Night Timothy Day,2018-11-15 The sound of the choir of King s College Cambridge its voices perfectly blended its emotions restrained its impact sublime has become famous all over the world and for many the distillation of a particular kind of Englishness This is especially so at Christmas time with the broadcast of the Festival of Nine Lessons and Carols whose centenary is celebrated this year How did this small band of men and boys in a famous fenland town in England come to sing in the extraordinary way they did in the twentieth and early twenty first centuries It has been widely assumed that the King s style essentially continues an English choral tradition inherited directly from the Middle Ages In this original and illuminating book Timothy Day shows that this could hardly be further from the truth Until the 1930s the singing at King s was full of high Victorian emotionalism like that at many other English choral foundations well into the twentieth century The choir s modern sound was brought about by two intertwined revolutions one social and one musical From 1928 singing with the trebles in place of the old lay clerks the choir was fully made up of choral scholars college men reading for a degree Under two exceptional directors of music Boris Ord from 1929 and David Willcocks from 1958 the style was transformed and the choir broadcast and recorded until it became the epitome of English choral singing setting the benchmark for all other choral foundations either to imitate or to react against Its style has now been taken over and adapted by classical performers who sing both sacred and secular music in secular settings all over the world with a precision inspired by the King s tradition I Saw Eternity the Other Night investigates the timbres of voices the enunciation of words the use of vibrato But the singing of all human beings in whatever style always reflects in profound and subtle ways their preoccupations and attitudes to life These are the underlying themes explored by this book **Critical Approaches to the Production of Music and Sound**

Samantha Bennett,Eliot Bates,2018-01-11 Who produces sound and music And in what spaces localities and contexts As the production of sound and music in the 21st Century converges with multimedia these questions are critically addressed in this

Music and Technoculture René T. A. Lysloff, Leslie C. Gay, Jr., 2013-08-15 Moving from web to field from Victorian parlor to 21st century mall the 15 essays gathered here yield new insights regarding the intersection of local culture musical creativity and technological possibilities Inspired by the concept of technoculture the authors locate technology squarely in the middle of expressive culture they are concerned with how technology culturally informs and infuses aspects of everyday life and musical experience and they argue that this merger does not necessarily result in a cultural grayout but instead often produces exciting new possibilities In this collection we find evidence of musical practices and ways of knowing music that are informed or even significantly transformed by new technologies yet remain profoundly local in style and meaning
