Tarot And Individualism:

Rethinking the Individualism-Holism Debate Julie Zahle, Finn Collin, 2014-06-05 This collection of papers investigates the most recent debates about individualism and holism in the philosophy of social science The debates revolve mainly around two issues firstly whether social phenomena exist sui generis and how they relate to individuals This is the focus of discussions between ontological individualists and ontological holists Secondly to what extent social scientific explanations may and should focus on individuals and social phenomena respectively This issue is debated amongst methodological holists and methodological individualists In social science and philosophy both issues have been intensively discussed and new versions of the dispute have appeared just as new arguments have been advanced At present the individualism holism debate is extremely lively and this book reflects the major positions and perspectives within the debate This volume is also relevant to debates about two closely related issues in social science the micro macro debate and the agency structure debate This book presents contributions from key figures in both social science and philosophy in the first such collection on this topic to be published since the 1970s Routledge Library Editions: Occultism Various, 2022-07-30 The volumes in this set originally published between 1978 and 1992 draw together research by leading academics in the area of the occult and provide a rigorous examination of related key issues The collection examines occultism from a broad range of disciplines from shamanism and the occult tarot to the esoteric and spiritualism It includes volumes across the disciplines of religion covering new religious movements spiritualism ritual and magic practices The three books that comprise this set include investigations into the evolution of occultism as well as the history and practices of the occult as a religious movement This collection brings back into print insightful and detailed books and will be a must have resource for academics and students not only of religion and anthropology but also of history and psychology *The Witch Studies Reader* Soma Chaudhuri, Jane Ward, 2025-02-21 Stories about witches are by their nature stories about the most basic and profound of human experiences healing sex violence tragedies aging death and encountering the mystery and magic of the unknown It is no surprise then that witches loom large in our cultural imaginations In academia studies of witches rarely emerge from scholars who are themselves witches and or embedded in communities of witchcraft practitioners The Witch Studies Reader brings together a diverse group of scholars practitioners and scholar practitioners who examine witchcraft from a critical decolonial feminist perspective that decenters Europe and departs from exoticizing and pathologizing writing on witchcraft in the global South The authors show how witches are keepers of suppressed knowledges builders of new futures exemplars of praxis and theorists in their own right Throughout they account for the vastly different national political economic and cultural contexts in which the witch is currently being claimed and repudiated Offering a pathbreaking transnational feminist examination of witches and witchcraft that upends white supremacist colonial patriarchal knowledge regimes this volume brings into being the interdisciplinary field of feminist witch studies Contributors Maria Amir Ruth Asiimwe Bernadette Barton Ethel Brooks

Radical Secularization? Stijn Latré, Walter Van Herck, Guido Vanheeswijck, 2016-06-30 What does it mean for a society to be secular Answering this question from a philosophical angle Radical Secularization delves into the philosophical presuppositions of secularization Which cultural evolutions made secularization possible International scholars from different disciplines assess the answers given by many leading philosophers such as among others L with Blumenberg and Habermas Germany Gauchet and Nancy France Taylor and Bellah North America They examine the theory that secularization cannot only be regarded as a cultural change that was forced upon religion from an external source e g science but should also be considered as a phenomenon triggered by motives internal to religion If religions are indeed capable of inner transformations the question arises whether religions can persist in the secular societies they inadvertently helped to bring about and how secular societies may accommodate religion

Green,2025-09-23 An incisive study of the Western world s shift from institutional religion to more personal beliefs in the second half of the 19th century This is intellectual history at its most comprehensive and convincing Publishers Weekly starred review The late nineteenth century was an age of grand ideas and great expectations fueled by rapid scientific and technological innovation In Europe the ancient authority of church and crown was overthrown for the volatile gambles of democracy and the capitalist market If it was an age that claimed to liberate women slaves and serfs it also harnessed children to its factories and subjected entire peoples to its empires Amid this tumult another sea change was underway the religious revolution In The Religious Revolution Dominic Green charts this profound cultural and political shift taking us on a whirlwind journey through the lives and ideas of Ralph Waldo Emerson and Walt Whitman of L iphas L vi and Helena Blavatsky of Wagner and Nietzsche of Marx Darwin and Gandhi Challenged by the industrialization globalization and political unrest of their times these figures found themselves connecting with the religious impulse in surprising new ways inspiring others to move away from the strictures of religion and toward the thrill and intimacy of spirituality The modern era is often characterized as a time of increasing secularism but in this trenchant new work Green demonstrates how the foundations of modern society were laid as much by spirituality as by science or reason The Religious Revolution is a narrative tour de force that sweeps across several continents and five of the most turbulent and formative decades in history Threading together seemingly disparate intellectual trajectories Green illuminates how philosophers grifters artists scientists and yogis shared in a global cultural moment borrowing one another s beliefs and making the world we know today **Out of Darkness into**
