## **Taming The Coolie Beast Plantation Society And The Colonial Order In Southeast Asia:**

*Taming the Coolie Beast* Jan Breman, 1989 This is a study of the plantation system on the East Coast of Sumatra a Dutch colony from the early 19th century to the beginning of the 20th century The Rhemrev Report which exposed the scandalous state of affairs on the plantations is here placed in its historical and social context Plantation Crisis Jayaseelan Raj, 2022-07-14 What does the collapse of India's tea industry mean for Dalit workers who have lived worked and died on the plantations since the colonial era Plantation Crisis offers a complex understanding of how processes of social and political alienation unfold in moments of economic rupture Based on long term ethnographic fieldwork in the Peermade and Munnar tea belts Jayaseelan Raj himself a product of the plantation system offers a unique and richly detailed analysis of the profound multi dimensional sense of crisis felt by those who are at the bottom of global plantation capitalism and caste hierarchy Tea production in India accounts for 25 per cent of global output The colonial era plantation system and its two million strong workforce has since the mid 1990s faced a series of ruptures due to neoliberal economic globalisation In the South Indian state of Kerala otherwise known for its labour centric development initiatives the Tamil speaking Dalit workforce whose ancestors were brought to the plantations in the 19th century are at the forefront of this crisis which has profound impacts on their social identity and economic wellbeing Out of the colonial history of racial capitalism and indentured migration Plantation Crisis opens our eyes to the collapse of the plantation system and the rupturing of Dalit lives in India's tea belt **Capitalism and Agrarian Change** Muchtar Habibi, 2022-11-17 Small scale agricultural producers in the peripheral world are often condescendingly assumed to be a single social class the peasantry to be pitted against the state or corporation This book challenges this rather idealistic view by demonstrating that under current capitalist social relations competition efficiency and productivity and profit maximisation these agricultural producers have been differentiated into different agrarian classes by exploitation By comparing two different contexts of local agrarian change in Indonesia rice cultivation in Java and oil palm in Sumatra this book exposes the different class locations of the agrarian classes among petty agricultural producers and the class relations between them These are often inextricably linked to gender clanship and generational issues The power of class dynamics crucially shapes how agricultural production in both rice and oil palm is organised The share received by different agrarian classes from the production site then prominently shapes the different nature of class reproduction for each agrarian class This analysis demonstrates that the different agrarian classes possess different capacities and responses in their relation to the state or corporations Any real emancipation attempt in the Indonesian countryside and beyond must start from a proper understanding of these class dynamics This book marks a significant contribution to the literature on agrarian change the political economy of development rural development and Marxist political economy **Planting Empire, Cultivating Subjects** Lynn Hollen Lees, 2017-12-21 This is an innovative study of how British Colonial rule and society in Malayan towns and plantations

transformed immigrants into British subjects      *Labor on the Line* Anna-Lena Wolf,2025-10-15 *Labor on the Line* provides insights into the world's largest tea growing region of Assam. Anna-Lena Wolf examines everyday conceptualizations of justice, how they emerge, become prevalent, transform, and are negotiated by differently positioned actors on Assam's tea plantations. Academics and activists have criticized the conditions on these plantations as a form of bondage, arguing that the persistence of a colonial wage structure characterized by low cash wages supplemented with in-kind benefits reinforces laborers' dependence on plantations. But Wolf shows that there is more to the story. Tea plantation laborers and trade unionists formed surprising alliances with managers and plantation owners based on everyday conceptions of justice. All involved favored the old-style plantation at a time when fundamental changes were appearing in the political economy of tea production. *Labor on the Line* challenges the simplistic notion that dismantling tea plantations would create a better world for tea plantation laborers by advancing notions of justice in innovative ways. Thanks to generous funding from the Swiss National Science Foundation, the ebook editions of this book are available as open access volumes through the Cornell Open initiative.

**Colonialism, Capitalism and Racism** Jan Breman,2025-10-01 For a long time Europe's colonizing powers justified their urge for expansion with the conviction that they were bringing civilization to territories where civilization was lacking. This doctrine of white superiority and indigenous inferiority was accompanied by a boundless exploitation of local labor. Under colonial rule, the ideology that later became known as neoliberalism was free to subject labor to a capitalism tainted by racialized policies. This political economy has now become dominant in the Western world too and has reversed the trend towards equality. In *Colonialism, Capitalism and Racism*, Jan Breman shows how racial favoritism is no longer contained to faraway indigenous peoples but has become a source of polarization within Western societies as well.

**Coolies of Capitalism** Nitin Varma,2018-05-07 Coolie is a generic category for the unskilled manual labour. The offering of services for hire had various pre-colonial lineages. In the nineteenth century, there was an attempt to recast the term in discursive constructions and material practices for mobilized/immobilized labour. Coolie labour was often proclaimed as a deliberate compromise straddling the regimes of the past slave labour and the future free labour. It was portrayed as a stage in a promised transition. The tea plantations of Assam, like many other tropical plantations in South Asia, were inaugurated and formalized during this period. They were initially worked by the locals. In the late 1850s, the locals were replaced by labourers imported from outside the province who were unquestioningly designated coolies in the historical literature. Qualifying this framework of transition from local to coolie labour and the introduction of coolie labour, this study makes a case for the production of coolie labour in the history of the colonial capitalist plantations in Assam. The intention of the research is not to suggest an unfettered agency of colonial capitalism in defining and producing coolies, with an emphasis on the attendant contingencies, negotiations, contestations, and crises. The study intervenes in the narratives of an abrupt appearance of the archetypal coolie of the tea gardens, i.e. imported and indentured, and situates this archetype's emergence, sustenance, and shifts in the

context of material and discursive processes      **Oil Palm** Jonathan E. Robins, 2021-05-21 Oil palms are ubiquitous grown in nearly every tropical country they supply the world with more edible fat than any other plant and play a role in scores of packaged products from lipstick and soap to margarine and cookies And as Jonathan E Robins shows sweeping social transformations carried the plant around the planet First brought to the global stage in the holds of slave ships palm oil became a quintessential commodity in the Industrial Revolution Imperialists hungry for cheap fat subjugated Africa s oil palm landscapes and the people who worked them In the twentieth century the World Bank promulgated oil palm agriculture as a panacea to rural development in Southeast Asia and across the tropics As plantation companies tore into rainforests evicting farmers in the name of progress the oil palm continued its rise to dominance sparking new controversies over trade land and labor rights human health and the environment By telling the story of the oil palm across multiple centuries and continents Robins demonstrates how the fruits of an African palm tree became a key commodity in the story of global capitalism beginning in the eras of slavery and imperialism persisting through decolonization and stretching to the present day

**Represented Communities** John D. Kelly, Martha Kaplan, 2001-09 In 1983 Benedict Anderson s Imagined Communities revolutionized the anthropology of nationalism Anderson argued that print capitalism fostered nations as imagined communities in a modular form that became the culture of modernity Now in Represented Communities John D Kelly and Martha Kaplan offer an extensive and devastating critique of Anderson s depictions of colonial history his comparative method and his political anthropology The authors build a forceful argument around events in Fiji from World War II to the 2000 coups showing how focus on imagined communities underestimates colonial history and obscures the struggle over legal rights and political representation in postcolonial nation states They show that the self determining nation state actually emerged with the postwar construction of the United Nations fundamentally changing the politics of representation Sophisticated and impassioned this book will further anthropology s contribution to the understanding of contemporary nationalisms

A Thirst for Empire Erika Rappaport, 2019-03-05 Tea has been one of the most popular commodities in the world Over centuries profits from its growth and sales funded wars and fueled colonization and its cultivation brought about massive changes in land use labor systems market practices and social hierarchies the effects of which are with us even today A Thirst for Empire takes a vast and in depth historical look at how men and women through the tea industry in Europe Asia North America and Africa transformed global tastes and habits and in the process created our modern consumer society As Erika Rappaport shows between the seventeenth and twentieth centuries the boundaries of the tea industry and the British Empire overlapped but were never identical and she highlights the economic political and cultural forces that enabled the British Empire to dominate but never entirely control the worldwide production trade and consumption of tea Rappaport delves into how Europeans adopted appropriated and altered Chinese tea culture to build a widespread demand for tea in Britain and other global markets and a plantation based economy in South Asia and Africa Tea was among the earliest
