Target Spelling 78:

33 Ways to Help with Spelling Heather Morris, Sue Smith, 2010-09-13 33 Ways to Help with Spelling equips teachers and teaching assistants with a wide range of practical resources to help children who are having difficulties learning the basic skills of spelling. Offering a range of activities and games to engage children and encourage motivation in the classroom, this essential classroom companion provides ready to use material that doesn't need lengthy forward preparation. Activities include auditory and visual mnemonics, phonetics and tactile tasks. These practical and fun ideas incorporate a variety of learning styles using kinaesthetic and auditory techniques that put the emphasis on games rather than work. The activities are especially suitable for teaching assistants working with individuals or small groups. The book works step by step through practical activities which keep children motivated and enjoying learning; don't require extensive knowledge or experience from the adult; are adult led so children don't have the opportunity to repeat mistakes; are grouped into different basic skills so teachers can choose the activity best suited for the child's needs; have clear, concise and pedagogically sound reasons for the activity; include extension activity where appropriate to challenge pupils. Aimed mainly at primary pupils, secondary teachers will also find this book invaluable to use with pupils who are falling behind. The series facilitates good inclusive provision and is a resource from which useful ideas and materials can be taken without having to plough through chapters of theory and research. Developmental Orthography Philip A. Luelsdorff, 1991-09-13 Philip Luelsdorff's highly original approach to the grammar of orthography is to analyse in detail how German pupils learn about written English In this collection of essays and experiments we are presented with the rich finds of a decade of programmatic research The context is set with an exposition of current cognitive models of reading and spelling Cognitive psychology and psycholinguistics meet in Luelsdorff's concept of linguistic error This concept forms the basis from which it is possible to derive the grammar that governs our largely unconscious and vast knowledge of written words It is proper to talk about a grammar for both orthographic and syntactic aspects of language This is because spelling knowledge is not piecemeal or erratic but bears all the hallmarks of a system Through second language orthography the author is showing us a new view of this advanced stage of spelling knowledge and its acquisition This view is exciting because it seems now possible to form very detailed hypotheses as regards first language spelling about the order in which purely orthographic knowledge is developed

Acquired Dyslexia and Dysgraphia Across Scripts B. S. Weekes, 2006 Describes communication disorders in patients who speak Cantonese French German Hebrew Mandarin Spanish and Turkish This book focuses on the disorders of reading and writing given cognitive neuropsychological models are concerned with how the relationship between orthography phonology and meaning impacts on acquired dyslexia and dysgraphia
