Literature, Speech Disorders, and Disability Christopher Eagle, 2013-10-08 Examining representations of speech disorders in works of literature this first collection of its kind founds a new multidisciplinary subfield related but not limited to the emerging fields of disability studies and medical humanities The scope is wide ranging both in terms of national literatures and historical periods considered engaging with theoretical discussions in poststructuralism disability studies cultural studies new historicism gender studies sociolinguistics trauma studies and medical humanities The book's main focus is on the development of an awareness of speech pathology in the literary imaginary from the late eighteenth century to the present studying the novel drama epic poetry lyric poetry autobiography and autopathography and clinical case studies and guidebooks on speech therapy The volume addresses a growing interest both in popular culture and the humanities regarding the portrayal of conditions such as stuttering aphasia and mutism along with the status of the self in relation to those conditions Since speech pathologies are neither illnesses nor outwardly physical disabilities critical studies of their representation have tended to occupy a liminal position in relation to other discourses such as literary and cultural theory and even disability studies One of the primary aims of this collection is to address this marginalization and to position a cultural criticism of speech pathology within literary studies **Mental Illness in Popular Media** Lawrence C.

Rubin,2014-01-10 Whether in movies cartoons commercials or even fast food marketing psychology and mental illness remain pervasive in popular culture In this collection of new essays scholars from a range of fields explore representations of mental illness and disabilities across various media of popular culture Contributors address how forms of psychiatric disorder have been addressed in film on stage and in literature how popular culture genres are utilized to communicate often confusing and conflicted relationships with the mentally ill and how popular cultures around the world reflect mental illness and disability Analyses of sources as disparate as the Batman films Broadway musicals and Nigerian home movies reveal how definitions of mental illness mental health and of psychology itself intersect with discourses on race gender law capitalism and globalization Instructors considering this book for use in a course may request an examination copy here *Linguistic Disorders and Pathologies* Gerhard Blanken,Jürgen Dittmann,Hannelore Grimm,John C. Marshall,Claus-W.

Wallesch,2008-07-14 This handbook is geared towards the following aims Reviewing the state of research on disordered language perception and production in adults and children Describing and discussing present attempts at modelling human language processing by using linguistic disorders and pathologies as a data base Presenting diagnostic and therapeutic concepts Pointing out gaps and inconsistencies in current knowledge and theories In bringing together knowledge of different sources and disciplines under a common roof the editors have achieved a comprehensive overview of the state of the art in the field of language pathology Because of the diversity of the disciplines contributing to this scientific field the chapters differ clearly in theories and methodologies Yet this handbook represents a clear and common interdisciplinary contribution to linguistic disorders and pathologies and furthermore demonstrates the amount of interdisciplinary interaction still required We chose this title in order to encompass as broadly as possible abnormalities and alterations of language perception comprehension and production in adults and children including nonpathological disorders This handbook will be of interest to anybody involved with disordered language and or language and speech disturbances such as linguists and psychologists working in related research areas or teaching related subjects scientists analyzing and modelling linguistic and cognitive processes e g in Cognitive Psychology Psycholinguistics Neurolinguistics Neuropsychology Behavioural Neurology Artificial Intelligence Research and Cognitive Science clinicians dealing with acquired or developmental language disorders and speech pathologists and therapists Besides presenting the state of the art the handbook provides rich bibliographical information for research workers clinicians and advanced students **Everybody Belongs** Arthur Shapiro,2003-09-01 The

evil prosthesis of Captain Hook the comical speech of Porky Pig and the bumbling antics of Mr Magoo are all examples of images in our culture which can become the basis of negative attitudes and subliminal prejudice towards persons with disabilities These attitudes influence and underlie discriminatory acts resulting in negative treatment and segregation A teacher's ability to recognize and counter such images may well determine the success of inclusion and mainstreaming programs in our schools and society Well researched and well written this book offers practical guidance as grounded in solid

research to schools that are wrestling with how to mainstream children with disabilities Disability Studies and the Inclusive Classroom Susan Baglieri, 2012-05-04 This book's mission is to integrate knowledge and practice from the fields of disability studies and special education Parts I II focus on the broad foundational topics that comprise disability studies culture language and history and Parts III IV move into practical topics curriculum co teaching collaboration classroom organization disability specific teaching strategies etc associated with inclusive education This organization conforms to the belief that least restrictive environments the goal of inclusive education necessarily emerges from least restrictive attitudes the goal of disability studies Discussions throughout the book attempt to illustrate the intersection of theory and practice
