Spiritual Cybernetics:

The Cybernetic Brain Andrew Pickering, 2010-04-15 Cybernetics is often thought of as a grim military or industrial science of control But as Andrew Pickering reveals in this beguiling book a much more lively and experimental strain of cybernetics can be traced from the 1940s to the present The Cybernetic Brain explores a largely forgotten group of British thinkers including Grey Walter Ross Ashby Gregory Bateson R D Laing Stafford Beer and Gordon Pask and their singular work in a dazzling array of fields Psychiatry engineering management politics music architecture education tantric yoga the Beats and the sixties counterculture all come into play as Pickering follows the history of cybernetics impact on the world from contemporary robotics and complexity theory to the Chilean economy under Salvador Allende What underpins this fascinating history Pickering contends is a shared but unconventional vision of the world as ultimately unknowable a place where genuine novelty is always emerging And thus Pickering avers the history of cybernetics provides us with an imaginative model of open ended experimentation in stark opposition to the modern urge to achieve domination over nature and each other

Spiritual Cybernetics Julian Comber, 1993-02-01 *Neocybernetics and Narrative* Bruce Clarke, 2014-09-15 Neocybernetics and Narrative opens a new chapter in Bruce Clarke s project of rethinking narrative and media through systems theory Reconceiving interrelations among subjects media significations and the social this study demonstrates second order systems theory s potential to provide fresh insights into the familiar topics of media studies and narrative theory A pioneer of systems narratology Clarke offers readers a synthesis of the neocybernetic theories of cognition formulated by biologists Humberto Maturana and Francisco Varela incubated by cyberneticist Heinz von Foerster and cultivated in Niklas Luhmann s social systems theory From this foundation he interrogates media theory and narrative theory through a critique of information theory in favor of autopoietic conceptions of cognition Clarke s purview includes examinations of novels Mrs Dalloway and Mind of My Mind movies Avatar Memento and Eternal Sunshine of the Spotless Mind and even Aramis Bruno Latour s idiosyncratic meditation on a failed plan for an automated subway Clarke declares the era of the cyborg to have ended laid to rest as the ontology of technical objects is brought into differential coordination with operations of living psychic and social systems The second order discourse of cognition destabilizes the usual sense of cognition as conscious awareness revealing the possibility of nonconscious and nonhuman forms of sentience

image a term he popularized has complete control over an individual's ability to achieve or fail to achieve any goal. And he developed techniques for improving and managing self image visualization mental rehearsal relaxation which have informed and inspired countless motivational gurus sports psychologists and self help practitioners for more than fifty years. The teachings of Psycho Cybernetics are timeless because they are based on solid science and provide a prescription for thinking and acting that lead to quantifiable results. Before the mind can work efficiently we must develop our perception of the outcomes we expect to reach. Maxwell Maltz calls this Psycho Cybernetics when the mind has a defined target it can focus and direct and refocus and redirect until it reaches its intended goal. Handbook of Group Decision and Negotiation D. Marc Kilgour, Colin Eden, 2010-08-02 Publication of the Handbook of Group Decision and Negotiation marks a milestone in the evolution of the group decision and negotiation GDN field. On this occasion editors Colin Eden and Marc Kilgour asked me to write a brief history of the field to provide background and context for the volume. They said that I am in a good position to do so. Actively involved in creating the GDN Section and serving as its chair founding and leading the GDN journal Group Decision and Negotiation as editor in chief and the book series Advances in Group Decision and Negotiation as editor and serving as general chair of the GDN annual meetings I accepted their invitation to write a brief history. In 1989 what is now the Institute for Operations Research and the Management Sciences INFORMS established its Section on Group Decision and Negotiation. The journal Group Decision and Negotiation was founded in 1992 published by Springer in cooperation with INFORMS and the GDN Section. In 2003 as an extension of the journal the Springer book series Advances in Group Decision and Negotiation was inaugurated.

Spiritual and Religious Tourism Ruth Dowson, Jabar Yaqub, Razaq Raj, 2019-08-12 This book reviews tourist motivations for making religious or spiritual journeys and the management aspects related to them. It explores sacred journeys across both traditional religions such as Christianity and Islam and newer forms of pilgrimage faith systems and quasi religious activities such as sport music and food. Demonstrating to the reader the intrinsic elements and events that play a crucial role within the destination management process it provides a timely reassessment of the increasing interconnections between religion and spirituality as a motivation for travel. Providing researchers and students of tourism religious studies anthropology and related subjects with an important review of the topic this book aims to bridge the ever widening gap between specialists within the religious tourism management and education sectors.

Cybernetic Capitalism Jan Overwijk, 2025-01-07 This book offers a conceptual interrogation of how capital navigates its cybernetic environment. Taking an immanent perspective the book develops a unique synthesis between Niklas Luhmann's systems theory and the critical theory tradition. Overwijk shows how neoliberal capitalism's version of rationalization depends on the organization and management of society on the basis of cybernetic principles. Overwijk seeks to update earlier critiques of cybernetic capitalism that stressed the system's colonization of its environment its making the entirety of social life communicable. Under today's cybernetic rationalization

things are radically different Neoliberal political economy aims to incite the incalculability of the market platform capitalists venture to capitalize on the unpredictable efforts of their users and post Fordist management seeks to encourage the creativity of service workers As this book uniquely shows capital no longer aims at total communicability but instead seeks to provoke and exploit the incommunicability of its environment In this sense it offers an ecological theory of capitalism laying conceptual the groundwork for understanding the extractivist logic of the Anthropocene Cybernetic Capitalism shows how the cultural obsession with incommunicability that animates cybernetic rationalization has taken an irrationalist turn resurfacing in the mysticism of conspiracy theory and radical right politics The book offers a novel and compelling materialist interpretation of today s paradoxical connections between neoliberal rationalism and radical right irrationalism
