*2001 Annual Review of Development Effectiveness* William Battaille, 2002-01-01 This is the fifth annual review which explores long term development effectiveness trends and analyses the choice of lending and non lending instruments and activities to achieve World Bank development objectives The 2001 review confirms a significant improvement in the outcomes of the Banks lending performance It finds that selecting the right combination and sequence of activities for a particular objective can make the difference between success and failure whether at individual project level for country assistance programmes or for global sectoral and thematic priorities At each level there is unexploited potential to maximise strategic selectivity and this is especially important in countries with a poor policy framework or acute institutional development needs

**Partnership for Poverty Reduction** Catherine Gwin, 2002-01-01 During its 40 year history the International Development Association IDA has worked to improve global welfare by allocating resources to growth and poverty reduction programs In

1990 a new framework for IDA's poverty reduction efforts was created which resulted in significant structural change to its programs. The focus of the programs became one of labor intensive growth and expanded access to social services and safety nets to improve incomes levels among the poor. Additionally the IDA agenda was expanded to include gender, the environment and governance as facets of the poverty reduction framework. This report evaluates IDA's performance from 1994 through 2000 against the three specific replenishment commitments of the period. While finding the performance level only partially satisfactory, the review suggests ways to improve the effectiveness of IDA programs, replenishment process and its ability to match corporate and country priorities. **Reform and the Development of Pension Systems** Emily S. Andrews, 2006. Formal pension systems are an important means of reducing poverty among the aged. In recent years, however, pension reform has become a pressing matter as demographic aging, poor administration, early retirement and unaffordable benefits have strained pension balances and overall public finances. Pension systems have become a source of macroeconomic instability, a constraint to economic growth and an ineffective and/or inequitable provider of retirement income.
