Tapping Hidden Power:

Tapping Hidden Power Time-Life Books, 1994 Donated **Hidden Power of Speaking in Tongues** Mahesh Chavda, 2011-07-28 Almost 40 years ago John and Elizabeth Sherill introduced the world to the phenomenon of speaking in tongues in their book *They Speak with Other Tongues*. The book was an immediate success as thousands were touched by the power of this spiritual gift. *The Hidden Power of Speaking in Tongues* again explores this spiritual experience powerfully prevalent in the early church. This much maligned and controversial gift was a practical part of their worship and intercession and seeks to be rediscovered in our day. In a day of spiritual poverty Chavda challenges the Body of Christ to experience afresh the secret dynamic of speaking in tongues as he removes the veil covering this glorious gift.

The Power Of Mindfulness RD King, Your Mind Is More Powerful Than You Realize. Control Your Thoughts And Rid Your Life Of Stress, Anxiety And Finally Have The Abundance And Happiness In Your Life That You Deserve. If there is one ability that you could learn that would make every single aspect of your life better, what would it be? Undoubtedly it would be the ability to control your emotions and to control the way you think. This might sound like a surprising claim, but the ability to control your emotions and the way you respond to a situation is not only the secret to happiness but also the secret to being able to get whatever you want from life. Why? Because it's our interpretation of events.

more than the events themselves that dictate our happiness mood and performance Not only that but our emotions and the neurotransmitters that control them are what alter our ability to focus to remember information and to be creative What happens to you in this situation You freeze in place of course but at the same time your body becomes very active Your brain knows you re in danger and thus it causes certain neurons in the brain to fire and release neurotransmitters These neurotransmitters include the likes of dopamine cortisol and norepinephrine Meanwhile the sympathetic nervous system responds to these cues and begins producing more chemicals of its own Specifically a part called the adrenal medulla will secrete adrenaline and noradrenaline and this will result in numerous physiological changes in your body your heartrate increases your muscles contract and your mind races
