Biology of Root Formation and Development Arie Altman, Yoav Waisel, 2012-12-06 This book contains the majority of the presentations of the Second International Symposium on the Biology of Root Formation and Development that was held in Jerusalem Israel June 23-28 1996 Following the First Symposium on the Biology of Adventitious Root Formation held in Dallas USA 1993 we perceived the need to include all kinds of roots not only the shoot borne ones The endogenous signals that control root formation and the subsequent growth and development processes are very much alike regardless of the sites and sources of origin of the roots Therefore we included in the Second Symposium contributions on both shoot borne i.e. adventitious roots and root borne i.e. lateral roots Plant roots have remained an exciting and an intriguing field of science During the years that followed the first symposium an exceptional proliferation of interest in root biology has developed associated with the intensive research activity in this field and the contemporary developments in the understanding of root function and development New methods have been applied and old ideas and interpretations were re-examined Altogether it became necessary to update our viewpoints and to expand them
