

SOCIAL IDENTITY THEORY

Social Identity theory explains how people develop their identities. Its main argument is that people develop their identity through interaction with society.

KEY CONCEPTS

Tajfel and Turner proposed that an individual's identity, or sense of the self is influenced both through:

1. **Interpersonal Interaction** – One-to-one interactions with other individuals
2. **Intergroup Interaction** – Identification with a large grouping of people, and the interaction of their grouping in turn with other groups.

EXAMPLES

We can see examples of social identity theory in nationalism, religion, race and ethnicity, and fraternities and sororities.

By studying these social groups, we can see how people use in-groups and out-groups to develop their social identities.

Social Theory And The Politics Of Identity:

Social Theory and the Politics of Identity Craig J. Calhoun, 1996 Social Theory and the Politics of Identity, 1998

The Politics of Identity in Australia Geoff Stokes, 1997-06-30 Issues of identity are central to many historical and current debates in Australia This superb collection of essays represents a significant rethinking of received ideas on identity and reveals how issues of identity lie at the heart of Australian political thought and form the foundation of Australian society and culture It provides a comprehensive introduction to the political discourse surrounding Australian identity through key themes including identity theory the manipulation of identity for political ends gender and sexuality immigration and national identity citizenship and Aboriginality and literature and film The book rejects many of the assumptions underlying contemporary political debates including the promulgation of a singular national identity in historical fact or as a political goal This is a thought provoking study of identity its links with nationalism and its potentially divisive effects Identity and Global Politics P. Goff, 2004-03-17 This collected volume draws together essays written by International Relations scholars from a variety of regional methodological and theoretical perspectives to confront the challenges of identity centered analysis In particular the contributors seek to elucidate the general meaning and methodological implications of the commonly state yet largely unexamined assertion that identities are relational fluid constructed and multiple Handbook of Sociological Theory Jonathan H. Turner, 2006-11-22 This wide ranging handbook presents in depth discussions on the array of subspecialties that comprise the field of sociological theory Prominent theorists working in a variety of traditions discuss methodologies and strategies the cultural turn in sociological theorizing interaction processes theorizing from the systemic and macro level new directions in evolutionary theorizing power conflict and change and theorizing from assumptions of rationality Citizenship and Identity Engin F Isin, Patricia K Wood, 1999-09-08 Through a detailed introductory discussion of the relation between the civil and the political and between recognition and representation this book provides a comprehensive vocabulary for understanding citizenship It uses the work of T H Marshall to frame the critical interrogation of how ethnic technological ecological cosmopolitan sexual and cultural rights relate to citizenship The authors show how the civil political and social meanings of citizenship have been redefined by postmodernization and globalization **Identity, Narrative and Politics** Maureen Whitebrook, 2014-04-04 Identity Narrative and Politics argues that political theory has barely begun to develop a notion of narrative identity instead the book explores the sophisticated ideas which emerge from novels as alternative expressions of political understanding This title uses a broad international selection of Twentieth Century English language works by writers such as Nadine Gordimer and Thomas Pynchon The book considers each novel as a source of political ideas in terms of content structure form and technique The book assumes no prior knowledge of the literature discussed and will be fascinating reading for students of literature politics and cultural studies **Handbook of Identity Theory and Research** Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22 Identity is one of the most

extensively studied constructs in the social sciences Yet despite the wealth of findings across many disciplines identity researchers remain divided over such enduring fundamental questions as What exactly is identity and how do identity processes function Do people have a single identity or multiple identities Is identity individually or collectively oriented Personally or socially constructed Stable or constantly in flux The Handbook of Identity Theory and Research offers the rare opportunity to address the questions and reconcile these seeming contradictions bringing unity and clarity to a diverse and fragmented literature This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches Contributing authors provide perspectives from psychology e g narrative social identity theory neo Eriksonian and from other disciplines e g sociology political science ethnic studies and the editors highlight the links between chapters that provide complementary insights on related subjects In addition to covering identity processes and categories that are well known to the field the Handbook tackles many emerging issues including Identity development among adopted persons Identity processes in interpersonal relationships Effects of globalization on cultural identity Transgender experience and identity Consumer identity and shopping behavior Social identity processes in xenophobia and genocide The Handbook of Identity Theory and Research lends itself to a wealth of uses by scholars clinicians and graduate students across many disciplines including social developmental and child school psychology human development and family studies sociology cultural anthropology gender ethnic and communication studies education and counseling

Hong Kong's New Identity Politics Iam-chong Ip, 2019-11-28 Ip uses Hong Kong as a case study in how the production of the desire for the local lies at the heart of global cultural economy Perhaps more so than most places the construction of a local identity in Hong Kong has come about through a complex interplay of neoliberalism postcoloniality and reaction to the consequent anxieties and uncertainties As its importance as an economic centre has diminished and its relationship with Mainland China has become more strained its people have become more concerned to define a Hong Kong identity that can be defended from external threat Ip analyses the working and reworking of power relations and modes of agency in this global city A must read for scholars of Hong Kong politics and society as well as a fascinating case study for scholars of identity politics as a global phenomenon

Identity Steph Lawler, 2014-01-14 Questions about who we are who we can be and who is like and unlike us underpin a vast range of contemporary social issues What makes our families so important to us What do the often stark differences between how we self identify and the way others see and define us reveal about our social world Why do we attach such significance to being ourselves In this new edition of her popular and inviting introduction Steph Lawler examines a range of important debates about identity Taking a sociological perspective she shows how identity is produced and embedded in social relationships and worked out in the practice of people s everyday lives She challenges the perception of identity as belonging within the person arguing instead that it is produced and negotiated between persons Chapter by chapter her book explores topics such as the relationships between lives and life stories the continuing significance of kinship in the face of social change and how taste works to define identity In particular the updated edition has a new chapter on identity politics as well as carefully compiled guides for further reading that reflect the broad importance and impact of these ideas and the fact that without understanding identity we can t adequately begin to understand the social world This book is essential reading for upper level courses across the social sciences that focus on the compelling issues surrounding identity
