The Raptors of Iowa Dean M

Roosa, Jon W. Stravers, Bruce Ehresman, Rich Patterson, 2013-05 This long awaited collection of James Landenberger's paintings of Iowa birds of prey presents thirty two full page full color species from the common turkey vulture to the red shouldered hawk of Mississippi River woodlands to the little northern saw whet owl Four naturalists who have devoted their lives to conserving wilderness habitats and species have written essays to complement the paintings Thanks to state and federal laws and a shift in public attitude birds of prey are no longer seen as incarnations of ferocity but as creatures superbly attuned to their lives and surroundings Although Iowa unfortunately leads the way in the amount of wildlife habitat that has been destroyed conservation organizations and state agencies have also led the way toward successful raptor restoration projects among them a roadside nest box program for the American kestrel a project to restore peregrine falcons to their historic eyries and a relocation program that should ensure a sustainable population of ospreys The recent spectacular recovery of the bald eagle whose nests had vanished from the state for seventy years is particularly encouraging There can be no substitute for seeing thousands of broad winged hawks soaring high overhead during migration a great horned owl perching in silhouette at dusk or a Cooper's hawk plunging toward its prey along the roadside But Jim Landenberger's meticulously detailed paintings go a long way toward conveying the remarkable beauty of the American kestrel and other falcons the grace of the swallow tailed kite the immaculate mystery of the snowy owl and its fellow owls the glistening head feathers of an adult bald eagle and the piercing defiance so characteristic of our larger hawks [A Watershed Year](#) Cornelia F. Mutel, 2010-03-15 In June 2008 the rivers of eastern Iowa rose above their banks to create floods of epic proportions their amazing size flowing in places at a rate nearly double that of the previous record flood and the rapidity of their rise ruined farmlands and displaced thousands of residents and hundreds of businesses In Cedar Rapids the waters inundated more than nine square miles of the downtown area in Iowa City where the flood was also the most destructive in history the University of Iowa's arts campus was destroyed By providing a solid base of scientific and technical information presented with unusual clarity and a wealth of supporting illustrations the contributors to this far reaching book many of whom dealt firsthand with the 2008 floods provide a detailed roadmap of the causes and effects of future devastating floods The twenty five essays fall naturally into four sections Rising Rivers Spreading Waters begins by comparing the 2008 floods with the midwestern floods of 1993 moves on to trace community responses to the 2008 floods and ends by illuminating techniques for forecasting floods and determining their size and frequency Why Here Why Now searches for possible causes of the 2008 floods and of flooding in general annual crops and urban landscapes inflows into and releases from reservoirs and climate change Flood Damages Flood Costs Flood Benefits considers the complex mix of flood costs and effects emphasizing damages to cities and farmlands as well as potential benefits to natural communities and archaeological sites Looking Back Looking Forward lays out approaches to managing the floods of the future that are sure to come While the book draws most of its examples from one particular region it explains flooding throughout a much larger region the

midwestern Corn Belt and thus its sobering yet energizing lessons apply well beyond eastern Iowa By examining the relationships among rivers floodplains weather and modern society by stressing matters of science and fact rather than social or policy issues and by addressing multiple environmental problems and benefits A Watershed Year informs and educates all those who experienced the 2008 floods and all those concerned with the larger causes of flooding **The Iowa Lakeside**

Laboratory Michael J. Lannoo, 2012-11-15 In this remarkable and insightful book Michael Lannoo sets the story of Lakeside Laboratory founded on the shore of Lake Okoboji in northwestern Iowa in 1909 within the larger story of the primacy of fieldwork the emergence of conservation biology and the ability of field stations to address such growing problems as pollution disease habitat loss invasive species and climate change **Art Quilts the Midwest** Linzee Kull

McCray, 2015-03-15 A milestone in perception occurred in 1971 when the Whitney Museum of American Art displayed quilts in a museum setting Abstract Design in American Quilts bestowed institutional recognition of the artistry inherent in these humble textiles In subsequent decades quilting's popularity exploded Some who took up quilting created pieced quilts that honored traditional patterns symmetry and repetition But others saw the potential for pushing beyond patchwork giving birth to the art quilt Today adherents from both art and quilting backgrounds incorporate storytelling digital images nonfabric materials asymmetry and three dimensions in short anything goes in the world of art quilting as long as the result is stitched layered and not primarily functional As a writer covering textiles art and craft Linzee Kull McCray wondered just how deeply fiber artists were influenced by their surroundings Focusing on midwestern art quilters in particular she put out a call for entries and nearly 100 artists responded they were free to define those aspects of midwesternness that most affected their work The artists selected for inclusion in this book embrace the Midwest's climate land people and culture and if they don't always embrace it wholeheartedly then they use their art to react to it The proof can be seen in the varied powerful quilts in this energizing book Enlivened by the Midwest's landscapes and seasons Sally Bowker paints her fabrics with acrylics creating marks and meaning with layers of hand stitching and appliqued bits of fabric Shin hee Chin uses sketchlike stitching for its ability to penetrate fabric and create depth living in the Midwest helps her stay balanced between eastern philosophy and western culture The metals and mesh that Diane Nez incorporates into her quilts connect to her days as a jeweler as well as to the topography of her home state of Michigan Pat Owoc prepares papers with disperse dyes then selects from as many as 150 to create her fabrics her art quilt series honors midwestern pioneers Martha Warshaw photographs old fabrics tweaks the images in Photoshop and prints the results for her pieces which connect her to the legacy of quilting in past generations The Midwest has always had strong textile communities Now the twenty artists featured in this beautifully illustrated book have created a new community of original art forms that bring new life to an old tradition The Artists Marilyn Ampe St Paul Minnesota Gail Baar Buffalo Grove Illinois Sally Bowker Cornucopia Wisconsin Peggy Brown Nashville Indiana Shelly Burge Lincoln Nebraska Shin hee Chin McPherson Kansas Sandra Palmer Ciolino Cincinnati Ohio Jacquelyn Gering

Mists of Nowhere Greg Hoch,2015-12-15 For ten months of the year the prairie chicken s drab colors allow it to disappear into the landscape However in April and May this grouse is one of the most outrageously flamboyant birds in North America Competing with each other for the attention of females males gather before dawn in an explosion of sights and sounds booming from the mists of nowhere as Aldo Leopold wrote decades ago There s nothing else like it and it is perilously close to being lost In this book ecologist Greg Hoch shows that we can ensure that this iconic bird flourishes once again Skillfully interweaving lyrical accounts from early settlers hunters and pioneer naturalists with recent scientific research on the grouse and its favored grasslands Hoch reveals that the prairie chicken played a key role in the American settlement of the Midwest Many hungry pioneers regularly shot and ate the bird as well as trapping hundreds of thousands shipping them eastward by

the trainload for coastal suppers As a result of both hunting and habitat loss the bird s numbers plummeted to extinction across 90 percent of its original habitat Iowa whose tallgrass prairies formed the very center of the greater prairie chicken s range no longer supports a native population of the bird most symbolic of prairie habitat The steep decline in the prairie chicken population is one of the great tragedies of twentieth century wildlife management and agricultural practices However Hoch gives us reason for optimism These birds can thrive in agriculturally productive grasslands Careful grazing reduced use of pesticides well placed wildlife corridors planned burning higher plant animal and insect diversity these are the keys If enough blocks of healthy grasslands are scattered over the midwestern landscape there will be prairie chickens and many of their fellow creatures of the tall grasses Farmers ranchers conservationists and citizens can reverse the decline of grassland birds and insure that future generations will hear the booming of the prairie chicken
