Schleef, 2006 How does one become a member of an elite profession *Managing Elites* examines how elites in training contest rationalize and ultimately enthusiastically embrace their dominant positions in society Using interviews with 79 law and MBA students the author argues that elite socialization requires both accommodation and resistance to professional ideologies Students develop a collective cynicism about elements of their education learning that their discipline imparts esoteric knowledge but

also claiming that they didn't learn anything. They struggle with the idea that fellow students are all equally intelligent and therefore deserving of elite status and the continuing emphasis on activities that sort students. Students resist that path to success promoted by school cultures: investment banking, consulting, or becoming partner in a large law firm. Such cynicism is indeed ultimately revealed to be temporary as most students end up in full support of these jobs of least resistance. Their critiques do, however, create tensions between competition and cooperation between the individual and the collective and between egalitarianism and elitism. Part of elite socialization is learning to deal with these tensions or more specifically to hold contradictory ideals at the same time. How to Get Into the Top MBA Programs, 5th Edition Richard

The Reengineering Revolution David Knights, Hugh

Willmott, 2000-01-26 The Reengineering Revolution reviews the significance of the Business Process Reengineering trend for management practice since the early 1990s. Combining empirical and theoretical perspectives, David Knights and Hugh Willmott show how both term and practice shaped the recent widely adopted policies of downsizing, restructuring, and emphasis on process rather than task. Well-known contributors analyze the impact of Business Process Reengineering in a number of settings: supermarkets and the food chain, the public sector, banks. The theoretical history of Business Process Reengineering is also detailed in relation to ideas about bureaucracy, hierarchy, transformation, and design. **Managers**

**Management Lives** David Knights, Hugh Willmott, 1999-08-30 The authors bring a spark of vitality and life to an area that could be cynically viewed as a series of conflicting fads and fashions I would recommend anyone in the process of reviewing or designing an entrepreneurship development course to consider the benefits that this book would bring to the teaching process Entrepreneurship and Innovation Using fiction in the classroom as an approach to stimulating the study of people in organizations is well established What this book contributes is a way of exploring some of the existential elements of life in organizations which are typically difficult to study It will be on my reading lists Hopefully this example and regrettably few others which exist will contribute in the long term to the reformulation of how the lived experience of organizational life may be explored in the classroom Leadership consumption and bureaucracy rational choice and meaning all through the medium of characters and situations in contemporary literature The clear theoretical framework supported by footnotes summaries and further reading guides makes this an introduction to management the student will find useful as well as enjoyable

**Managers Not MBAs** Henry Mintzberg, 2005-06-02 In this sweeping critique of how managers are educated and how as a consequence management is practiced Henry Mintzberg offers thoughtful and controversial ideas for reforming both The MBA trains the wrong people in the wrong ways with the wrong consequences Mintzberg writes Using the classroom to help develop people already practicing management is a fine idea but pretending to create managers out of people who have never managed is a sham Leaders cannot be created in a classroom They arise in context But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education He also outlines how business schools can become true schools of management
