**Talks To Teachers On Psychology** William James,2020-02-04 In the general activity and uprising of ideal interests which every one with an eye for fact can discern all about us in American life there is perhaps no more promising feature than the fermentation which for a dozen years or more has been going on among the teachers In whatever sphere of education their functions may lie there is to be seen among them a really inspiring amount of searching of the heart about the highest concerns of their profession The renovation of nations begins always at the top among the reflective members of the State and spreads slowly outward and downward The teachers of this country one may say have its future in their hands The earnestness which they at present show in striving to enlighten and strengthen themselves is an index of the nation s probabilities of advance in all ideal directions The outward organization of education which we have in our United States is perhaps on the whole the best organization that exists in any country The State school systems give a diversity and flexibility an opportunity for experiment and keenness of competition nowhere else to be found on such an important scale The independence of so many of the colleges and universities the give and take of students and instructors between them all their emulation and their happy organic relations to the lower schools the traditions of instruction in them evolved from the older American recitation method and so avoiding on the one hand the pure lecture system prevalent in Germany and Scotland which considers too little the individual student and yet not involving the sacrifice of the instructor to the individual student which the English tutorial system would seem too often to entail all these things to say nothing of that coeducation of the sexes in whose benefits so many of us heartily believe all these things I say are most happy features of our scholastic life and from them the most sanguine auguries may be drawn **Talks to Teachers on Psychology** William James,2014-11-01 Talks to Teachers on Psychology and to Students on some of Life s Ideals By William James A Classic Teacher Resource Readers acquainted with my larger books on Psychology will meet much familiar phraseology In the chapters on habit and memory I have even copied several pages verbatim but I do not know that apology is needed for such plagiarism as this The talks to students which conclude the volume were written in response to invitations to deliver addresses to students at women s colleges The first one was to the graduating class of the Boston Normal School of Gymnastics Properly it continues the series of talks to teachers The second and the third address belong together and continue another line of thought I wish I were able to make the second On a Certain Blindness in Human Beings more impressive It is more than the mere piece of sentimentalism which it may seem to some readers It connects itself with a definite view of the world and of our moral relations to the same Those who have done me the honor of reading my volume of

philosophic essays will recognize that I mean the pluralistic or individualistic philosophy According to that philosophy the truth is too great for any one actual mind even though that mind be dubbed the Absolute to know the whole of it The facts and worths of life need many cognizers to take them in There is no point of view absolutely public and universal Private and uncommunicable perceptions always remain over and the worst of it is that those who look for them from the outside never know where The practical consequence of such a philosophy is the well known democratic respect for the sacredness of individuality is at any rate the outward tolerance of whatever is not itself intolerant These phrases are so familiar that they sound now rather dead in our ears Once they had a passionate inner meaning Such a passionate inner meaning they may easily acquire again if the pretension of our nation to inflict its own inner ideals and institutions vi et armis upon Orientals should meet with a resistance as obdurate as so far it has been gallant and spirited Religiously and philosophically our ancient national doctrine of live and let live may prove to have a far deeper meaning than our people now seem to imagine it to possess
