Social Organization A Study Of The Larger Mind By Cooley Charles Horton:

Social Organization Charles Horton Cooley, 1909 Social organization; a study of the larger mind, by Charles Horton Cooley Charles Horton Cooley, 1915 **Social Organization; a Study of the Larger Mind** Charles Horton Cooley, 1909

Social Organization Charles Horton Cooley, 1915 Social Organization Charles Horton Cooley, 2017-09-29 This classic text has set a standard for American sociology. Cooley provides analysis without empiricism applying psychological insight to his study of the individual and collective self. First published in 1909, this work attempts to motivate man and society to be more responsible to each other. The style of his book is clear and attractive, the text abounding in happy quotation. *Annals of the American Academy of Political and Social Science* **The Stars Are Not Enough** Joseph C. Hermanowicz, 1998-10-15 Based on sixty interviews with physicists at universities across the United States, *The Stars Are Not Enough* offers a detailed and intimate account of the worlds in which scientists work. Joseph C. Hermanowicz looks at a range of scientists from young graduate students to older professionals well into their careers. The result is a colorful portrait of a profession and its diverse cast of characters. These deeply personal narratives reveal dreams of fame and glory in which scientists confess their ambitions of becoming the next Newton or Einstein. However, these scientists also discuss the meaning of success and failure. We hear their stories of aspiration and anxiety, disappointment and tragedy, hope and achievement; we are privy to their doubts and to what they consider to be their limitations and weaknesses. As the scientists age in their professions, the specter of failure often visits them, and they have to accept something less than scientific immortality or even the Nobel Prize. Ultimately, these stories give us more than an inside look at the details of careers in science; they also examine ambition by uncovering the forces that drive people in their professions and by describing how these forces persist or fade over time. Ambition for greatness often ignites a career and often sustains it. Yet, as Hermanowicz's study reveals, greatness eludes nearly all people in their heroic quests for extraordinary achievement. *The Stars Are Not Enough* offers a fascinating account that will appeal to anyone interested in how people's dreams blossom and evolve.

Being Scioto Hopewell: Ritual Drama and Personhood in Cross-Cultural Perspective Christopher Carr, 2022-01-05 This book, in two volumes, breathes fresh air empirically, methodologically, and theoretically into understanding the rich ceremonial lives, the philosophical, religious knowledge, and the impressive material feats and labor organization that distinguish Hopewell Indians of central Ohio and neighboring regions during the first centuries CE. The first volume defines cross-culturally for the first time the ritual drama as a genre of social performance. It reconstructs and compares parts of 14 such dramas that Hopewellian and other Woodland period peoples performed in their ceremonial centers to help the soul-like essences of their deceased make the journey to an afterlife. The second volume builds and critiques ten formal cross-cultural models of personhood and the self and infers the nature of Scioto Hopewell people's ontology. Two facets of their ontology are found to have been instrumental in their creating the intercommunity alliances and

cooperation and gathering the labor required to construct their huge multicommunity ceremonial centers a relational collective concept of the self defined by the ethical quality of the relationships one has with other beings and a concept of multiple soul like essences that compose a human being and can be harnessed strategically to create familial like ethical bonds of cooperation among individuals and communities The archaeological reconstructions of Hopewellian ritual dramas and concepts of personhood and the self and of Hopewell people s strategic uses of these are informed by three large surveys of historic Woodland and Plains Indians narratives ideas and rites about journeys to afterlives the creatures who inhabit the cosmos and the nature and functions of soul like essences coupled with rich contextual archaeological and bioarchaeological taphonomic analyses The bioarchaeological taphonomic method of l anthropologie de terrain new to North American archaeology is introduced and applied In all the research in this book vitalizes a vision of an anthropology committed to native logic and motivation and skeptical of the imposition of Western world views and categories onto native peoples

Social Networks of Meaning and Communication Jan Fuhse,2021-11-05 Network research in the social sciences has successfully followed a structuralist approach where social phenomena are studied with regard to the

pattern of relations between actors These patterns of relations social networks are seen as the decisive level of social structures Other features like formal roles cultural norms and values are treated as secondary As such the field of social network research is currently divided between technically sophisticated analyses and complex elusive theorizing In *Social Networks of Meaning and Communication* Jan Fuhse offers a coherent theory of social structures as networks of relations interwoven with meaning Drawing upon and extending the cutting edge work in relational sociology of Harrison White and Charles Tilly Fuhse takes an important step forward in establishing a theory of social networks Using a broad range of classic and contemporary social theory he reconceptualizes social networks as constituted in patterns of expectations that form reproduce and change over the course of communicative events These events he argues are the basic stuff of the social world They lead to expectations about the behavior of actors their identities and their interaction with others social relationships the meaning structure making for observable regularities of communication in social networks Laying out this relational and constructivist perspective of social networks the book highlights a number of implications for social relationships groups and collective actors as well as ethnic categories and cultural differences roles and institutions gender and family relations and methods of social network analysis Its framework effectively bridges the gap in social network research between technically sophisticated analyses and complex elusive theorizing

Between the end of the nineteenth century and the beginning of the twentieth Americans underwent a dramatic transformation in self conception having formerly lived as individuals or members of small communities they now found themselves living in networks which arose out of scientific and technological innovations There were transportation and communication networks There was the network of the globalized marketplace which brought into the American home exotic goods previously affordable to only a few There was the network of standard time which bound together all but the most rural Americans There was the public health movement which joined individuals to their fellow citizens by making everyone responsible for the health of everyone else There were social networks that joined individuals to their fellows at the municipal state national and global levels Previous histories of this era focus on alienation and dislocation that new technologies caused This book shows that American individuals in this era were more connected to their fellow citizens than
