[Axis Armoured Fighting Vehicles of the Second World War](#) Michael Green, 2018-03-30

During the Second World War the Axis powers most prolifically the Germans deployed a vast array of armored fighting vehicles to support their tanks and infantry. These included tank destroyers, reconnaissance vehicles, flame thrower vehicles, and self propelled artillery pieces. Armored tank destroyers such as the Marder series, the Nashorn, Jagdpanther, Jagdtiger, and the turretless German Stu III series based on the Panzer III medium tank helped the Nazis overcome their shortage of tanks. Copying the Stu III series the Italians created the turretless Semovente da 75 18 assault gun and the Hungarians the turretless Zrinyi. In the role of self propelled artillery the German fielded the Hummel, the Wespe, and the Grille while the Brummbär and the Sturmtiger performed in the dedicated assault gun role. For armored reconnaissance German industry came up with a series of capable armored cars, examples were the eight wheel Puma and the full tracked Luchs reconnaissance tank. The Italians developed the impressive four wheel Autoblinda armored cars. Specialized anti-aircraft tanks such as the Möbelwagen, Wirbelwind, and the Ostwind gave some protection against the ever more powerful Allied air forces. This fine book covers all these variants and many more besides in words and rare images and will delight readers, collectors, model makers, and war gamers.

Excerpt: Soviet BT 7 tanks on parade. This article deals with the history of tanks of the Soviet Union. World War I established the validity of the tank concept. After the war many nations needed to have tanks but only a few had the industrial resources to design and build them. During and after World War I Britain and France were the intellectual leaders in tank design with other countries generally following and adopting their designs. This early lead would be gradually lost during the course of the 1930s to the Soviet Union who with Germany began to design and build their own tanks. The Treaty of Versailles had severely limited Germany's industrial output. Therefore to circumvent the treaty's restrictions these industrial firms formed partnerships with the Soviet Union to legally produce weapons and sell them and along with other factors inadvertently built up an infrastructure to produce tanks which later made the famous T-34 and other. **The**
