Spiritual Situation In Our Technological Society:

Human Technological Enhancement and Theological Anthropology Victoria Lorrimar, 2022-05-05 A cross disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension mind uploading mood enhancement and moral enhancement This work draws on metaphor studies cognitive sciences and literary studies to develop an account of human creativity in relation to divine creativity **Theologies of Failure** Robert Sirvent, Duncan B. Reyburn, 2020-01-01 What does failure mean for theology In the Bible we find some unsettling answers to this question We find lastness usurping firstness and foolishness undoing wisdom We discover too a weakness more potent than strength and a loss of life that is essential to finding life Jesus himself offers an array of paradoxes and puzzles through his life and teachings He even submits himself to humiliation and death to show the cosmos the true meaning of victory As David Bentley Hart observes most of us would find Christians truly cast in the New Testament mold fairly obnoxious civically reprobate ideologically unsound economically destructive politically irresponsible socially discreditable and really just a bit indecent By incorporating the work of scholars working with a range of frameworks within the Christian tradition Theologies of Failure aims to offer a unique and important contribution on understanding and embracing failure as a pivotal theological category As the various contributors highlight it is a category with a powerful capacity for illuminating our theological concerns and perspectives It is a category that frees us to see old ideas in a brand new light and helps to foster an awareness of ideas that certain modes of analysis may have obscured from our vision In short this book invites readers to consider how both theology and failure can help us ask new questions discover new possibilities and refuse the ways of the world Gilkey on Tillich Langdon Gilkey, 2000-01-13 *Religious Internationalism* Matthew Lon Weaver, 2010 Religious Internationalism assembles and assesses for the first time the ethics of war and peace in the writings of Paul Tillich It sketches the evolution of Tillich's thought from the period of his service in the German Imperial Army through the time of the Cold War The work begins by analyzing Tillich's theological roots and his World War I chaplaincy sermons as the starting point for his thoughts on power and nationalism Then Religious Internationalism looks to his postwar turn to socialist thought and his participation in religious socialism fueling his cultural analyses and culminating in his forced emigration under Hitler Next it probes the American interwar period giving special attention to Tillich's self described boundary perspective as well as the one treatise he wrote on religion and international affairs The book also examines his Voice of America speeches written and broadcast into his former homeland during World War II Weaver next considers Tillich's message to his English speaking audience of that period emphasizing social and world reconstruction The discussion continues by examining his vision of a path toward personhood in a bipolar world Finally the book constructs Tillich's ethics of war and peace as an ethic of religious internationalism suggesting adjustments intended to give it more universal significance The study concludes that Tillich's thought has provocative contributions to make to debates regarding

civilizational conflict economics and international justice trade and globalization the defense of unprotected minorities and immigration policy Book jacket Beauty in Science and Spirit Paul H. Carr, 2007-10 Theology and Technology, Volume 1 Carl Mitcham, Jim Grote, Levi Cheek, 2022-07-21 Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey's *Philosophy and Technology* the essays collected in the two volumes of *Theology and Technology* span an array of theological attitudes and perspectives providing sufficient material for careful reflection and engagement The first volume offers five general attitudes toward technology based off of H. Richard Niebuhr's five ideal types in *Christ and Culture* The second volume includes biblical historical and modern theological engagements with the place of technology in the Christian life This ecumenical collection ranges from authors who enthusiastically support technological development to those cynical of technique and engages the Christian tradition from the church fathers to recent theologians like Bernard Lonergan and Jacques Ellul Taken together these essays some reproductions of earlier work and others original for this project provide any student of theology a fitting entrance into considering the place of technology in the realm of the sacred

Animals in Tillich's Philosophical Theology Abbey-Anne Smith, 2017-10-02 This book explores how Paul Tillich's systematic theology focusing on the concepts of being and reason can benefit nonhuman animals while also analysing how taking proper account of nonhuman animals can prove immensely beneficial The author first explains the body of Tillich's system examining reason and revelation life and the spirit and history and the kingdom of God The second section undertakes a critical analysis of Tillichian concepts and their adequacy in relation to nonhuman animals addressing topics such as Tillich's concept of technical reason and the multidimensional unity of life The author concludes by discussing the positive concepts in Tillich's systematic theology with respect to nonhuman animals and creation including the concept of universal salvation and Tillich's interpretation of nonhuman animals and the Fall in Genesis

Born Into Unity P. D. Crawford, 2018-05-09 Today many of us live under the impact of cultural pressures urging us to adopt an independent me first or us first orientation towards life *Born into Unity Embracing Our Common Spirituality* urges us to do the opposite This collection of essays encourages readers to acknowledge our fundamental togetherness our interdependence and reflect on its implications for everyday life It reminds us that we are always co-creators rather than solitary makers of our experiences And because our basic personal attributes and experiences are universal it speaks about spirituality in a way that looks beyond the boundaries of specific religions In the light of our common spirituality *Born into Unity* points to the obvious but often overlooked insight that we participate most fully and creatively in the growth and development of both ourselves and our world by embracing the unity into which we have been born

Animal Theologians Andrew Linzey, Clair Linzey, 2023 Many people who have thought about God have not thought about animals or about the relationship between the two But among those who have are some of the most celebrated religious thinkers including Michel de Montaigne Thomas Tryon John Wesley John Ruskin Leo Tolstoy Mohandas K. Gandhi Albert Schweitzer and Paul Tillich This volume comprises 24 scholarly studies

that detail challenges to the dominant anthropocentrism of most religious traditions. The editors have brought together Jewish, Unitarian, Christian, transcendentalist, Muslim, Hindu, Dissenting, deist, and Quaker voices, each offering a unique theological perspective that counters the neglect of the nonhuman. *Animal Theologians* is divided into three parts, starting with the pioneers who first saw a relationship between animals and divinity, those who contributed to the expansion of social sensibility to animals, and ending with the work of contemporary theologians. The essays in this volume use contextual and historical background to describe what led animal theologians to their beliefs and then pave way for further developments in this expanding field. This volume is an act of reclaiming different religious traditions for animals by recovering lost voices.

Theology and Technology, Volume 2 Carl Mitcham, Jim Grote, Levi Checketts, 2022-07-20. Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey's *Philosophy and Technology*, the essays collected in the two volumes of *Theology and Technology* span an array of theological attitudes and perspectives, providing sufficient material for careful reflection and engagement. The first volume offers five general attitudes toward technology based off of H. Richard Niebuhr's five ideal types in *Christ and Culture*. The second volume includes biblical, historical, and modern theological engagements with the place of technology in the Christian life. This ecumenical collection ranges from authors who enthusiastically support technological development to those cynical of technique and engages the Christian tradition from the church fathers to recent theologians like Bernard Lonergan and Jacques Ellul. Taken together, these essays, some reproductions of earlier work and others original for this project, provide any student of theology a fitting entrance into considering the place of technology in the realm of the sacred.
