Social Gerontology Text Only:

Social Gerontology Nancy R. Hooyman, H. Asuman Kiyak, 1998-07 Critical Approaches To Ageing And Later Life Jamieson, Anne, Harper, Sarah, Victor, Christina, 1997-08-01 How are individuals and society ageing towards the end of the twentieth century How can different disciplines help us to understand the ageing process What are the key developments in postmodern thought and critical studies in relation to ageing and later life In answer to these questions the editors of this volume have brought together some of the leading figures in the field Gathered together for the first time in a single volume the authors discuss the latest theoretical developments in the international field of ageing Drawing on research from the USA and UK the book is strongly multi disciplinary in content with chapters from both social sciences and humanities The book provides a critical approach to our understanding of the experience of ageing and later life It has been written for advanced students of gerontology and those with an interest in ageing and later life but it is also relevant to policy makers and practitioners in the field Key features First time work from the USA and UK has been available in one volume Wide coverage of the latest trends and theoretical approaches in gerontology Issues addressed from a range of disciplines unusual combination of humanities and social science in one volume Written by leading experts in the field **Human Aging and Chronic Disease** Cary Steven Kart, Seamus P. Metress, 1992 *The Production of Lateness* Rahel Rivera Godoy-Benesch, 2020-05-11 This study examines how selected authors of the late 20th and early 21st centuries write about their creative processes in old age and thus purposefully produce a late style of their own Late life creativity has not always been viewed favourably Prevalent peak and decline models suggest that artists as they grow old cease to produce high quality work Aiming to counter such ageist discourses the present study proposes a new ethics of reading literary texts by elderly authors For this purpose it develops a methodology that consolidates textual analysis with cultural gerontology

Integrating Gerontological Content Into Advanced Practice Nursing Education Carolyn Auerhahn, Dr. Laurie Kennedy-Malone, 2010-06-28 Print CourseSmart **Minority Aging**, 1990 This book is designed to help focus attention on and development a sensitivity to the need to include minority aging in the curricula for selected health and allied health professionals The conference papers covers the topics of aging culture ethnicity and the impact of race and ethnicity on aging *The Environments of Ageing* Sheila Peace, 2023-07-11 The first UK assessment of environmental gerontology this book contextualises personal experience of ageing considers the value of intergenerational and age related living and global to local population ageing concerns in light of COVID 19 Gerontological Nursing Kristen Mauk, 2010-10-25 Gerontological Nursing Competencies for Care Second Edition is a comprehensive and student accessible text that offers a holistic and interdisciplinary approach to caring for the elderly The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing AACN and the John A Hartford Foundation Institute for Geriatric Nursing Building upon their knowledge in prior medical surgical courses this text gives students the skills and theory needed to

provide outstanding care for the growing elderly population It is the first of its kind to have more than 40 contributing authors from many different disciplines Some of the key features include chapter outlines learning objectives discussion questions personal reflection boxes and case studies *Health and Cognition in Old Age* Anja K. Leist, Jenni Kulmala, Fredrica Nyqvist, 2014-07-14 In recent years the aim of research on aging has shifted from prolonging life to fostering healthy and cognitively robust old age In order to improve the quality of life of older people we need to better understand cognitive aging as well as bodily aging *Health and Cognition in Old Age* assembles the cream of research across varied medical mental health and social disciplines and demonstrates how this knowledge can lead to improved outcomes for older people The first half of this expert volume discusses biomedical and life course factors in aging particularly as they affect cognition and well being in later life From there effective solutions are the focus interventions and care programs to improve mental functioning and general quality of life and current policy and practice ideas in promoting healthy active and cognitively robust aging Together these diverse chapters offer a multi faceted approach to understanding and modifying what was formerly the inevitable course of growing old A sampling of the coverage How the aging process affects the immune system Occupational gerontology work related determinants of old age health and functioning Social behavioral and contextual influences on cognitive function and decline Lifestyle factors in the prevention of dementia Understanding long term care outcomes conventional and behavioral economics Social capital mental well being and loneliness in older people For gerontologists sociologists social workers health psychologists and others working to improve older people s lives *Health and Cognition in Old Age* brings expertise versatility and confidence to the table **Cinematic Representations of Alzheimer's Disease** Raquel Medina, 2018-08-09 This book offers a cross cultural approach to cinematic representations of Alzheimer s disease in non mainstream cinema Even though Alzheimer s disease the most common form of dementia is a global health issue it is not perceived or represented homogenously around the world Contrary to very well known mainstream films the films discussed do not focus on the negative aspects normally associated with Alzheimer s disease but on the importance of portraying the perspective of the persons living with Alzheimer s and their personhood Similarly this book analyses how the films use Alzheimer s as a trope to address issues relating to different areas of life and society such as for example family matters intergenerational relationships gender issues national traditions versus global modernity and caring for people with dementia By examining an array of films from crime fiction to documentary that each present non stigmatising representations of Alzheimer s disease this in depth study ultimately demonstrates the power of culture in shaping meaning *Handbook of Educational Ideas and Practices (Routledge Revivals)* Noel Entwistle, 2015-08-11 First published in 1990 the *Handbook of Educational Ideas and Practices* was written for practitioners and students in the field of education and its related services and was designed to appeal to educationists no matter what their nationality Focusing mainly on compulsory schooling it provides summaries of the thinking research findings and innovatory practices current at

the time However the book is also careful to present a complete picture of education and therefore includes a separate section for education beyond school which covers pre school level post secondary level and adult and continuing education There are also other chapters dealing with aspects of organization curriculum and teaching in various forms of tertiary education Indeed each topic has been discussed by an acknowledged expert writing in sufficient detail in order to resist trivialization Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging Geriatric Care Nursing Mr. Rohit

Changing Conceptions, Changing Practices Angela Glotfelter, Caitlin Martin, Mandy Olejnik, Ann Updike, Elizabeth Wardle, 2022-12-28 Changing Conceptions Changing Practices demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability Relating the experiences of faculty from disciplines as diverse as art history economics psychology and philosophy this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action The authors draw on the threshold concepts framework research in

writing studies and theories of learning leadership and change to deftly explore why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional development for faculty teams can help make such change possible This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected In today's climate courses programs and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning with grave consequences for students The stakes have never been higher particularly for public higher education Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students Professional developers have an important role to play in such change efforts WAC scholars and practitioners leaders of professional development and centers for teaching excellence program administrators and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in Changing Conceptions Changing Practices Contributors Juan Carlos Albarrán Jos Amador Annie Dell Aria Kate de Medeiros Keith Fennen Jordan A Fenton Carrie E Hall Elena Jackson Albarrán Erik N Jensen Vrinda Kalia Janice Kinghorn Jennifer Kinney Sheri Leafgren Elaine Maimon Elaine Miller Gaile Pohlhaus Jr Jennifer J Quinn Barbara J Rose Scott Sander Brian D Schultz Ling Shao L James Smart Pepper Stetler

Women Ageing Miriam Bernard, Val Harding Davies, Linda Machin, Judith Phillips, 2005-06-22 Women Ageing provides a better understanding of what ageing is like for women and challenges the myths which have grown up around the ageing process Blending the scholarly the personal and the political it reveals the range of strategies and identities women adopt to manage the transitions of the second half of the life course In doing so it uncovers not only the commonalities and the similarities between mid life and older women but also some of the variation and diversity relating to ethnicity and race class disability and sexual orientation Women Ageing makes the ordinary lives of ordinary women as in this instance they grow older more visible Its findings have important implications for policy and practice All those studying or working with older people will find it an illuminating text

Science, Technology and the Ageing Society Tiago Moreira, 2016-12-19 Ageing is widely recognised as one of the social and economic challenges in the contemporary globalised world for which scientific technological and medical solutions are continuously sought This book proposes that science and technology also played a crucial role in the creation and transformation of the ageing society itself Drawing on existing work on science technology and ageing in sociology anthropology history of science geography and social gerontology Science Technology and the Ageing Society explores the complex interweaving relationship between expertise scientific and technological standards and social normatively embedded age identities Through a series of case studies focusing on older people science and technology medical research about ageing and ageing related illnesses and the role of expertise in the management of ageing populations Moreira challenges the idea that aging is a problem for the individual and society Tracing the epistemic and technological infrastructures that underpin multiple ways of aging this

timely volume is a crucial tool for undergraduate and graduate students interested in social gerontology health and social care sociology of aging science and technology studies and medical sociology *Aging*, 1976 *Mental Health and the Elderly* Francis J. Turner, 2010-06-15 The demographic shift to a much older population is having a large impact on social work professionals who have traditionally been the primary caretakers of the elderly As more people are living into advanced old age it is becoming increasingly important to understand and treat the wide range of psychological disorders which may affect them rather than simply attributing the disorders to senescence as was frequently done in the past *Mental Health and the Elderly A Social Work Perspective* is a comprehensive guide to diagnosis and treatment of the range of disorders affecting the elderly

Ageing, meaning and social structure Baars, Jan, Dohmen, Joseph, Amanda Grenier, Chris Phillipson, 2013-04-30 Ageing meaning and social structure is a unique book advancing critical discourse in gerontology and makes a major contribution to understanding key social and ethical dilemmas facing ageing societies It confronts and integrates approaches that have been relatively isolated from each other and interrelates two major streams of thought within critical gerontology analyses of structural issues in the context of political economy and humanistic perspectives on issues of existential meaning The chapters from a wide range of contributors focus on major issues in ageing such as autonomy agency frailty lifestyle social isolation dementia and professional challenges in social work and participatory research This volume should be valuable reading for scholars and graduate students in gerontology and humanistic studies as well as for policy makers and practitioners working in the field of ageing

Selected Contemporary Challenges of Ageing Policy Łukasz Tomczyk, Andrzej Klimczuk, 2017-11-23 This volume *Selected Contemporary Challenges of Aging Policy* is the most international of all published monographs from the series *Czech Polish Slovak Studies in Andragogy and Social Gerontology* Among the scholars trying to grasp the nuances and trends of social policy there are diverse perspectives resulting not only from the extensive knowledge of the authors on the systematic approach to the issue of supporting older people but also from the grounds of the represented social gerontology schools In the texts of Volume VII interesting are both distinct and coherent elements presenting the role of local regional and global policies in the prism of the countries from which the authors originate the Czech Republic Slovenia Lithuania Latvia Poland Slovakia Italy Turkey and the United States The chapters show a wealth of methodological approaches to the perception of social policy and its tools In the texts there are issues related to the idea of active ageing discrimination against older people in the workplace comparability of solutions friendly to employment of older adults in the Czech Republic Poland and Slovakia as well as focused on the importance of educational forms universities of the third age senior clubs folk high schools and other non formal solutions determining an active life in old age This monograph also attempted to answer the question regarding how to transfer the idea of intergenerational learning into the realm of practice This issue complements the chapter on the implementation of intergenerational programs in institutions providing long term care support The book also outlines a public policy on ageing

in the perspective of the changes over the last few decades Slovenia and the case demonstrating solutions to accelerate self reliance as a key to active ageing Turkey We hope that seventh volume of our series will be an intellectual stimulus for further international research on change in social policy and will contribute to the dissemination of best practices as well as contribute to positive social change
