The Snow Leopard Peter Matthiessen, 2014-11-06 One of the greatest pieces of travel and nature writing ever written this is the true story of a journey to the high Himalayas in search of the snow leopard In 1973 Matthiessen made the 250 mile trek to the dazzling Tibetan plateau of Dolpo as part of an expedition to study wild blue sheep It was an arduous sometimes dangerous physical endeavour exertion blisters blizzards endless negotiations with sherpas quaking cold But it was also a journey of the heart Amongst the beauty and indifference of the mountains Matthiessen was searching for solace He was also searching for a glimpse of a snow leopard a creature so rarely spotted as to be almost mythical WITH AN INTRODUCTION BY RICHARD MABEY A beautiful book and worthy of the mountains he is among Paul Theroux Snow Leopards Erika L. Shrestha which might be useful for other researchers working on snow leopard In addition researchers might find it useful to have a key for determining the diet of snow leopard based on remnants of its food in its scats Last but not least based on the difficulty we experienced trying to compare and combine different sets of results we propose a general methodology for collecting data Thus this book is not an all encompassing compendium but an attempt to fill some gaps in the literature and to show how to publish new data on snow leopard in a useful and workable way The first part describing the main features of snow leopard and its main prey ecology is followed by a comprehensive review of data available on its abundance and threats to its survival The third most extensive part the substance of the book presents new data from 15 years of intensive camera trapping combined with scat sampling These data are analyzed by means of advances GIS and genetic techniques which yields a large amount of conservation implications The purpose of this book is to provide a tool for both environmental managers and researchers to find quickly what is known about this species for conservation planning and for an effective protection of snow leopard However enthusiasts interested in wild cats may welcome the book too

Snow Leopard (Panthera Uncia), As part of Kids Planet Defenders of Wildlife presents a fact sheet on the Snow Leopard Panthera uncia which is an endangered species The snow leopard is a solitary animal that lives in the high mountains of central Asia The fact sheet provides a description of the leopard and highlights information on such topics as the lifespan size range diet behavior and offspring of the leopard
