readers interested in social in justice Smith raises our consciousness about pressing contemporary social in justice issues that impact communities of color and the larger society Systemic or structural oppression and injustices police profiling and brutality oppressive pedagogy and gendered violence are placed in dialogue with sacred con texts This book provides fresh intersectional readings of sacred con texts that are accessible to both scholars and nonscholars Womanist Sass and Talk Back is for readers interested in critical interpretations of sacred con texts ancient and contemporary and in propagating the justice and love of God while engaging those con texts   *Death of the Desert* Christine Luckritz Marquis,2022-03-22 In the late fourth century the world of Christianity was torn apart by debate over the teachings of the third century theologian Origen and his positions on the incorporeality of God In the year 400 Archbishop Theophilus of Alexandria convened a council declaring Origen s later followers as heretics Shortly thereafter Theophilus banished the so called Tall Brothers four Origenist monks who led monastic communities in the western Egyptian desert along with hundreds of their brethren In some accounts Theophilus leads a violent group of drunken youths and enslaved Ethiopians in sacking and desecrating the monastery in others he justly exercises his episcopal duties In some versions Theophilus violent actions effectively bring the Golden Age of desert monasticism to an end in others he has shown proper respect for the desert fathers whose life of asceticism is subsequently destroyed by bands of barbarian marauders For some the desert came to be inextricably connected to violence and trauma while for others it became a site of nostalgic recollection Which of these narratives subsequent generations believed depended in good part on the sources they were reading In Death of the Desert Christine Luckritz Marquis offers a fresh examination of this critical juncture in Christian history and brings into dialogue narrative strands that have largely been separated in the scholarly tradition She takes the violence perpetrated by Theophilus as a turning point for desert monasticism and considers how monks became involved in acts of violence and how that violence came back to haunt them More broadly her careful attention to the dynamic relations between memory practices the rhetorical constructions of place racialized discourse and language and deeds of violence speak to us in our own time

Gender and Identity in Franz Grillparzer's Classical Dramas Alicia E. Ellis,2021-06-10 In this provocative work Alicia E Ellis provides readings of Franz Grillparzer s dramas as proto feminist formulations of female figures who refuse the gendered constraints of the ancient world The revisionist perspectives of the tragedies recover a latent feminist impulse in the stories of Sappho Medea and Hero as identities marked by linguistic refusals Activating new ideas of narrative experience Ellis transports the figure of the female to the seat of language testimony and presence Inflected by a taut impasse with a culture not produced to include female speech Ellis shows how Grillparzer s adaptations of classical materials offer a working theory about the ways in which new forms of language highlight female energy around autonomy and agency providing a corrective to previous cultural practices A failure to comply with social and political norms demonstrates how the three assessed and then resolved exclusionary acts through rebellious discursive performances that frame how contested

Cheng,2022-07-21 Difference and disagreement can be valuable yet they can also spiral out of control and damage liberal democracy Advancing a metaphor of citizenship that the author terms role based constitutional fellowship this book offers a solution to this challenge Cheng argues that a series of divisions of labor among citizens differently situated can help cultivate the foundational trust required to harness the benefits of disagreement and difference while preventing them from overheating and in turn from leaving liberal democracy vulnerable to the growing influence of autocratic political forces The book recognizes however that it is not always appropriate to attempt to cultivate trust and acknowledges the important role that some forms of confrontation might play in identifying and rectifying undue social hierarchies such as racial ethnic hierarchies Hanging Together thereby works to pave a middle way between deliberative and realist conceptions of democracy   **Monasteries and the Care of Souls in**
