Taming The Internet:

Using the Internet to Strengthen Curriculum Larry Lewin, 2001 Today's students literally grew up with the Internet. For too many students though the glowing computer screen in front of them is just another game platform shopping mall or telephone line. But teachers who can help students use the Internet as a learning tool will improve their instruction and their students' learning. *Using the Internet to Strengthen Curriculum* is not a technical book; rather, it is a book about teaching. Its focus is on helping teachers learn how to bring the Internet's World Wide Web into their classrooms and to encourage students to tap into this incredible informational resource. Using strategies provided by author Larry Lewin, teachers can help students use search engines effectively, quickly find Web sites and understand their content, conduct sound research, think critically to learn independently, avoid plagiarism, construct presentations on what they have learned. Through dozens of examples and strategies such as the Pre Search, We Search, and Free Search, this book serves as an invaluable reference tool for teachers, media specialists, and technology coordinators.

Digital Dissidence and Social Media Censorship in Africa Farooq A. Kperogi, 2022-07-27 This book reflects on the rapid rise of social media across the African continent and the legal and extra-legal efforts governments have invented to try to contain it. The relentless growth of social media platforms in Africa has provided the means of resistance, self-expression, and national self-fashioning for the continent's restlessly energetic and contagiously creative youth. This has provided a profound challenge to the African gatekeeper state, which has often responded with strategies to constrict and constrain the rhetorical luxuriance of the social media and digital sphere. Drawing on cases from across the continent, contributors explore the form and nature of social media and government censorship, often via antisocial media laws or less overt tactics such as state cybersurveillance, spyware attacks on social media activists, or the artful deployment of the rhetoric of fake news as a smokescreen to muzzle critical voices. The book also reflects on the Chinese influence in African governments' clampdown on social media and the role of Israeli NSO Group.

Technologies as well as the tactics and technologies which activists and users are deploying to resist or circumvent social media censorship Drawing on a range of methodologies and disciplinary approaches this book will be an important contribution to researchers with an interest in social media activism digital rebellion discursive democracy in transitional societies censorship on the Internet and Africa more broadly *Taming the Internet* Charlyn Keating,1998-01-01

Misunderstanding the Internet James Curran,Natalie Fenton,Des Freedman,2012-03-12 The growth of the internet has been spectacular There are now more 1 5 billion internet users across the globe about one quarter of the world s population This is certainly a new phenomenon that is of enormous significance for the economic political and social life of contemporary societies However much popular and academic writing about the internet takes a technologically deterministic view assuming that the internet s potential will be realised in essentially transformative ways This was especially true in the euphoric moment of the mid 1990s when many commentators wrote about the internet with awe and wonderment While this moment may be over its underlying technocentrism the belief that technology determines outcomes lingers on and with it a failure to understand the internet in its social economic and political context Misunderstanding the Internet is a short introduction encompassing the history sociology politics and economics of the internet and its impact on society The book has a simple three part structure Part 1 looks at the history of the internet and offers an overview of the internet s place in society Part 2 focuses on the control and economics of the internet Part 3 examines the internet s political and cultural influence Misunderstanding the Internet is a polemical sociologically and historically informed textbook that aims to challenge both popular myths and existing academic orthodoxies around the internet Dealing with Difficult People in the Library Mark R. Willis,1999 This text offers practical strategies for managing problems posed by patrons and other staff It is a hands on guide to solving problems through communication preventive measures and clear and concise patron behaviour policies *Intimacy on the Internet* Lauren Rosewarne,2016-04-14 The focus of this book is on the media representations of the use of the Internet in seeking intimate connections be it a committed relationship a hook up or a community in which to dabble in fringe sexual practices Popular culture film narrative television the news media and advertising present two very distinct pictures of the use of the Internet as related to intimacy From news reports about victims of online dating to the presentation of the desperate and dateless the perverts and the deviants a distinct frame for the intimacy Internet connection is negativity In some examples however a changing picture is emerging The ubiquitousness of Internet use today has meant a slow increase in comparatively more positive representations of successful online romances in the news resulting in more positive spin advertising and a more even handed presence of such liaisons in narrative television and film Both the positive and the negative media representations are categorised and analysed in this book to explore what they reveal about the intersection of gender sexuality technology and the changing mores regarding intimacy *Who Rules the Net?* Adam D. Thierer,Clyde Wayne Crews,2003 The rise of the World Wide Web is challenging traditional concepts of jurisdiction

governance and sovereignty Many observers have praised the Internet for its ubiquitous and borderless nature and argued that this global medium is revolutionizing the nature of modern communications Indeed in the universe of cyberspace there are no passports and geography is often treated as a meaningless concept But does that mean traditional concepts of jurisdiction and governance are obsolete When legal disputes arise in cyberspace or when governments attempt to apply their legal standards or cultural norms to the Internet how are such matters to be adjudicated Cultural norms and regulatory approaches vary from country to country as reflected in such policies as free speech and libel standards privacy policies intellectual property antitrust law domain name dispute resolution and tax policy In each of those areas policymakers have for years enacted myriad laws and regulations for realspace that are now being directly challenged by the rise of the parallel electronic universe known as cyberspace Who is responsible for setting the standards in cyberspace Is a U N for the Internet or a multinational treaty appropriate If not whose standards should govern cross border cyber disputes Are different standards appropriate for cyberspace and real space Those questions are being posed with increasing frequency in the emerging field of cyber law and constitute the guiding theme of this book s collection of essays Book jacket

Public Intellectuals and Their Discontents Yadullah Shahibzadeh,2020-09-30 This book addresses the ways in which the figure of the intellectuals and their relationship to the public has been theorized through the conceptualizations of bureaucracy democracy and communism as universal processes from the 19th century to the present Starting with Hegel and Marx the author looks at the rise of the figure of the universal intellectual in various forms before turning to what is presented as a transformation of the figure of the intellectual into the public intellectual advanced by the New Philosophies and the critical response offered by Edward Said The study presents two comparative case studies the Iranian Revolution and the public intellectuals in Europe specifically in Norway before concluding with a focus on the decay of the figure of the intellectuals and highlighting Ranciere s critique of the intellectual masses distinction

Social Media and the Public Interest Philip M. Napoli,2019-08-27 Facebook a platform created by undergraduates in a Harvard dorm room has transformed the ways millions of people consume news understand the world and participate in the political process Despite taking on many of journalism s traditional roles Facebook and other

platforms such as Twitter and Google have presented themselves as tech companies and therefore not subject to the same regulations and ethical codes as conventional media organizations Challenging such superficial distinctions Philip M Napoli offers a timely and persuasive case for understanding and governing social media as news media with a fundamental obligation to serve the public interest Social Media and the Public Interest explores how and why social media platforms became so central to news consumption and distribution as they met many of the challenges of finding information and audiences online Napoli illustrates the implications of a system in which coders and engineers drive out journalists and editors as the gatekeepers who determine media content He argues that a social media driven news ecosystem represents a case of market failure in what he calls the algorithmic marketplace of ideas To respond we need to rethink fundamental elements of media governance based on a revitalized concept of the public interest A compelling examination of the intersection of social media and journalism Social Media and the Public Interest offers valuable insights for the democratic governance of today s most influential shapers of news

Competing for the Internet Flip Petillion, Jan

Janssen, 2017-03-15 The Internet Corporation for Assigned Names and Numbers ICANN founded in 1998 is a not for profit public benefit corporation established to ensure a stable and secure global Internet As the custodian of the Domain Name System DNS one of its key responsibilities is the introduction and promotion of competition in Internet related markets an aim which ICANN has tried to achieve through the delegation of generic top level domains gTLDs This book investigates how successful ICANN has been in achieving this goal Over the years ICANN has been required to decide on a substantial number of complaints from applicants for gTLDs related to capture arbitrariness discrimination and unwarranted restriction of competition This book is the first detailed study of complaints related to ICANN decisions that have been brought using ICANN s Independent Review Process IRP The authors preeminent expert practitioners in international litigation and arbitration related to Internet governance take a close look at how ICANN has handled the major issues raised and how ICANN has shaped its own accountability mechanisms The book also weighs the influence of external accountability on ICANN s decision making process and considers the implications of third party decisions such as IRP decisions for the ongoing development of the Internet This authoritative analysis covers the regulatory framework governing ICANN and the introduction of new gTLDs in a historic perspective ICANN s accountability framework all the IRP cases that have been decided to date with an in depth analysis of those cases that have become reference decisions in the latest application round and the 2016 amendments to ICANN s articles of incorporation and bylaws concentrating on the problems that remain unresolved This work is a welcome addition to the debate on how to address the shortcomings in ICANN s accountability in the interests of the global Internet community The authors make concrete proposals and recommendations suggesting changes to ICANN s regulatory framework in the light of the lessons learned and with a view to preventing similar problems arising in a next round of gTLD applications This book has the potential to become the Green Book for fundamental changes

to ICANN's accountability framework Media and Conflict Cees Jan Hamelink, 2015-11-17 The world faces explosive conflicts about the distribution and scarcity of resources about ethnicity and religion and about the risks of urban life These conflicts can easily spiral out of control toward mass slaughter an evil of huge proportions that is often escalated by the media What should be done to prevent this lethal trend We need to understand how the spiral of escalation works How do media create anxiety provide space for agitation and disconnect people Three approaches to the prevention of mass mediated aggression are proposed in this book an early warning system for incitement to mass destruction the invitation to disarming conversations in urban space and the teaching of compassionate communication to children and others Alertness to the recurrence of collective violence is urgently needed not only in unstable and poor societies but also in established democracies Ordinary people can be incited to the mass slaughter of other ordinary people anywhere Understanding the media's role in this and acting to prevent it are key goals of this book **Participation and Media Production** Nico Carpentier, Benjamin De Cleen, 2009-05-27

In an era when especially new media are celebrated for their participatory potential questions about the nature and intensity of these participatory processes seem to be superfluous But raising these questions pushes us into a critical mode towards the changes that have led to the present day media landscape This volume's authors aim to activate this critical mode and reflect on the participatory nature of contemporary media organizations and products In order to stand even a remote chance to realize this objective and to critically unravel the societal role of participation we need to acknowledge that participation is a complex and contested notion covering a wide variety of meanings and practices that are converging into a hybrid of technologies genres and formats At the same time prudence is required as many of the empowering and transformative opportunities cover up a multitude of restrictions that deal with muting voices appropriations techniques of surveillance inequalities and exclusions This volume thus provides its readership with a set of analyses that reconcile the appreciation for the analogue and digital empowerment and emancipation with the critical analysis of their boundaries Participation and Media Production is the result of the intellectual work of the participants of the 2007 San Francisco Conference of the International Communication Association ICA *New Crime in China* Ronald Keith, Zhiqiu Lin, 2005-12-16 Examining crimes which are of great concern in China *New Crime in China* assesses the imbalance between public order and human rights in the way the Chinese legal system deals with them

disruption in the recording industry It captures the complexity of the innovation processes that brought about technological development which arose as a result of interaction across the circuit of the recording business production distribution valorisation and consumption By offering a more sophisticated account than the prevailing dichotomy the book exposes deterministic myths surrounding the radical transformation of the industry *Competition in the Evolving Digital Marketplace* United States. Congress. House. Committee on the Judiciary. Subcommittee on Courts and Competition Policy, Richard A.
