Social History Of Science And Technology In Contemporary Japan Vol 2 19521959:

Hiroshima M. G. Sheftall, 2024-09-10 One of Washington Post's 50 Notable Works of Nonfiction From 2024 The first volume in a two book series about each of the atomic bomb drops that ended the Pacific War based on years of irreplicable personal interviews with survivors to tell a story of devastation and resilience In this vividly rendered historical narrative M G Sheftall layers the stories of hibakusha the Japanese word for atomic bomb survivors in harrowing detail to give a minute by minute report of August 6 1945 in the leadup and aftermath of the world changing bombing mission of Paul Tibbets Enola Gay and Little Boy These survivors and witnesses who now have an average age over ninety years old are quite literally the last people who can still provide us with reliable and detailed testimony about life in their cities before the bombings tell us what they experienced on the day those cities were obliterated and give us some appreciation of what it has entailed to live with those memories and scars during the subsequent seventy plus years Sheftall has spent years personally interviewing survivors who lived well into the twenty first century allowing him to construct portraits of what Hiroshima was like before the bomb and how catastrophically its citizens lives changed in the seconds minutes days weeks months and years afterward He stands out among historians due to his fluency in spoken and written Japanese and his longtime immersion in Japanese society that has allowed him a white American the unheard of access to these atomic bomb survivors in the waning years of their lives Their trust in him is evident in the personal and traumatic depths they open up for him as he records their stories *Hiroshima* should be required reading for the modern age The personal accounts it contains will serve as cautionary tales about the horror and insanity of nuclear warfare reminding them it is hoped that the world still lives with this danger at our doorstep

The Arts of the Microbial World Victoria Lee, 2021-12-01 The first in depth study of Japanese fermentation science in the twentieth century *The Arts of the Microbial World* explores the significance of fermentation phenomena both as life processes and as technologies in Japanese scientific culture Victoria Lee's careful study documents how Japanese scientists and skilled workers sought to use the microbe's natural processes to create new products from soy sauce mold starters to MSG vitamins to statins In traditional brewing houses as well as in the food fine chemical and pharmaceutical industries across Japan they showcased their ability to deal with the enormous sensitivity and variety of the microbial world Charting developments in fermentation science from the turn of the twentieth century when Japan was an industrializing country on the periphery of the world economy to 1980 when it had emerged as a global technological and economic power Lee highlights the role of indigenous techniques in modern science as it took shape in Japan In doing so she reveals how knowledge of microbes lay at the heart of some of Japan's most prominent technological breakthroughs in the global economy At a moment when twenty first century developments in the fields of antibiotic resistance the microbiome and green chemistry suggest that the traditional eradication based approach to the microbial world is unsustainable twentieth century Japanese microbiology provides a new broader vantage for understanding and managing microbial interactions with society

A Social History of Science and Technology in Contemporary Japan: Road to self-reliance, 1952-1959 Shigeru Nakayama, Kunio Gotō, Hitoshi Yoshioka, 2001 This title is the second volume of a comprehensive four volume survey which documents the miraculous growth of Japanese science and technology from postwar devastation to its attaining a leading global status The team of more than fifty Japanese experts labored for ten years in assembling the unique materials into a monumental work of careful scholarship The study won the prestigious Mainichi Publications Award in 1997 **The Vortex** Frank Uekötter, 2024-04-18 Environmental challenges are defining the twenty first century To fully understand ongoing debates about our current crises climate change loss of biological diversity pollution extinction resource woes means revisiting their origins in all their complexity With this ambitious highly original contribution to the environmental history of global modernity Frank Uekötter considers the many ways humans have had an impact on their physical environment throughout history Ours is not a one way trajectory to sudden collapse he argues but rather death by a thousand cuts The many paths we've forged to arrive in our current predicament from agriculture to industry to infrastructure must be considered collectively if we are to stay afloat in what Uekötter describes as a vortex a powerful metaphor for the flow of history capturing the momentum and the many crosscurrents that swept people and environments along His book invites us to look at environmental challenges from multiple perspectives including all the twists and turns that have helped to create the mess we find ourselves in Uekötter has written a world history for an age where things are falling apart where we know what lies ahead and are equipped with the right tools technological and otherwise and plenty of experience to deal with environmental challenges but somehow fail to get our affairs in order *Visualizing Nuclear Power in Japan* Morris Low, 2020-05-28 This book explores how Japanese views of nuclear power were influenced not only by Hiroshima and Nagasaki but by government business and media efforts to actively promote how it was a safe and integral part of Japan's future The idea of atoms for peace and the importance of US Japan relations were emphasized in exhibitions and in films Despite the emergence of an anti nuclear movement the dream of civilian nuclear power and the good atom nevertheless prevailed and became more accepted By the late 1950s a school trip to see a reactor was becoming a reality for young Japanese and major events such as the 1964 Tokyo Olympics and 1970 Osaka Expo seemed to reinforce the narrative that the Japanese people were destined for a future led by science and technology that was powered by the atom a dream that was left in disarray after the Fukushima nuclear disaster in 2011 **Constructing East Asia** Aaron Stephen Moore, 2013-06-19 The conventional understanding of Japanese wartime ideology has for years been summed up by just a few words anti modern spiritualist and irrational Yet such a cut and dried picture is not at all reflective of the principles that guided national policy from 1931 1945 Challenging the status quo *Constructing East Asia* examines how Japanese intellectuals bureaucrats and engineers used technology as a system of power and mobilization what historian Aaron Moore terms a technological imaginary to rally people in Japan and its expanding empire By analyzing how these different actors defined technology in

public discourse national policies and large scale infrastructure projects Moore reveals wartime elites as far more calculated in thought and action than previous scholarship allows Moreover Moore positions the wartime origins of technology deployment as an essential part of the country's national policy and identity upending another predominant narrative namely that technology did not play a modernizing role in Japan until the economic miracle of the postwar years

Aerial Archives of Race Etsuko Taketani, 2026-01-06 Opening new archives and narratives that emerge when we take an aerial turn in transpacific studies Etsuko Taketani examines the genealogy and contours of the aerial imaginary and the corollary shifting planetary imaginary that evolved in a transnational space she terms the black nuclear Pacific Following the first aerial drop of an atom bomb on humans and the subsequent military occupation of Japan by the United States African American Japanese encounters happened on a scale unimaginable before the war Through texts from a diverse range of artists writers and political thinkers such as the NAACP's Walter White lawyer Edith Sampson Josephine Baker Langston Hughes Lorraine Hansberry and Malcolm X who had formative interactions with occupied Japan Taketani uncovers and analyzes African American cultural expressions that include a quasi alien abduction narrative a creation of a new tribe in the image of a rainbow on Earth a black futuristic apocalypse and a racial fantasy of the Mother Plane Through these cultural expressions *Aerial Archives of Race* tracks the black networks and exchanges with Japan from above that provoked new ways of thinking about human races on planet Earth Provided by publisher

Forthcoming Books Rose Army, 2003 [Nuclear Tsunami](#) Richard Krooth, Morris Edelson, Hiroshi Fukurai, 2015-02-10 This book begins with the analysis of America's post war intelligence operations propaganda campaigns and strategic psychological warfare in Japan Banking on nuclear safety myths Japan promoted an aggressive policy of locating and building nuclear power plants in depopulated areas suffering from a significant decline of local industries and economies The Fukushima nuclear disaster substantiated that U S propaganda programs left a long lasting legacy in Japan and beyond and created the fertile ground for the future nuclear disaster The book reveals Japan's tripartite organization of the dominating state media monopoly and nuclear plant oligarchy advancing nuclear proliferation It details America's unprecedented pro nuclear propaganda campaigns Japan's secret ambitions to develop its own nuclear bombs U S dumping of reprocessed plutonium on Japan and the joint U S Nippon propaganda campaigns for safe nuclear power and the current safe nuclear particles myths The study shows how the bankruptcy of the central state has led to increased burdens on the population in post nuclear tsunami era and the ensuing dangerous ionization of the population now reaching into the future
