**The Political Economy of the European Social Model** Philip B. Whyman,Mark J. Baimbridge,Andrew Mullen,2012-05-31 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social

Europe in the face of this would appear problematic. Hence in both theory and practice the idea that there can be a social Europe vis-à-vis neoliberalisation is a contradiction in terms. This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics, the European Union, European Economics and Economic institutions.
