In pursuit of societal harmony: Reviewing the experiences and approaches in officially monolingual and officially multilingual countries Ludmilla A'Beckett, Theodorus du Plessis, 2017-12-01 In pursuit of societal harmony Reviewing the experiences and approaches in officially monolingual and officially multilingual countries contains a selection of papers on language legislation that were presented at the International Conference on Language Policy in Multicultural and Multilingual Settings Mandalay Myanmar 8-11 February 2016 The editors both members of the International Academy of Language Law Académie internationale de droit linguistique brought together presentations that deal with language legislation and practices in Europe Asia Africa and North America The contributions show that the post communist trend in language policy has been vastly represented by attempts to eliminate the language and even the cultural legacy of the formerly hegemonic nations in countries emerging after the collapse of the system In doing so officials in these countries tend to link the harmonisation of a diverse society with the idea of homogenising its population and prioritising the cultural legacy of the titular nation In contrast some post colonial countries are more tolerant of the language of their colonisers but consequently do not sufficiently promote the institutionalisation of their indigenous languages Furthermore the absence of visible efforts to follow any legal pattern in this regard often result in a communication gap between government and the various communities

Language Evolution Salikoko S. Mufwene,2008-03-31 Languages are constantly changing New words are added to the English language every year either borrowed or coined and there is often railing against the decline of the language by public figures Some languages such as French and Finnish have academies to protect them against foreign imports Yet languages are species like constructs which evolve naturally over time Migration imperialism and globalization have blurred boundaries between many of them producing new ones such as creoles and driving some to extinction This book examines the processes by which languages change from the macroecological perspective of competition and natural selection In a series of chapters Salikoko Mufwene examines such themes as natural selection in language the actuation question and the invisible hand that drives evolution multilingualism and language contact language birth and language death the emergence of Creoles and Pidgins the varying impacts of colonization and globalization on language vitality This comprehensive examination of the organic evolution of language will be essential reading for graduate and senior undergraduate students and for researchers on the social dynamics of language variation and change language vitality and death and even the origins of linguistic diversity **International Encyclopedia of Linguistics** William J.
