## Talking Back To The Media:

Women and Media in the Middle East Nahed Eltantawy, 2017-10-02 The traditional image of the Middle Eastern woman as portrayed by the Western media has tended to be one of a woman oppressed by men and religion. Veiling intensifies this image of supposed powerlessness and imprisonment. However, the Arab Spring uprisings have introduced the West to women in the Middle East who do not conform to this stereotype and have shown the Western media that Middle Eastern women cannot be categorized altogether as one oppressed powerless group. This book investigates the diverse realities and complexities of women in the Middle East in terms of their relationship with media platforms old and new. Contributors offer a range of perspectives that discuss everything from media portrayals of the veil to women in film and television from women's involvement as activists on the street to the role played in the Arab Spring by cyber activism. The collection provides insight into how some women in the Middle East are utilizing traditional as well as new media for purposes of self-expression, activism, and democratization while also investigating media portrayals of women at home and in the West. This book was originally published as a special issue of *Feminist Media Studies*.

*From City Space to Cyberspace* Amanda Wasielewski, 2025-10-01 The narrative of the birth of internet culture often focuses on the achievements of American entrepreneurs in Silicon Valley, but there is an alternative history of internet pioneers in Europe who developed their own model of network culture in the early 1990s. Drawing from their experiences in the leftist and anarchist movements of the 80s, they built DIY networks that give us a glimpse into what internet culture could have been if it were in the hands of squatters, hackers, punks, artists, and activists. In the Dutch scene, the early internet was intimately tied to the aesthetics and politics of squatting. Untethered from profit motives, these artists and activists aimed to create a decentralized tool that would democratize culture and promote open and free exchange of information.

*Race Talk in the South African Media* Gawie Botma, 2020-01-06 This book makes a very significant, timely, and relevant contribution to a very topical subject of immense local as well as global interest. Through tracing the evolution of media discourse about race and racism, which the author prefers to call 'race talk', the writer prised open a window to a panoramic, variegated, and yet nuanced perspective of the perennial South African race question etched across the vistas of time and memory since Jan Van Riebeeck set up the first European settlement as a refreshment station for the Dutch East India Company at the Cape of Good Hope in 1652 up to the time of writing this book. It lends a fresh lens through which to re-read South African society not only to a studious scholar of media history but also to anybody interested in the general history of South Africa. Dr Zvenyika Mugari, WITS. This book is based on meticulous archival searching presented in a new, fresh, and highly engaging way. This is a book based on evidentiary-led scholarly principles that has lucidity as a goal. Unlike

so many scholarly works which are turgid and very difficult to read because they are written in restricted codes meant only for other academics this manuscript is wonderfully lucid accessible and a pleasure to read The prime readership will be academics but its lucidity makes it appealing beyond a purely academic readership hopefully reaching media professionals and students also and influencing debates on race policy This is how academic books in fact should be written Prof Keyan Tomaselli University of Johannesburg The author has embarked on a very difficult and complex task of understanding the race construct in the South African media context This is a highly contested and contentious space in South Africa and it is particularly arduous for a white middle class middle aged Afrikaans male to navigate this space The author has however eloquently managed to pilot this fine line of controversy He offers a balanced view of the belligerent debate without treading insensitively on the toes of protagonists and at the same time challenges prevailing views Andr Rose National Cancer Institute
