Zinn, 2019-10-03 This book outlines and systematises findings from a growing body of research that examines the different rationales, dimensions and dynamics of risk taking in current societies, providing insight into the different motivations and social roots of risk taking to advance scholarly debates and improve social regulation. Conceptually the book goes beyond common approaches which problematise socially undesirable risk taking or highlight the alluring character of risk taking. Instead it follows a broadly interpretivist approach and engages in examining motives, control, routinisation, reflexivity, skills, resources, the role of identity in risk taking and how these are rooted in and framed by different social forces. Zinn draws on qualitative studies from different theoretical and conceptual backgrounds such as phenomenology, hermeneutics, pragmatism, feminism, class analysis, theory of practice and discourse analysis among others to outline key distinctions and concepts central to the understanding of risk taking. It will be a key resource for everyone who is concerned with the understanding and management of risk taking in all kinds of social domains such as immigration, youth, leisure, sports, crime, health, finance and social policy. **New Risks, New Welfare** Peter Taylor-Gooby, 2004-11-11 This book introduces the concept of new

social risks in welfare state studies and explains their relevance to the comparative understanding of social policy in Europe. New social risks arise from shifts in the balance of work and family life as a direct result of the declining importance of the male breadwinner family, changes in the labour market and the impact of globalization on national policy making. They differ from the old social risks of the standard industrial life course which were concerned primarily with interruptions to income from sickness, unemployment, retirement and similar issues. New social risks pose new challenges for the welfare policies of European countries such as the care of children and the elderly, more equal opportunities, the activation of labour markets and the management of needs that arise from welfare state reform and new opportunities for the coordination of policies at the EU level. The book includes detailed and up to date case studies of policy development across these areas in the major European countries. These studies, written by leading experts, are organized in a comparative framework which is followed throughout the book. They highlight the way in which national welfare state regimes and institutional arrangements shape policy making to meet new social risks. A major feature of this volume is the analysis of developments at the EU level and their interaction with national policies. The EU has been largely unsuccessful in its interventions in old social risk policy but appears to have more success in its attempts to coordinate policy for new social risks. Experience here may provide lessons for future developments in EU policy making. The comparative framework of the book seeks to inform an understanding of

the development of new social risks in Europe and of the particular political opportunities and challenges that result It provides an original analysis of pressing issues at the forefront of European welfare policy debate and locates it at the heart of current theoretical debates *Main Findings from the 2020 Risks that Matter Survey* OECD,2021-07-12 The COVID 19 pandemic has spurred perhaps the largest expansion of social protection systems in seventy years Yet many people are still deeply affected by the crisis and are calling for even more help Drawing on 25 000 responses across 25 OECD countries the 2020 Risks that Matter survey finds that people are worried about keeping their jobs paying the bills and staying healthy
