Social Science And Social Policy:

Dimensions of Impact in the Social Sciences Tina Haux, 2019-07-03 Impact has become a central part of the assessment criteria for academic worth. It has been adopted by many research funding bodies and it is firmly embedded in the British Research Excellence Framework. However, a clear definition of impact remains elusive and guidance on how exactly to achieve it is often superficial. This concise informative book analyses impact across the social sciences. It draws on the analysis of the most highly ranked British impact case studies from the 2014 Research Excellence Framework as well as fifteen interviews with senior academics providing a longitudinal and critical framing of impact. The author concludes with valuable recommendations of how and when scholars can achieve impact.

Social Science and Public Policy Martin Rein, 1976 Monograph on the need for critical evaluation of value systems underlying the relationship between social research and social policy discusses obstacles to the contribution of empirical research and social theory regarding policy formulation, equal opportunity in context with social stratification and social mobility etc and uses the health services field as an example of the problem.

Encyclopedia of Catholic Social Thought, Social Science, and Social Policy Michael L. Coulter, Richard S. Myers, Joseph A. Varacalli, 2012-04-05 The two original volumes of the Encyclopedia of Catholic Social Thought, Social Science and Social Policy were published in 2007. Those two volumes included 848 entries from nearly 300 contributors and included a wide range of entries in three general categories: entries exploring Catholic social thought at a theoretical level; entries reflecting the learning of various social science and humanistic disciplines as this learning relates to Catholic social thought; and entries examining specific social policy questions. This third supplemental volume continues the approach of the original two. First, the volume includes entries that explore Catholic social thought at its broadest, most theoretical level, for example, an entry on Pope Benedict's important social encyclical *Caritas in Veritate*. Second, the volume includes entries that discuss recent social science research that bears on issues important to Catholic social thought, for example, an entry on the social costs of pornography draws on recent research on the topic. Third, the volume includes entries discussing specific issues of social policy that have become increasingly important in recent years, for example, an entry on embryo adoption and or rescue. This third volume contains 202 entirely new entries from over 100 contributors. The contributors include distinguished scholars such as Father Robert John Araujo, S.J., Loyola University of Chicago; Father Kevin L. Flannery, S.J., Gregorian University; Robert P. George, Princeton University; William E. May, John Paul Institute and the Culture of Life Foundation; D.Q. McInerney, Our Lady of Guadalupe Seminary; and Michael Novak, Ave Maria University. The work will appeal to anyone who is looking for a clear and accurate introduction to Catholic social thought.

[Max Weber and the Methodology of the Social Sciences](#) Toby E. Huff, *Strategic Perspectives on Social Policy* John E. Tropman, Milan Dluhy, Roger Lind, 2013-09-17 *Strategic Perspectives on Social Policy* is a collection of readings that provide insights into social policy processes, analysis, and implication. The goal is to locate social policy within a context that suggests the

possibility of a wider array of choices for the policymakers The distinction between social policy and social program is given emphasis This book has 14 chapters divided into four sections The first section deals with the relation between politics and policy with emphasis on the link between social science and social policy as well as on the influence of social values on the direction of policy The next section illustrates some of the critical skills and technologies that may be used to facilitate the process of making choices and decisions Topics covered include policy research and analysis the development and structuring of policy policy purveyance and implementation and assessment and evaluation of policy The chapters that follow explore some of the more important contexts of the loci of social change along with the kinds of mechanisms that may be used to make choices operational This monograph is intended for policymakers and others interested in the policy making process as well as for students and teachers in the areas of political science sociology social work public policy and social planning

Social Policy Michael Lavalette, Alan Pratt, 2005-11-15 The Third Edition of this widely adopted textbook has been thoroughly revised and offers an authoritative and up to date coverage of the key theories concepts and issues in social policy The lively and readable text has been designed to provide students with the essential tools to gain a clear understanding of the theoretical debates surrounding the discipline The book is organized into three parts Part One offers a detailed but accessible critique of major theoretical approaches such as neo liberalism Marxism feminism and racism Part Two explores conceptual debates such as distributive justice and postmodernism Part Three engages with contemporary social policy issues such as children pensions and the role of New Labour It also features newly commissioned chapters to reflect recent developments and current debates within social policy New areas of consideration include Citizenship Post structuralism The politics of food Globalization Student exercises and reading lists feature throughout the text and practical examples are skilfully used to illustrate conceptual and theoretical material making it the ideal core textbook for undergraduate social policy students as well as those studying related welfare modules across the social sciences

Social Science and Social Policy Martin Bulmer, 1986-01-01

Critical Issues in Social Theory John K. Rhoads, 1991 Critical Issues in Social Theory is an analytical survey of persistent controversies that have shaped the field of sociology It defines clarifies and proposes solutions to these critical issues through commentary on the writings of such influential social theorists as Hobbes Marx Durkheim Weber Mead Merton Parsons and Schutz Instead of being just another history or another classification of theories Rhoads's four part model allows him to focus attention on issues that remain at the core of sociological theory today First Rhoads analyzes the controversy over positivism as the proper methodological model for the study of human society Is there one science of which sociology is a branch or do the peculiarities of sociology's subject matter require a modification of the scientific method borrowed from the natural sciences Rhoads next considers the relationship of individuals to society and its structures Does society have a mode of existence distinct from its members or is it merely an abstraction derived from the characteristics of individuals Third a discussion of social order raises the question

of whether social order is the consequence of rules and their underlying moral values or the product of continuous construction based on self interest Finally the relative importance of consensus and conflict in social relationships is addressed Is society better understood as a community united by beliefs values and rules or is the social dynamic of continual conflict over beliefs values and rules more fundamental In coming to grips with these issues the author in some instances takes sides and in others arrives at a synthesis of diverse perspectives In the final chapter he points to the limitations on the possibility of rational action that come to light in the clashes over these basic issues **Social Policy** Paul

Effective Social Science Bernard Barber, 1988-04-26 Does social science influence social policy This

is a topic of perennial concern among students of politics the economy and other social institutions In *Effective Social Science* eight prominent social researchers offer first hand descriptions of the impact of their work on government and corporate policy In their own words these noted political scientists economists and sociologists among them such influential scholars as James Coleman Joseph Pechman and Eliz Ginzberg tell us what it was like to become involved in the making of social policy These rich personal narratives derived from detailed interviews conducted by Bernard Barber himself a veteran of the biomedical poli arena illuminate the role of social science in diverse areas including school desegregation comprehensive income taxation military manpower utilization transportation deregulation and the protection of privacy The patterns traced in this volume indicate that social science can influence policy but only as part of a pluralistic political process effective social research requires advocacy as well as a conducive social and ideological climate For anyone curious about the relationship between social knowledge and social action this book provides striking illustration and fruitful analysis

People, Plans, and Policies Herbert J. Gans, 1993 The primary theme of this collection of essays is that the cities basic problems are poverty and racism and until these concerns are addressed by bringing about racial equality creating jobs and instituting other reforms the generally low quality of urban life will persist Gans argues that the individual must work to alter society He believes that not only must parents have jobs to improve their children s school performance but that the country needs a modernized New Deal a more labor intensive economy and a thirty two hour work week to achieve full employment Other controversial ideas presented in this book include Gans s opposition to the whole notion of an underclass which he feels is the latest way for the nonpoor to unjustly label the poor as undeserving He also believes that poverty continues to plague society because it is often useful to the nonpoor He is critical of architecture that aims above all to be aesthetic or to make philosophical statements is doubtful that planners can or should try to reform our social or personal lives and thinks we should concentrate on achieving individual public policies until we learn how to properly plan as a society
