**Social Interaction in Animals: Linking Experimental Approach and Social Network Analysis**  
Cédric Sueur, Frédéric Mery, 2017-03-14 Understanding the link between individual behaviour and population organization and functioning has long been central to ecology and evolutionary biology Behaviour is a response to intrinsic and extrinsic factors including individual state ecological factors or social interactions Within a group each individual can be seen as part of a network of social interactions varying in strength type and dynamic The structure of this network can deeply impact the ecology and evolution of individuals populations and species Within a group social interactions can take many forms and may significantly affect an individual s fitness These interactions may result in complex systems at the group level such as in the case of collective decisions to migrate to build nest or to forage Among them social transmission of information has been studied mostly in vertebrates fish birds and mammals including humans In insects social learning has been unambiguously demonstrated in social Hymenoptera but this probably reflects limited research effort and recent evidence show that even non eusocial insects such as *Drosophila* cockroaches and crickets can copy the behaviour of others Compared to individual learning which requires a trial and error period every generation social learning can potentially result in the stable transmission of behaviours across generations

leading to cultural traditions in some species The study of the processes which may facilitate or prevent this transmission and the analyses of the relationship between social network structure and efficiency of social transmission became these recent years an emerging and promising field of research The goal of this research topic is to present the genetic and socio environmental factors affecting social interaction and information or pathogen transmission with the integration of experimental approaches social network analyses and modelling Importantly we aim to understand whether a relationship between social network structures and dynamics can reflect the efficiency of social transmission i e can we use social network analysis to predict the social transmission of information or of pathogen collective decision making and ultimately the evolutionary trajectory of a group

Discourse as Social Interaction Teun Adrianus van Dijk,1997-02-01 How do people engage in and competently manage discourse and interaction with others Whether in informal everyday conversations or professional dialogues people do things while they are speaking or writing Focusing on the fundamental interactional social political and cultural functions of text and talk this comprehensive volume shows that discourse is not merely form and meaning but also action This social dimension of discourse is further highlighted by examining the role of social identity and group membership such as those based on gender race and ethnicity How do members of various groups typically speak among each other and how do they communicate with people of other groups or cultures What is the role of discourse in the perpetuation of sexism or racism Several chapters use critical discourse analysis to examine the reproduction of social power dominance and inequality and special attention is paid to political and corporate discourse Other contributions show that the complex interplay of the forms meanings and actions of discourse both shape and are shaped by culture

**How Do Businesses and Generations Maintain Its Legacy?** Krakrafaa Thompson Tenent Bestman,2018-02-23 Employees exit an organization with 80% of the knowledge they have acquired without transferring it to others This colossal loss of intellectual assets is even more in terms of parent to child legacy transfer Several factors may have contributed to this immense generational memory loss First the knowledge seekers do not know what to do on how to influence the knowledge sources to share their skills and experiences and may not even understand the characteristics of the knowledge they intend to access from the knowledge sources Second these intellectual assets such as skills and experiences they intend to access

give the knowledge sources their comparative advantage in the society and worst still they are not on the pages of procedures or other documented format but mainly domicile in the heads of the possessors and hence not visible to others Third people also regard their skills and experiences as invaluable intellectual assets and hence do not want to easily share it with others These are some of the constraints knowledge seekers face whether in an organization or the society while trying to access the information they require in creating value in their respective domains Eventually the legacies transferred to the knowledge seekers fall short of what would have been transferred if the knowledge seeker knows otherwise This book bridges this gap by providing a strategic and systematic approach on how a knowledge seeker may apply social interaction variables and its hierarchical effect on knowledge transfer to influence a knowledge source to share his or her intellectual assets that he or she might not ordinarily be willing to share with any knowledge seeker

*Social Inequality & The Politics of Representation* Celine-Marie Pascale, 2013 This anthology critically analyzes how cultures around the world make social categories of race class gender and sexuality meaningful in particular ways The collection uses a wide range of readings to examine how contemporary issues of race class gender and sexuality are constructed mobilized and transformed Unlike many books in this area the U S is not analytical center

**The Management of Procedure-Induced Anxiety in Children** Richard Martin, 2021-05-27 Procedure induced anxiety affects the majority of children undergoing medical intervention and has been directly linked to behaviour disturbances psychological trauma phobias and symptoms of PTSD Despite this there is currently no formal training relating to the management of procedure induced anxiety for medical personnel caring for children A distillation of more than eighty years of research this textbook examines the nature prevalence and consequences of anxiety in children alongside evidence based strategies for its effective management Designed as a training manual it includes a comprehensive account of positive and negative aspects of behaviour that contribute to the successful management of anxious children Chapters cover topics such as non verbal and verbal communication enhanced communication management strategies support of children with autistic spectrum disorder ADHD learning difficulties the use of premedication and the role that families play Essential reading for anaesthetists and paediatricians and a valuable resource for any practitioner working with children

*The Social Psychology of Childhood Disability* David Thomas, 2015-06-19 Some years ago I read the phrase the spontaneous revulsion to the deformed The phrase seemed to be both potent and provocative Was there a spontaneous revulsion to disabilities in children or did such conditions evoke a more compassionate response Originally published in 1978 the problems of the disabled were no longer confined to the medical and educational professionals but had become the concern of the community as a whole Using terminology very much of the time the author shows how attitudes towards different kinds of disability had developed at the time they varied both regionally and by social class sometimes calling into question the accepted facts about the distribution of a particular condition Most importantly the author examines these attitudes together with many other social and psychological factors in

relation to their impact on the social behaviour and developing self image of the disabled child It becomes clear that the dangers of categorization and the difficulties in overcoming stigma have a profound influence on the education and socialization of disabled children This book will be of historical interest to students and teachers of psychology education social work and rehabilitation and it will provide insight for parents and all those concerned with the care and development of the disabled child about how far we have come
