[Globalizing Issues](#) Erik Neveu, Muriel Surdez, 2020-09-07

This book is an invitation to question conventional and often misleading visions of globalization. No problem is global by nature; issues are transformed by the action of claims makers to become problems debated in supra-national forums, triggering policy choices and policy transformations. Contributions highlight how health issues, environmental issues, and/or political issues are framed as global by a set of stakeholders: scientific experts, bureaucrats, political parties, or actors, social movements, social networks, firms. As the volume maps the social logic behind the globalization of problems, it also presents an opportunity for the very cross-disciplinary collaboration it calls for: researchers mobilizing the agenda-setting paradigm of issue globalization and those working within the social constructionist model are both represented here.

providing a unique opportunity to examine the dynamics of globalization from the perspectives of political media economic sociology international relations social movement studies and beyond
