Charlotte Perkins Gilman Charlotte Perkins Gilman, 1991 Charlotte Perkins Gilman 1860 1935 is best known as the author of the short story The Yellow Wallpaper and a utopian novel Herland This reader offers a representative sample of her nonfiction writing Presented chronologically it emphasizes her thoughts on gender evolution economics radical political movements and women's groups

Ruth Benedict Margaret M. Caffrey, 2013-11-04 Poet anthropologist feminist Ruth Fulton Benedict was all of these and much more Born into the last years of the Victorian era she came of age during the Progressive years and participated in inaugurating the modern era of American life Ruth Benedict Stranger in This Land provides an intellectual and cultural history of the first half of the twentieth century through the life of an important and remarkable woman As a Lyricist poet Ruth Benedict helped define

Modernism As an anthropologist she wrote the classic *Patterns of Culture* and at one point was considered the foremost anthropologist in the United States the first woman ever to attain such status She was an intellectual and an artist living in a time when women were not encouraged to be either In this fascinating study Margaret Caffrey attempts to place Benedict in the cultural matrix of her time and successfully shows the way in which Benedict was a product of and reacted to the era in which she lived Caffrey goes far beyond providing simple biographical material in this well written interdisciplinary study Based on exhaustive research including access for the first time to the papers of Margaret Mead Benedict s student and friend Caffrey is able to put Benedict s life clearly in perspective By identifying the family and educational influences that so sharply influenced Benedict s psychological makeup the author also closely analyzes the currents of thought that were strong when Victorianism paralleled the Modernism that figured in Benedict s life work The result is a richly detailed study of a gifted woman This important work will be of interest to students of Modernism poetry and women s studies as well as to anthropologists

Economists and Societies Marion Fourcade,2009-03-09 *Economists and Societies* is the first book to systematically compare the profession of economics in the United States Britain and France and to explain why economics far from being a uniform science differs in important ways among these three countries Drawing on in depth interviews with economists institutional analysis and a wealth of scholarly evidence Marion Fourcade traces the history of economics in each country from the late nineteenth century to the present demonstrating how each political cultural and institutional context gave rise to a distinct professional and disciplinary configuration She argues that because the substance of political life varied from country to country people s experience and understanding of the economy and their political and intellectual battles over it crystallized in different ways through scientific and mercantile professionalism in the United States public minded elitism in Britain and statist divisions in France Fourcade moves past old debates about the relationship between culture and institutions in the production of expert knowledge to show that scientific and practical claims over the economy in these three societies arose from different elites with different intellectual orientations institutional entanglements and social purposes Much more than a history of the economics profession *Economists and Societies* is a revealing exploration of American French and British society and culture as seen through the lens of their respective economic institutions and the distinctive character of their economic experts

On the History of Economic Thought A. W. Bob Coats,2005-08-08 Following an introduction to the key ideas of Coats this work focuses on two themes the difference between British and American economics both in content and in the practice of the profession and the interrelationships between economic ideas events or conditions and policy issues

Theories of Women's Studies Gloria Bowles,Renate Duelli Klein,2024-11-20 *Women s Studies* investigates the world from women centred perspectives which cross the boundaries of traditional academic disciplines Thus every issue every question is material for *Women s Studies* The worldwide development of *Women s Studies* during the 1970s and 1980s presented a radical challenge to the male centred bias which dominated knowledge making at

the time Originally published in 1983 in this book feminist scholars discuss the assumptions and aims of Women's Studies its connections with the women's movement its research its teaching and its emerging methodologies The contributors come from a range of disciplines the humanities the social and natural sciences and from international backgrounds primarily the USA and Britain Germany and Switzerland They are united in working to develop a trans disciplinary approach to the generation and distribution of knowledge and it is these new questions and their implications that demonstrate the exciting potential of a feminist education in women's international quest for social change

A Place Somewhat Apart Philip E. Harrold, 2006-10-01 The story of secularization and religious disestablishment in American higher education is told from the standpoint of a lively community of professors students and administrators at the University of Michigan in the late nineteenth century This campus culture one of the most closely watched of its day sheds new light on the personal and cultural meanings of these momentous changes in American intellectual and public life Here we see how religion was not so much displaced or marginalized in the heyday of university reform as translated into new arenas of public service and scholarly pursuit The main characters in this story professors Calvin Thomas and Henry Carter Adams underwent profound religious crises of faith accompanied by major adjustments in their interpersonal relationships Together with students and administrators their lives constituted a communal biography of religious deconversion A close examination of these private and public worlds provides a more complete understanding of the dynamics behind new academic policies and intellectual innovations in a leading public university The non cognitive intersubjective gendered quasi religious shadings of academic modernism and early pragmatist philosophy in particular come to light in vivid ways As John Dewey later observed Michigan became an experimental laboratory for new meanings to unfold new acts to propose

Against the Anthropological Grain Wilcomb E. Washburn, 1998 In *Against the Anthropological Grain* Washburn critically examines key anthropological beliefs especially in the importance of cultural relativism and Western colonialism's harmful effects on Third World cultures He turns the tables on theorists from the discipline He questions whether anthropology has a credible past whether anthropologists should even involve themselves in inter tribal conflicts whether museums should return sacred objects from their collections and whether museums provide adequate physical care of their collections

Engaging the Past Eric H. Monkkonen, 1994 Vigorous historical exploration has increased across the social sciences in the past two decades Originally published as a series of articles in the journal *Social Science History* the essays in this volume provide a guide to historical social science by surveying the use of historical data and methodologies in anthropology sociology political science economics and geography Each essay in *Engaging the Past* pays close attention to the unique problems and methods associated with its particular social scientific discipline By exploring questions raised by both contemporary and more established works within each field the authors show that some of the best and most innovative research in each of the social sciences includes a strong historical component Thus as Eric H Monkkonen's introduction shows these essays taken together

make it clear that historical research provides a significant key to many of the major issues in the social sciences Intended for the growing community of both social scientists and historians interested in reading or researching historically informed social science Engaging the Past suggests future directions that might be taken by this work Above all by providing a set of user s guides written by respected social scientists it encourages future boundary crossings between history and each of the social sciences Contributors Andrew Abbott Richard Dennis Susan Kellog Eric H Monkkonen David Brian Robertson Hugh Rockoff

Social Resilience in the Neoliberal Era Peter A. Hall, Michèle Lamont, 2013-04-22 What is the impact of three decades of neoliberal narratives and policies on communities and individual lives What are the sources of social resilience This book offers a sweeping assessment of the effects of neoliberalism the dominant feature of our times It analyzes the ideology in unusually wide ranging terms as a movement that not only opened markets but also introduced new logics into social life integrating macro level analyses of the ways in which neoliberal narratives made their way into international policy regimes with micro level analyses of the ways in which individuals responded to the challenges of the neoliberal era The product of ten years of collaboration among a distinguished group of scholars it integrates institutional and cultural analysis in new ways to understand neoliberalism as a syncretic social process and to explore the sources of social resilience across communities in the developed and developing worlds

A Hundred Years of Sociology G. Duncan Mitchell, 2017-07-05 Tracing the development of scientific sociology from Comte to the present *A Hundred Years of Sociology* is a concise narrative history of the major figures ideas and schools that lie behind the work of contemporary sociologists Covering both theoretical and empirical contributions the book describes the convergence of two major streams of sociological thought a speculative and philosophical tradition and a reformist fact finding tradition Throughout the volume the author is as much concerned with the content of ideas as with their labels and chronology The important developments in both American and European sociology are considered in full and special attention is given to the emergence of social anthropology and social psychology and to the profound influence of World War II on current work in the field

Building Resilience Daniel P. Aldrich, 2020-03-04 The factor that makes some communities rebound quickly from disasters while others fall apart A fascinating book on an important topic E L Hirsch in *Choice* Each year natural disasters threaten the strength and stability of communities worldwide Yet responses to the challenges of recovery vary greatly and in ways that aren't explained by the magnitude of the catastrophe or the amount of aid provided by national governments or the international community The difference between resilience and disrepair as Daniel P Aldrich shows lies in the depth of communities social capital *Building Resilience* highlights the critical role of social capital in the ability of a community to withstand disaster and rebuild both the infrastructure and the ties that are at the foundation of any community Aldrich examines the post disaster responses of four distinct communities Tokyo following the 1923 earthquake Kobe after the 1995 earthquake Tamil Nadu after the 2004 Indian Ocean Tsunami and New Orleans post Katrina and finds that those

with robust social networks were better able to coordinate recovery In addition to quickly disseminating information and financial and physical assistance communities with an abundance of social capital were able to minimize the migration of people and valuable resources out of the area With governments increasingly overstretched and natural disasters likely to increase in frequency and intensity a thorough understanding of what contributes to efficient reconstruction is more important than ever Building Resilience underscores a critical component of an effective response **The Bicentennial of the United States of America** American Revolution Bicentennial Administration,1977 The Patterns of Persons Robert Andrew Chodat,2003 *Social Science Abstracts* ,1929
