Socializing Metaphysics The Nature Of Social Reality:

Socializing Metaphysics Frederick F. Schmitt, 2004-09-01 Human life is conducted within a network of social relations social groups and societies Grasping the implications of that fact starts with understanding social metaphysics Social metaphysics provides a foundation for social theory as well as for social epistemology philosophy of language philosophy of mind action theory ethics and political philosophy This volume will interest anyone concerned with mind action or the foundations of social theory Socializing Metaphysics supplies diverse answers from a broad array of voices to the basic questions of social metaphysics What is it for human beings to stand in social relations or form social groups Do these relations and groups bring about something above and beyond the individuals involved Is there any sense to the notion of a human being apart from social relations How can an individual achieve autonomy within a society In what sense are human kinds like race and gender socially constructed The answers are found within **Socializing Metaphysics** Frederick F. Schmitt, 2003 Social metaphysics provides a foundation for social theory as well as for social epistemology philosophy of language philosophy of mind action theory ethics and political philosophy *The Background of Social Reality* Michael Schmitz, Beatrice Kobow, Hans Bernhard Schmid, 2013-02-12 This volume aims at giving the reader an overview over the most recent theoretical and methodological findings in a new and rapidly evolving area of current theory of society social ontology This book brings together philosophical sociological and psychological approaches and advances the theory towards a solution of contemporary problems of society such as the integration of cultures the nature of constitutive rules and the actions of institutional actors It focuses on the question of the background of action in society and illuminates one of the most controversial cross disciplinary questions of the field while providing insight into the ontological structure of groups as agents This volume offers an interesting and important contribution to the debate as it does well in bridging the gap between the analytical and the continental tradition in social philosophy In addition this volume expands the reach and depth of the philosophy of sociality by relating it to philosophical ideas from the late 19th and early 20th centuries and to key thinkers such as Husserl Heidegger and Bourdieu The contributors include internationally renowned scholars as well as a highly selected set of younger scholars whose work is at the cutting edge of their field Scholarly yet accessible this book is an essential resource for researchers across the social sciences *The Reality of the Social World* Jenny Pelletier, Christian Rode, 2023-04-03 This book offers a collection of contributions on medieval early modern and contemporary perspectives on social ontology Since the 1990s social ontology has emerged as a vibrant research area in contemporary analytical philosophy Questions concerning the nature and properties of social groups institutions facts and objects like money and marriage have been thoroughly discussed However the historical perspective has been largely neglected One of the central aims of this volume is to show that relevant views on social ontology can be found in medieval and early modern philosophy ca 1200 1700 C E when for example the ontological status of money law and the sacraments was hotly debated We see

furthermore diverging positions between Aristotelian inspired authors who resort to a more naturalistic view of the emergence of the social realm and authors like Olivi and Ockham who emphasize the role of human free will and contractualist agreements This book is the very first to address historical and contemporary social ontologies Both historians of philosophy and philosophers will benefit from this juxtaposition which fosters a better understanding of historical positions and approaches by using today's conceptual and analytical tools and allows the contemporary debate to gain new perspectives by confronting its own medieval and early modern history

Social Imaginary and the Metaphysical Discourse Christoforos Bouzanis, 2023-05-05 This book departs from approaches to truth in social science and ideas in philosophy that connect truth to the ability of language to fulfil certain real world conditions of objectivity Pointing to an extra linguistic level in our cognition at which scientific creativity occurs it highlights the manner in which epistemic communities share work on and modify not only the world imaginaries that they endorse but also those world views that they reject or which partially overlap with their own Through the concept of the social imaginary the author explores the theoretical interrelations among various metaphysical world imageries by which we organise our scientific understanding of the world and our expectations of experience thus shedding light on the manner in which social ontology can inform our practices of sharing belief A study at the intersection of metaphysics and social theory The Fundamental Predicament of Contemporary Philosophy and the Social Sciences will appeal to scholars of sociology and philosophy with interests in questions of ontology and epistemology

From Individual to Collective Intentionality Sara Rachel Chant, Frank Hindriks, Gerhard Preyer, 2014-04 Acting together requires collective intentions The contributions to this volume seek to critically assess or to enrich theories of collective intentionality by exploring topics such as collective belief mutual coordination and the explanation of group behavior

History and the Study of Religion Stanley Stowers, 2024 How does one understand religion Can one explain religion How does one understand the craft and discipline of the historian How can one best bring together the study of religion with the craft and discipline of the historian I am a historian who works in the study of religion and believe that the present intellectual moment offers enormous in some ways unprecedented opportunities both in the study of religion and historiography But at the same time difficulties and dangers loom together with the opportunities My specialty and prime set of examples lie in the study of ancient Mediterranean religion if indeed there is something that can rightly be called Mediterranean religion or even called religion Many specialists in the study of religion and also many of those who study ancient cultures doubt or even reject outright religion as a cross historical category on the one hand and on the other anything common about religion across the ancient Mediterranean And some cognitive scientists who against religion specialists have argued for the centrality of gods to religion then agree with the skeptics that religion is not a coherent social object a social kind I will argue that long discredited forms of anti realism and untenable anthropocentrism haunt both groups Among other areas I work in Christianity and Judaism Do they belong to

Mediterranean religion One can easily see how coming to an understanding of what religion is and what Mediterranean religion is form key questions I will argue that religion is a robust realistic entity a social kind and that ancient Mediterranean religion even with all of its great diversity operated with some key common principles It is no secret that Christianity and Judaism have presented themselves as unique and essentially untouched by an inferior and degenerate religiosity that characterized everyone else in the Mediterranean History looks different when one dispenses with such normatively heavy freight and situates the two within rather than outside of Mediterranean religion *The Triadic Structure of the Mind* Francesco Belfiore,2014-05-23 In *The Triadic Structure of the Mind* Francesco Belfiore begins from the basic ontological conception of the structure and functioning of the mind or spirit as an evolving conscious triad composed of intellect sensitiveness and power each exerting a selfish or moral activity Based on this concept Belfiore has developed a coherent philosophical system through which he offers fresh solutions in the fields of ontology knowledge language aesthetic ethics politics and law The second edition of the book includes a more extensive treatment of the topics addressed in the first edition the introduction of new concepts and the inclusion of additional thinkers whose views have been discussed and reinterpreted **Proceedings of Eurocogsci 03** Franz Schmalhofer,Richard M. Young,Graham Katz,Katz Graham,2019-05-20 The aim of the European Cognitive Science Conference is the presentation of empirical theoretical and analytic work from all areas of interest in cognitive science such as artificial intelligence education linguistics neuroscience philosophy psychology and anthropology The focus is on interdisciplinary work that is either of interest for more than one of the research areas mentioned or integrates research methods from different fields With contributions by cognitive scientists from 20 different countries the papers in this volume reflect the origins of this conference as well as its international scope *The Formation of Reason* David Bakhurst,2011-03-21 In *The Formation of Reason* philosophy professor David Bakhurst utilizes ideas from philosopher John McDowell to develop and defend a socio historical account of the human mind Provides the first detailed examination of the relevance of John McDowell s work to the Philosophy of Education Draws on a wide range of philosophical sources including the work of analytic philosophers Donald Davidson Ian Hacking Peter Strawson David Wiggins and Ludwig Wittgenstein Considers non traditional ideas from Russian philosophy and psychology represented by Ilyenkov and Vygotsky Discusses foundational philosophical ideas in a way that reveals their relevance to educational theory and practice *The Routledge Handbook of Essence in Philosophy* Kathrin Koslicki,Michael J. Raven,2024-05-15 Essences have been assigned important but controversial explanatory roles in philosophical scientific and social theorizing Is it possible for the same organism to be first a caterpillar and then a butterfly Is it impossible for a human being to transform into an insect like Gregor Samsa does in Kafka s *The Metamorphosis* Is it impossible for Lot s wife to survive being turned into a pillar of salt Traditionally essences or natures have been thought to help answer such central questions about existence identity persistence and modality These questions are not only of great philosophical interest they also are of great

interest to society at large This Handbook surveys the state of the art on essence Core issues about essence are discussed in 33 chapters all of them written exclusively for this volume by leading experts They are organized into the following four major parts each with its own introduction that provides a summary and comparison of the part s chapters History Essence and Essentialisms Themes and Variations Applications Anti Essentialist Challenges The volume is accessible enough for students while also providing enough details to make it a valuable reference for researchers While the notion of essence has been targeted for sustained criticisms since antiquity recent work has renewed interest in the topic This Handbook explains and synthesizes much of this current interest placing essence within its historical context and drawing connections to many contemporary areas of philosophy as well as to scholarly work in other disciplines With cross references in each chapter and a comprehensive index The Routledge Handbook of Essence in Philosophy is a useful resource and essential reading for anyone whether in or out of academic philosophy seeking clarification on one of philosophy s most distinctive and notorious notions

The Routledge Handbook of Collective Intentionality Marija Jankovic, Kirk Ludwig, 2017-11-02 The Routledge Handbook of Collective Intentionality provides a wide ranging survey of topics in a rapidly expanding area of interdisciplinary research It consists of 36 chapters written exclusively for this volume by an international team of experts What is distinctive about the study of collective intentionality within the broader study of social interactions and structures is its focus on the conceptual and psychological features of joint or shared actions and attitudes and their implications for the nature of social groups and their functioning This Handbook fully captures this distinctive nature of the field and how it subsumes the study of collective action responsibility reasoning thought intention emotion phenomenology decision making knowledge trust rationality cooperation competition and related issues as well as how these underpin social practices organizations conventions institutions and social ontology Like the field the Handbook is interdisciplinary drawing on research in philosophy cognitive science linguistics legal theory anthropology sociology computer science psychology economics and political science Finally the Handbook promotes several specific goals 1 it provides an important resource for students and researchers interested in collective intentionality 2 it integrates work across disciplines and areas of research as it helps to define the shape and scope of an emerging area of research 3 it advances the study of collective intentionality

Engaging with the World Margaret S

Archer, Andrea Maccarini, 2013-04-02 This title reflects the general theme of the 2010 IACR annual conference that was held in Padova Italy the aim of which was to provide a fresh view on some cultural and structural changes involving Western societies after the world economic crisis of 2008 from the point of view of Critical Realism Global society is often regarded as disrupting identities and blurring boundaries one which entails giving up ideas of structure and fixity Globalization supposedly introduces a liquid era of fluidity where everything is possible and anything goes Nevertheless its current dynamics are developing into a harder reality wars economic crisis the haunting risk of pandemics the ever worsening food supply crisis and the environmental challenge These social facts call for a dramatic shift in the optimistic cosmopolitan mood and the thought that we can build and rebuild ourselves and our world as we please at least for the most developed countries The challenges we face produce new forms of social life and individual experience They also require us to develop new frameworks to analyze emergent contexts institutional complexes and morphogenetic fields and new ways to understand human agency and the meaning of emancipation The book broadly falls into three parts The first Social Ontology and a New Historical Formation deals with mainly social ontological issues insofar as they are connected to social scientific and public issues in the emerging society of the XXI century The second Being human and the adventure of agency is concerned with the way human beings adapt to the new world of our times and comes up with innovative models of agency and socialization The third The constitutionalization of the new world explores critical realist perspectives as compared to system theoretical ones on the issue of global order and justice In all of this the challenge is to engage with this new world in a meaningful way a task for which a realist mind set is badly needed Critical realism provides a strong theoretical framework that can meet the challenge and the book explores its contribution to making sense of and coming to terms with this historical formation

Philosophy of Emerging Media Juliet Floyd, James Everett Katz, 2016 The term emerging media responds to the big data now available as a result of the larger role digital media play in everyday life as well as the notion of emergence that has grown across the architecture of science and technology over the last two decades with increasing imbrication The permeation of everyday life by emerging media is evident ubiquitous and destined to accelerate No longer are images institutions social networks thoughts acts of communication emotions and speech the media by means of which we express ourselves in daily life linked to clearly demarcated stable entities and contexts Instead the loci of meaning within which these occur shift and evolve quickly emerging in far reaching ways we are only beginning to learn and bring about This volume's purpose is to develop broaden and spark future philosophical discussion of emerging media and their ways of shaping and reshaping the habitus within which everyday lives are to be understood Drawing from the history of philosophy ideas of influential thinkers in the past intellectual path makers on the contemporary scene offer new philosophical perspectives laying the groundwork for future work in philosophy and in media studies On diverse topics such as identity agency reality mentality time aesthetics representation consciousness materiality emergence and human nature the questions addressed

here consider the extent to which philosophy should or should not take us to be facing a fundamental transformation

Hegel and the Metaphysical Frontiers of Political Theory Eric Goodfield, 2014-06-27 For over one hundred and fifty years G W F Hegel's ghost has haunted theoretical understanding and practice His opponents first and later his defenders have equally defined their programs against and with his In this way Hegel's political thought has both situated and displaced modern political theorizing This book takes the reception of Hegel's political thought as a lens through which contemporary methodological and ideological prerogatives are exposed It traces the nineteenth century origins of the positivist revolt against Hegel's legacy forward to political science's turn away from philosophical tradition in the twentieth century The book critically reviews the subsequent revisionist trend that has eliminated his metaphysics from contemporary considerations of his political thought It then moves to re-evaluate their relation and defend their inseparability in his major work on politics the Philosophy of Right Against this background the book concludes with an argument for the inherent metaphysical dimension of political theorizing itself Goodfield takes Hegel's reception representation as well as rejection in Anglo American scholarship as a mirror in which its metaphysical presuppositions of the political are exceptionally well reflected It is through such reflection he argues that we may begin to come to terms with them This book will be of great interest to students scholars and readers of political theory and philosophy Hegel metaphysics and the philosophy of the social sciences

Distributed Creativity Eric F. Clarke, Mark Doffman, 2017-11-15 Creative practice in music particularly in traditional concert culture is commonly understood in terms of a rather stark division of labour between composer and performer But this overlooks the distributed and interactive nature of the creative processes on which so much contemporary music depends The incorporation of two features improvisation and collaboration into much contemporary music suggests that the received view of the relationship between composition and performance requires reassessment Improvisation and collaborative working practices blur the composition performance divide and in doing so provide important new perspectives on the forms of distributed creativity that play a central part in much contemporary music **Distributed Creativity** Collaboration and Improvisation in Contemporary Music explores the different ways in which collaboration and improvisation enable and constrain creative processes Thirteen chapters and twelve shorter Interventions offer a range of perspectives on distributed creativity in music on composer performer collaborations and on contemporary improvisation practices The chapters provide substantial discussions of a variety of conceptual frameworks and particular projects while the Interventions present more informal contributions from a variety of practitioners performers composers improvisers giving insights into the pleasures and perils of working creatively in collaborative and improvised ways

The Diplomatic Making of EU-China Relations Lucie Qian Xia, 2024-04-11 This book provides a novel theoretical framework to understand EU China diplomatic relations The existing scholarly literature on EU China relations is characterised by a dichotomous distinction between material and ideational factors and overemphasises the interest versus value motif undergirding EU

China relations The diplomacy and future direction of the relationship seem as opaque as their extent remains incalculably complex This book takes us beyond binary motives by introducing a novel theoretical model of diplomatic relationship building that brings to the fore the more nuanced and latent factors to make sense of EU China diplomatic relationship building the new theory captures the relational nature of diplomatic relationship building by integrating the social layer of intentions in understanding international diplomacy This study further sheds light on the opportunities and challenges in enhancing EU China relations through a comparative in depth investigation of the processes practices and politics of EU China climate change and agricultural trade relations over the past two decades The book draws on a rich collection of original data encompassing over 100 interviews with stakeholders of EU China relations conducted from 2015-2023 strengthened by participant observation at EU and Chinese institutional headquarters and in diplomatic fora that has taken place over the past ten years Enriching these data are newly disclosed official minutes and documentation regarding EU China negotiations and cooperation This book will be of much interest to students of diplomacy studies Chinese politics EU politics and international relations in general

Rethinking Human Evolution Jeffrey H. Schwartz, 2022-11-01 Contributors from a range of disciplines consider the disconnect between human evolutionary studies and the rest of evolutionary biology The study of human evolution often seems to rely on scenarios and received wisdom rather than theory and methodology with each new fossil or molecular analysis interpreted as supporting evidence for the presumed lineage of human ancestry We might wonder why we should pursue new inquiries if we already know the story Is paleoanthropology an evolutionary science Are analyses of human evolution biological In this volume contributors from disciplines that range from paleoanthropology to philosophy of science consider the disconnect between human evolutionary studies and the rest of evolutionary biology All of the contributors reflect on their own research and its disciplinary context considering how their fields of inquiry can move forward in new ways The goal is to encourage a more multifaceted intellectual environment for the understanding of human evolution Topics discussed include paleoanthropology's history of procedural idiosyncrasies the role of mind and society in our evolutionary past humans as large mammals rather than a special case genomic analyses computational approaches to phylogenetic reconstruction descriptive morphology versus morphometrics and integrating insights from archaeology into the interpretation of human fossils Contributors Markus Bastir Fred L Bookstein Claudine Cohen Richard G Delisle Robin Dennell Rob DeSalle John de Vos Emma M Finestone Huw S Groucutt Gabriele A Macho Fabrizio Mc Manus Apurva Narechania Michael D Petraglia Thomas W Plummer J W F Reumer Jeff Rosenfeld Jeffrey H Schwartz Dietrich Stout Ian Tattersall Alan R Templeton Michael Tessler Peter J Waddell Martine Zilversmit

Climate Justice and Collective Action Angela Kallhoff, 2021-05-20 This book develops a theory of climate cooperation designed for concerted action which emphasises the role and function of collectives in achieving shared climate goals In debates on climate change action research focuses on three major goals on mitigation on adaptation and on transformation Even though these goals are

accepted concerted action is still difficult to realize Climate Justice and Collective Action provides an analysis of why this is the case and develops a theory of climate cooperation designed to overcome the existing roadblocks Angela Kallhoff starts with a thorough analysis of failures of collective action in the context of climate change action Taking inspiration from theories of water cooperation she then establishes a theory of joint action that reframes climate goals as shared goals and highlights the importance of adhering to principles of fairness This also includes an exploration of the normative claims working in the background of climate cooperation Finally Kallhoff puts forward proposals for a fair allocation of duties to cooperate with respect to climate goals This book will be of great interest to students and scholars of climate action climate justice environmental sociology and environmental philosophy and ethics more broadly
