War Heaven Mack Maloney, *Evidence and Agency* Berislav Marusic, 2015-10-01 Evidence and Agency is concerned with the question of how as agents we should take evidence into account when thinking about our future actions Suppose you are promising or resolving to do something that you have evidence is difficult for you to do For example suppose you are promising to be faithful for the rest of your life or you are resolving to quit smoking Should you believe that you will follow through or should you believe that there is a good chance that you won t If you believe the former you seem to be irrational since you believe against the evidence Yet if you believe the latter you seem to be insincere since you can t sincerely say that you will follow through Hence it seems your promise or resolution must be improper Nonetheless we make such promises and resolutions all the time Indeed as the examples illustrate such promises and resolutions are very important to us The challenge is to explain this apparent inconsistency in our practice of promising and resolving To meet this challenge Berislav Marusic considers a number of possible responses including an appeal to trying an appeal to non cognitivism about practical reason an appeal to practical knowledge and an appeal to evidential constraints on practical reasoning He rejects all these and defends a solution inspired by the Kantian tradition and by Sartre in particular as agents we have a distinct view of what we will do If something is up to us we can decide what to do rather than predict what we will do But the reasons in light of which a decision is rational are not the same

as the reasons in light of which a prediction is rational That is why provided it is important to us to do something we can rationally believe that we will do it even if our belief goes against the evidence **Flight Services** United States.
