging from the Palazzo Porto Festa by Andrea Palladio to the Viceroy's House in New Delhi by Edwin Lutyens from the illustration of Altun Kupri Iraq by Charles Felix Marie Texier to a coastal housing scheme by Balkrishna Vithaldas Doshi The book delves into the reasons behind why we draw and the various methods used covering the entire design process from nurturing the earliest ideas to aiding construction as well as surveying recording communicating and representing architecture in spatial structural and material terms Focusing primarily on drawing techniques it showcases a rich variety of different graphic styles types and modes of representation presented thematically offering a comprehensive overview This primer elevates the acquisition of practical drawing skills into a pleasurable experience acquainting students with some of the most exquisite and accomplished graphic representations in the world Drawing on Architecture Jordan Kauffman, 2019-03-19 How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In Drawing on Architecture Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history Drawing

on interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change

Detailing Worlds Eric Bellin, 2025-02-06 In the 21st century the word detail appears constantly in discussions of building and we use it in many different ways yet just over 250 years ago detail meant nothing at all particular to the work of architects engineers or builders Detailing Worlds is the first book to examine the origins and evolution of detail as a concept with meanings specific to practices of building By exploring how past meanings and roles were ascribed to detail in different worlds of practice those of academics technicians students engineers and architects Detailing Worlds looks to the future illuminating the ways disciplinary knowledge and the concepts on which it is based evolve and change over time It is a story about how such concepts are slowly but constantly reconceived redefined and transformed by individuals as they interact with one another and how this process is shaped by the ever changing sociocultural and technological dimensions of the world around us Richly illustrated with more than 200 images including figures from rare texts archival student drawings and practitioners construction documents from the 18th through 20th centuries Detailing Worlds ventures to tell the history of a disciplinary specific idea and offer insights about how we think and speak about the practice of building today
