Society Against The State Essays In Political Anthropology:

Society Against the State Pierre Clastres, 2020-09-29 In this seminal founding work of political anthropology Pierre Clastres takes on some of the most abiding and essential questions of human civilization What is power What is society How among all the possible modes of political organization did we come to choose the monolithic State model and its accompanying regimes of coercion As Clastres shows other and different regimes do indeed exist and they existed long before ours regimes in which power though it manifests itself everywhere is nonetheless noncoercive In such societies political culture and cultural practices generally are not only not submissive to the State model but they actively avert it rendering impossible the very conditions in which coercive power and the State could arise How then could our own societies of the State ever have arisen from these rich and complex stateless societies and why Clastres brilliantly and imaginatively addresses these questions meditating on the peculiar shape and dynamics of so called primitive societies and especially on the discourses with which civilized i e political economic literate peoples have not ceased to reduce and contain them He refutes outright the idea that the State is the ultimate and logical destiny of all societies On the contrary Clastres develops a whole alternate and always affirmative political technology based on values such as leisure prestige and generosity Through individual essays he explores and deftly situates the anarchistic political and social roles of storytelling homosexuality jokes ruinous gift giving and the torturous ritual marking of the body placing them within an economy of power and desire very different from our own one whose most fundamental goal is to celebrate life while rendering the rise of despotic power impossible Though power itself is shown to be inseparable from the richest and most complex forms of social life the State is seen as a specific but grotesque aberration peculiar only to certain societies not least of which is our own Not for sale in the U K and British Commonwealth South Africa Burma Jordan and Iraq Against History, Against State Shail Mayaram, 2003 A reassessment of conventional South Asian historiography from a subaltern perspective and a unique look at how conceptions of history and community clash This incisive study explores the Meo community through their oral literature revealing sophisticated modes of collective memory and self government while telling a story that radically diverges from most accepted Indian histories *Reproducing the State* Jacqueline Stevens, 2020-12-08 People are said to acquire their affiliations of ethnicity race and sex at birth Hence these affiliations have long been understood to be natural independent of the ability of political societies to define who we are *Reproducing the State* vigorously challenges the conventional view as well as post structuralist scholarship that minimizes state power Jacqueline Stevens examines birth based theories of membership and group affiliations in political societies ranging from the Athenian polis to tribes of Australia to the French republic to the contemporary United States The book details how political societies determine the kinship rules that are used to reproduce political societies Stevens analyzes the ways that ancestral and territorial birth rules for membership in political societies pattern other intergenerational affiliations She shows how the notion of ethnicity depends on the implicit or explicit

invocation of a past present or future political society She also shows how geography is used to represent political regions including continents as the seemingly natural underpinning for racial taxonomies perpetuated through miscegenation laws and birth certificates And Stevens argues that sex differences are also constituted through membership practices of political societies In its chronological and disciplinary range Reproducing the State will reward the interest of scholars in many fields including anthropology history political science sociology women s studies race studies and ethnic studies **Against**

State, against History Jangkhomang Guite, 2018-11-20 Life on the margins of the state is not a dark static and silent world It is in fact a radiant world involving multiple processes of reenactment of life lifeways and individual community relations This book is a radical reevaluation of the dominant civilizational narratives on the tribes that normally demonize them as a nuisance to the civilized Northeast India The book delves into the migration history and the conditions in Northeast India in which sections of the valley population escaped to the hills against the state It explores how in this physical dispersion to the highland terrain they choose an independent village polity defended by trained warriors fortified at the top of hills connected by repulsive pathways following the jhum economy and adopting pliable social cultural ethnic and gender formations This condition of the society is understood as one of statelessness or unstate the process involving disowning the state and becoming an egalitarian society where freedom of individuals is located at the core of their cultural collective

of the Modern Self from Montaigne to Suzuki Avram Alpert contends that scholars have yet to fully grasp the constitutive force of global connections in the making of modern selfhood Alpert argues that canonical moments of self making from around the world share a surprising origin in the colonial anthropology of Europeans in the Americas While most intellectual histories of modernity begin with the Cartesian inward turn Alpert shows how this turn itself was an evasion of the impact of the colonial encounter He charts a counter history of the modern self tracing lines of influence that stretch from Michel de Montaigne s encounter with the Tupi through the writings of Jean Jacques Rousseau into German Idealism American Transcendentalism postcolonial critique and modern Zen Alpert considers an unusually wide range of thinkers including Kant Hegel Fanon Emerson Du Bois Senghor and Suzuki This book not only breaks with disciplinary conventions about period and geography but also argues that these conventions obscure our ability to understand the modern condition **Constituent Power** Arvidsson Matilda Arvidsson,2020-08-18 With a strong focus on constitutional law this book examines the legal as well as the political power of the people in constitutional democracies Bringing together an international range of contributors from the USA Latin America the UK and continental Europe it explores the complex relationship between constitutional democracy and the people from the angles of constitutional law legal theory political theory and history Contributors explore this relationship through the lens of radical democracy engaging with the work of key figures such as Hannah Arendt Carl Schmitt Claude Lefort and Jacques Ranciere Automatic Society, Volume 1 Bernard Stiegler,2018-03-15 In July 2014 the Belgian newspaper Le Soir claimed that France Belgium the United Kingdom Italy Poland and the United States may lose between 43 and 50 per cent of their jobs within ten to fifteen years Across the world integrated automation one key result of the so called data economy is leading to a drastic reduction in employment in all areas from the legal profession to truck driving from medicine to stevedoring In this first volume of a new series the leading cultural theorist Bernard Stiegler advocates a radical solution to the crisis posed by automation and consumer capitalism more generally He calls for a decoupling of the concept of labour meaningful intellectual participation from employment dehumanizing banal work with the ultimate aim of eradicating employment altogether By doing so new and alternative economic models will arise where individuals are no longer simply mined for labour but also actively produce what they consume Building substantially on his existing theories and engaging with a wide range of figures from Deleuze and Foucault to Bill Gates and Alan Greenspan Automatic Society will appeal to students and scholars across the social sciences and humanities as well as anyone concerned with the central question of the future of work *Violent Becomings* Bjørn Enge Bertelsen,2016-08 Violent Becomings sheds light on violence in the periods of colonial and postcolonial state formation by conceptualizing the state not as the bureaucratically ordered polity of the nation state but as a continuously evolving and violently challenged mode of social ordering *Inventing Western Civilization* Thomas C. Patterson,1997 In this wonderful book Thomas Patterson effectively dethrones the concept of civilization as an abstract good transcending human society

Martin Bernal Drawing on his extensive knowledge of early societies Thomas C Patterson shows how class sexism and racism have been integral to the appearance of civilized societies in Western Europe He lays out clearly and simply how civilization with its designs of civilizing and being civilized has been closely tied to the rise of capitalism in Western Europe and the development of social classes

Crisis of the State Bruce Kapferer, Bjørn Enge Bertelsen, 2009-04-01 Analyzing both historical contexts and geographical locations this volume explores the continuous reformation of state power and its potential in situations of violent conflict The state otherwise understood as an abstract and transcendent concept in many works on globalization in political philosophy is instead located and analyzed here as an embedded part of lived reality This relationship to the state is exposed as an integral factor to the formation of the social whether in Africa the Middle East South America or the United States Through the examination of these particular empirical settings of war or war like situations the book further argues for the continued importance of the state in shifting social and political circumstances In doing so the authors provide a critical contribution to debates within a broad spectrum of fields that are concerned with the future of the state the nature of sovereignty and globalization

Anthropological Enquiries Into Policy, Debt, Business And Capitalism Donald C. Wood, 2020-06-09 This volume explores current issues in national and international policy business and capitalism and economic theory and behavior specifically pertaining to Brazil The underlying theme running through the collection is the steady encroachment of neoliberalism into economic policy and practice and the impact this has had on everyday ways of life

Anarchy and the Art of Listening James Slotta, 2023-06-15 Anarchy and the Art of Listening is an ethnography of politics as it is practiced on the other side of the spoken word in the act of listening James Slotta explores how people in the Yopno Valley of Papua New Guinea cultivate their listening to exercise power shape their futures and sustain their communities in the face of ambitious leaders and powerful outside institutions As in many parts of the global south missionaries NGO workers educators mining companies politicians development experts and others have sought to transform life in and around the Yopno Valley But as this book makes clear people there have not been a passive and pliable audience for these efforts They have brought their skills as anarchic listeners to these encounters advancing political agendas of their own To understand political life in the Yopno Valley we need to look not only at political speech but at the practices that lie on the other side of the word in the act of listening This Slotta suggests is also true well beyond the bounds of the Yopno Valley

The Slave in Legal and Political Philosophy Tom Frost, 2025-02-18 This book explores how the figure of the slave has been used to construct ideas of freedom in Western political and legal philosophy The figure of the slave has supported philosophical and legal defences of colonialism coloniality and the supremacy of the white subject Yet for Giorgio Agamben the slave stands almost counterintuitively as an exemplar of a potential form of future positive political existence Developing this line of thought the book reads key thinkers Agamben engages with in his thought and writings including Aristotle Saint Paul and G W F Hegel and draws on decolonial theory to argue that the lives of people who were

enslaved and unfree and their actions and gestures can point towards a paradigmatic form of political belonging By reading Agamben in a decolonial direction we can imagine alternative forms of agency recognition and subjectivity which can challenge the necropolitical world of racial capitalism in which we live This study will appeal to scholars researchers and graduate students with an interest in the thought of Giorgio Agamben radical politics legal and political philosophy and decolonial theory **Animism in Rainforest and Tundra** Marc Brightman, Vanessa Elisa Grotti, Olga

Ulturgasheva, 2012-08-15 Amazonia and Siberia classic regions of shamanism have long challenged western understandings of man's place in the world By exploring the social relations between humans and non human entities credited with human like personhood not only animals and plants but also things such as artifacts trade items or mineral resources from a comparative perspective this volume offers valuable insights into the constitutions of humanity and personhood characteristic of the two areas The contributors conducted their ethnographic fieldwork among peoples undergoing transformative processes of their lived environments such as the depletion of natural resources and migration to urban centers They describe here fundamental relational modes that are being tested in the face of change presenting groundbreaking research on personhood and agency in shamanic societies and contributing to our global understanding of social and cultural change and continuity

Immigration and Freedom Chandran Kukathas, 2025-07-15 Few would deny that immigration controls are restrictions on individual freedom In debates about immigration however freedom is rarely mentioned When it is raised it is usually indirectly and the contending parties typically divide into those who question the wisdom or the morality of limiting the movement of would be immigrants and others who think such restrictions warranted The language of freedom rarely makes an appearance perhaps because the liberty of foreigners or aliens does not really interest most people Advocates of immigrants express a concern for the welfare of outsiders others appeal to the welfare of natives and the integrity of the nation The point of this book is to establish freedom as the basis of the immigration question Chandran Kukathas argues that what's at stake is nothing less than the liberty of citizens and residents of the free society and therefore the free society itself To put it simply immigration controls are controls on people and it is not possible to control some people without controlling others More specifically it is not possible to control outsiders aliens foreigners would be immigrants without controlling insiders as well and to enforce immigration control is to enforce control generally The author shows why this must be so and explains why it is significant Over the course of eight chapters and an epilogue the book draws anecdotally on current and historical immigration practices in Canada the United States Australia Japan Singapore and most of the major Western European countries but the information is deployed in service of an accessible first principles argument To assess immigration he says we must think then about what we value most about our society and also come to a clearer understanding about what we mean by immigration in the first place In the conclusion he defends the need for greater freedom of movement which ultimately means a world of more open borders **Predatory Economies** Amy
