

## **Marxist Theory of Social Change:A Scientific Interpretation**

**Taslima Akter**

### **Introduction**

Marxism is the philosophy of social change.In that sense it can be considered to be a philosophy of praxis.Though Marx did not establish any specific philosophical theory,in his writings he did not simply explain the world but also provided guidelines to change it.The theory of social change is one of the most important theories of Marx's philosophy. He established the theory of social change on the basis of his materialistic conception of history, generally known as 'Historical Materialism'.He enriched eighteenth century materialism with the achievements of Classical German philosophy, especially of Hegel's system, which in its turn had led to the materialism of Feuerbach.

Marx provided the scientific explanation of social change and development. He believes that there are some objective laws by which we can explain social change and development.These laws are universal and independent of man's will.According to Marxism, humans are born and grown up in a specific production system. He participates in the production system and builds production relations for his material needs. On the basis of mode of production and the relation of production, other social relations;i.e.; political, legal, moral, etc. take shape.So, the determining force of social change is the production of material wealth.That is to say, economic activity is the basis of social change and development. In this regard he discusses the very nature of the existing capitalist system which is based on disparity.He analyses relation of production from which surplus production emerges.Surplus production creates surplus values which leads to the ownership of private property.Because of the ownership of private property social inequality arises and class conflict become distinct.Gradually,people become class conscious and as a result class philosophy arises.After certain time,through inevitable revolution capitalist system abolished and a socialist society established.

### **Marxist Thought About Social change**

Pre-Marxist sociologists were divided about the development and change of society. Some of them bring supernatural or divine beings in order to explain social development. On the other hand, many tried to explain social development logically and scientifically by cause-effect relationship.

Karl Marx defended philosophical materialism which has been proved to be the only philosophy consistent and true to all the teachings of natural science.He formulated the materialistic concept of history.Marx and Engels repeatedly explained that every deviation from materialism is erroneous.<sup>3</sup>They introduce 'historical materialism' in *The German ideology* (1903), which is based on dialectical materialism.Historical materialism is the materialist interpretation of history.According to idealist,the consciousness of man determines their social being.But the main premise of historical materialism is that social consciousness does not determine social being rather social being determines social consciousness.Marx's social theory is revolutionary:

Science, Technology, and Social Change (Routledge Revivals) Steven Yearley, 2014-08-01 First published in 1988 this book provides students with a way to increase their understanding of the role of science and technology in society Steven Yearley draws on and develops ideas from research in the sociology and politics of science to address in particular the nature of scientific knowledge and the authority it commands the political and economic role of science in the West the relationship between science technology and social change in underdeveloped countries Examples used range from nineteenth century brain science to the strategic defence initiative and from hugely expensive experiments in nuclear physics to proposals for inexpensive boat building programmes in the Sudan Overall this reissue provides a comprehensive and stimulating account of the role played by science and technology in contemporary social change      **Social Change and Social Research** Rann Singh Mann, 1988      **Lonergan, Social Transformation, and Sustainable Human Development** Joseph

Ogbonnaya, 2013-01-29 Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work While such an approach is profitable by promoting economic growth it does not take note of other dynamics of social progress and development Also it fails to notice the consequences of development strategies on human flourishing well being and happiness Ogbonnaya argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching It makes a case for social progress and transformation as emanating from human understanding Also it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline In view of the reality of moral impotence and limitations it considers the reversal of societal decline as possible through the supernatural solution of God's grace      *The analysis of social change reconsidered* J. **Managing Social Change and Social Policy in Greater China** Ka-Ho Mok, Maggie K. W. Lau, 2013-11-07 East Asia is at the heart of the global economic transformation and the countries of the region are witnessing

rapidly changing labour markets alongside the pressure to cut production costs and lower taxes in order to become successful competition states. These changes have resulted in increased welfare demands which governments, organizations and agencies across the region have had to address. This book examines welfare regimes in the Greater China region encompassing mainland China, Hong Kong, Macao and Taiwan. In so doing it explores the ways in which the rapid growth and internationalisation of the economy across Greater China is presenting new social policy challenges that governments, social welfare organizations and agencies in the region are having to respond to. Rather than simply describing and categorising welfare systems, the contributors to this volume add to our understanding of how one of the major economic transformations of the contemporary era in East Asia is shaping welfare provision in the region. In turn, in this context of economic change, they examine the new strategies and measures that have been adopted in order to reduce the heavy burden on the state in terms of welfare provision whilst also attempting to diversify funding and provision sources to meet the pressing welfare needs. Based upon extensive fieldwork by leading scholars of social policy, this book will appeal to students and scholars of Asian social policy, comparative development and social policy, social welfare and Chinese studies.

**Public Administration and Society** Richard C. Box, 2014-12-17. For instructors who want to expose their students to the social, political and historical context of the practice of public administration, this book provides a unique approach to the introductory PA course. The author's own text is skilfully interwoven with a collection of seminal readings and documents that illuminate the key issues of past and present for public service professionals in a democratic society. More than an overview of public administration, *Public Administration and Society* offers students a broad perspective on the American Founding Era, the relationship of citizens to government and how the structure of government reflects societal values. The premise of the book is that understanding the societal context is important to the success of the practitioner and to the practitioner's role as a responsible agent of change in a democratic society. Introductory essays and readings offer students perspectives on five important thematic areas in public administration: the Founding Era debate over the size and scope of government; the relationship of the community to the individual; public organizations and policy-making values; and public administration and the role of the public service practitioner in a democratic society. This new edition features five new readings and, based on input from adopters, an entirely new section on public policy-making. Part IV, *Public Organizations and Policy*, The author's part-opening sections have all been extensively revised and updated.

**The Robotics Divide** Antonio López Peláez, 2013-08-13. Societies survive in their environment and compete with each other depending on the technology they develop. Economic, military and political power are directly related to the available technology while access to technology is key to the well-being of our societies at the individual, community and national level. *The Robotics Divide* analyzes how robotics will shape our societies in the twenty-first century, a time when industrial and service robotics, particularly for military and aerospace purposes, will become an essential technology. The book, written by experts in the field, focuses on the

main technological trends in the field of robotics and the impact that robotics will have on different facets of social life By doing so the authors aim to open the black box of a technology which like any other is designed implemented and evaluated according to the economic and cultural patterns of a cosmopolitan society as well as its relations of power The Robotics Divide explores future developments in robotics technology and discusses the model of technological development and the implementation of robotics in this competitive market economy Then the authors examine to what extent it is possible to determine the characteristic features of the robotic divide namely in what ways the robotic divide differs from the digital divide and how a model to integrate this technology can be developed without reproducing patterns of inequality and power that have characterized the advent of previous technologies These issues inequality robotics and power are of concern to robotics and advanced automation engineers social scientists economists and science policy experts alike *Understanding Social Change* Anthony F. Heath, John Ermisch, Duncan Gallie, British Academy, 2005-02-17 These essays not only describe the major changes in British society in recent years but seek to understand and explain what is happening They consider the wide variety of mechanisms that underlie these changes in particular processes of social interaction The ill understood nature of these mechanisms may be a major reason why so much social reform has proved ineffective By highlighting the complexities of the causal mechanisms sociological research can make a major contribution to policy and public debate While these papers do not claim that sociology will provide all the answers they demonstrate that it has made real progress in understanding the social changes that Britain has experienced in recent decades Research in Organizational Change and Development Debra A. Noumair, Abraham B. (Rami) Shani, Danielle P. technology holds the promise of curing more than 7 000 known genetic diseases Yet with that promise comes the peril of using CRISPR to edit the human genome which could not only lead to manipulating human evolution but also to creating and releasing pathogens capable of wreaking havoc on human animal and plant life Although CRISPR has already cured several genetic diseases it could also be used to design biological weapons or to edit the embryos of people who can afford to purchase genetic enhancements for their children What role can and should the public play in discussing the far reaching implications of gene editing What oversights should be put in place to prevent a rogue scientist from engineering another baby as was recently done with twins in China Essay contributors offer informed predictions and guidelines for how the uses of CRISPR today will affect life in the future Decisions we make now may have unpredictable consequences for future generations For anyone concerned about the uses and potential abuses of gene editing these essays provide a critical and comprehensive discussion of the central issues surrounding CRISPR technology Contributors Florence Ashley R Alta Charo Marcy Darnovsky Kevin Doxzen Rosemarie Garland Thomson Gigi Kwik Gronvall Jodi Halpern Katie Hasson Andrew C Heinrich Jacqueline Humphries J Benjamin Hurlbut Ellen D Jorgensen Peter F R Mills Carol Padden Marcus Schultz Bergin Robert Sparrow Sandra Sufian Krystal Tsosie Ethan Weiss Rachel M West      *Communication for Social Change Anthology* Alfonso Gumucio Dagron, Thomas Tufte, 2006 Contains nearly 200 readings published between 1927 and 2005 in English or translated from other languages on the historical roots and pioneering thinking regarding communication for social change Covers a variety of topics including the radio tv and other mass communication information and communication technology the digital gap the formation of an information society national information policies participatory decision making communication of development pedagogy and entertainment education HIV AIDS communication for prevention etc
