Tanstaaf The Economic Strategy For Environmental Crisis:

TANSTAAFL, the Economic Strategy for Environmental Crisis Edwin G. Dolan, 1971 Monograph on ecological economics describes an economic system approach to considering costs of environmental protection and pollution control with a view to coping with population growth nature conservation waste recycling economic development of developing countries etc Diagrams illustrations and references **TANSTAAFL [There Ain't No Such Thing as a Free Lunch]** ,1971 Tanstaaf (There Ain't No Such Thing as a Free Lunch) Edwin G. Dolan, 1971 **Ecological Economic and Socio Ecological Strategies for Forest Conservation** Felix Fuders, Pablo J. Donoso, 2020-05-13 This book proposes strategies for improving the resilience and conservation of temperate forests in South America such that these forests can provide ecosystem services in a sustainable way As such it contributes to the design of a resilient human forest model that takes into account the multiculturalism of local communities in many cases including aspects of ecological economics development economics and territorial development planning that are related to indigenous peoples or first nations Further it provides proposals for public and territorial policies that improve the state of conservation of native forests and forest ecosystems based on a critical analysis of the economic factors that lead to the degradation of forest ecosystems in South America today This edition was conceived by members of the Transdisciplinary Research Center for Social and Ecological Strategies for Sustainable Forest Management in South America at the Universidad Austral de Chile It includes contributions by distinguished researchers from around the world combining the fields of economics ecology biology anthropology sociology and statistics It is not however simply a collection of works written by authors from different disciplines but rather each chapter is in itself transdisciplinary This approach makes the book a unique contribution to enhancing social managerial and political approaches to forestry management helping to protect forest ecosystem services and make them more sustainable This in turn will benefit local communities and society as a whole by reducing the negative externalities of forestry management and enhancing future opportunities *U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973* United States. McCarthy, 2024-03-01 How one organization took on industrial pollution and the lessons for our new century In 1977 one forward thinking judge took an ecological disaster the poisoning of the James River by Allied Chemical and turned it into a great environmental protection legacy The 8 million payment made by Allied would go on to fund the game changing Virginia Environmental Endowment Blueprint for Going

Green provides an insider's account of the remarkable results of this landmark ruling and the foundation it spawned. Over the following decades the VEE helped to grow the fledgling environmental movement in Virginia into a powerful force for protecting the state's water quality and conserving its landscape. This inspiring story reveals how a small group can make a profound difference by engaging in public policy work, funding science to advance public policy, and helping to build a lasting and effective citizen-led environmental movement. Design and the Economics of Building D. Jaggar, R. R. Morton, 2003-09-02 A textbook on design economics for students of architecture, building, and quantity surveying. It examines the links between design and the costs of building, as well as more general economic issues and their significance for designers and builders. The Individual Vs. The Public Interest Richard M. Alston, 2019-07-11 Central to the controversy surrounding U.S. natural resources policy is the conflict between environmentalists and proponents of development. Examining the evolution of the philosophies underlying that conflict, Dr. Alston traces the failure to achieve a unified resources policy to the seemingly incompatible ideological positions held by resource specialists, interest groups, policymakers, economists, and foresters. His analysis goes beyond his case study of national forest policy to focus on an ancient question basic to policy making in a democratic society: How can government provide a sociopolitical framework that accommodates both individual interests and the need for unity in a collective existence? Only within this broader framework, he argues, is it possible to determine the proper division between private and public resource management or the proper role of government in natural resources planning. Incorporating a critical evaluation of the development of classical and neoclassical economic theory, this work makes clear the need to strike a balance between a strictly individualistic and an ecological point of view. Dr. Alston illustrates the ideological conflicts that complicate resources planning and explores the possibility of a new ideology capable of accommodating and integrating differences to meet the complex needs of society. Federalism and Regional Development George W. Hoffman, 2014-11-11 Federalism and Regional Development is the result of the first German-American geography seminar held at the University of Texas in September 1979. The chapters deal with the impact of geographic policy planning by various governmental agencies in both the Federal Republic of Germany and the United States, two countries with federal systems of government. Although various bureaucratic offices at the federal, state, county, and city levels became involved in spatial planning in both countries, no overall coordination of development planning existed. The contributors to this volume offer many theoretical and empirical perspectives on the evolution of federal policies and programs and their impact on geographic planning activities at all levels of government. The topics covered range from actual regional case studies in both countries to the framework of the agencies concerned with spatial planning. Numerous maps and tables document the data resources of the contributors and yield useful insights on the workings of the federal system. **Economic Abstracts**, 1972 Review of abstracts on economics, finance
