**Southern Railway, Lord Nelson Class 4-6-0s** Tim Hillier-Graves,2020-09-19 The Lord Nelson Class has come to be viewed as an also ran amongst express locomotives and is largely overlooked for that reason It had the misfortune to be sandwiched on Southern metals between the classic and much revered King Arthurs and Schools and by Bullied s controversial Pacifics In such company any design might suffer by comparison And yet when first appearing they attracted plaudits from railway professionals including the footplate crew and the public alike But with only 16 being built their impact was muted and any faults in their design were magnified beyond their actual impact In truth they deserved far better than this and were in fact sturdy reliable performers that served the company well on the heavy boat trains for which they were designed and across their other passenger services for 30 years and more in peace and war Much has been written about these locomotives but no story is ever complete with new information and photographs emerging to deepen our understanding of them This book provides an in depth view that re examines these impressive engines using new material eye witness accounts contemporary assessments and more than 200 photographs and drawings      **LMS/BR Class 7 4-6-0**

Champ,2018-02-28 The first thought when contemplating a new study of the Great Western Railway locomotive fleet must surely be to ask what can there be left to say But there is no single source which gives a general introduction to the Great Western locomotive fleet There are monographs on individual classes an excellent multi volume detail study from the RCTS and superb collections of photographs but nothing that brings it all together This work is intended to provide that general introduction The volume begins with a series of short essays covering general trends in design development whilst the main body of the volume covers individual classes For each class there is a small table containing some principal dimensions and paragraphs of text covering an introduction renumbering key changes in the development of the class and information on withdrawal The volume concludes with appendices covering the development and types of standard boilers the various numbering schemes used by the GWR the arcane subject of locomotive diagrams and lot numbers and a short reference on the many lines the GWR engulfed The majority of illustrations are new profile drawings to a consistent format Described as sketches they are drawn to a consistent scale but do not claim to be scale drawings Much minor equipment has been omitted and the author has certainly not dared to include rivets Although most are based around GWR weight diagrams they are not simple traces of the original drawings Detail has been added from other sources components copied from different drawings and details have been checked against historical and modern photographs One must also bear in mind that steam locomotives were not mass produced Minor fittings frequently varied in position and changes were made over the locomotives lifetimes Nevertheless this collection of drawings provides a uniquely consistent view of the GWR locomotive fleet **Classic British Steam Locos** compiled from Wikipedia entries and published byby DrGoogelberg,2012-06-11 do

preservation British Steam Locomotives Before Preservation covers the history in pictorial form of steam locomotives that are now preserved as part of the national collection Those which can be found in private collections and the ones which adorn the various heritage railways which operate throughout Britain The book looks at each subject both in its working life and during its subsequent preservation The pictorial content covers a wide swathe of Britain during the years before the heritage locomotives were earmarked for preservation Praise for British Steam Locomotives Before Preservation The book does exactly what it says on the cover and is recommended for anyone with an interest in UK standard gauge steam The photographs include not only locomotives but also trains in some very interesting settings which adds to the enjoyment of a well researched offering Recommended Next one please Ffestiniog Railway Magazine     [The Last Days of British Steam](#)

Malcolm Clegg,2020-11-06 A treasury of photos capturing the end of an era in transportation history the final decade of steam locomotives in Britain Malcolm Clegg has been taking railway pictures since the early 1960s and also enjoys access to collections taken by friends who were recording the steam railway scene during this period In this book he covers a wide variety of classes of locomotives that were withdrawn during the last decade of steam traction examples of some of which are now preserved This book is a record of his and other peoples journeys during the last decade of steam in the 1960s with photographs and informative captions looking at steam traction in a wide variety of geographical locations around the British Railways network     *Great Eastern Railway Magazine* London and North Eastern Railway,1918     *The Locomotives of Robert Riddles* Colin Boocock,2023-11-09 The Locomotives of Robert Riddles guides the reader in the quest to understand how Robert Riddles career on the LMS and in war service shaped his knowledge and character and led to him becoming the obvious choice for leading the locomotive engineering function within the newly formed Railway Executive The book outlines the substantial impact Riddles had on the design and supply of locomotives that were to support the Allied military campaigns in the second world war including useful analysis of the types of locomotives specifically designed for that work The bulk of the book outlines the decision making processes that led to the twelve designs of standard steam locomotives that were intended to be the future stop gap before electrification and the political and practical reasons for successive policy changes that led to their unexpectedly short lives Those events include the 1955 Modernization Plan with its emphasis on dieselization and the subsequent railway rationalizations that reduced the need not only for new steam locomotives but also made relatively new diesels redundant Each BR standard locomotive type is described in its own chapter The performance of each class is given its rightful emphasis The book is comprehensively illustrated with largely unpublished pictures that cover a wide range of locations and locomotive duties     *New South Wales Railway and Tramway Magazine* ,1923     **Rails South West From Birmingham in the Late 20th Century, 1972-2000** Peter J Green,2024-12-30

Towards the end of the twentieth century take a photographic journey along the railway lines to the southwest and south of Birmingham Starting at Birmingham s main stations New Street and Snow Hill in the centre of the city you can travel from

the West Midlands through the urban industrial and rural landscapes of the counties of Gloucestershire Herefordshire Warwickshire and Worcestershire visiting the branch lines and the various heritage railways and railway centres along the way As well as the diesel locomotives and railcars that are illustrated in most of the photographs various steam hauled special trains are also included While the railway has gradually improved as a means of transport for the author it has become increasingly less interesting as it has been modernised Fortunately the spectacle of Peaks Class 50s and many other locomotives going about their daily business has been well recorded and many scenes are captured in these pages Much railway infrastructure still remained at this time and many older railway stations and mechanical signal boxes with their associated semaphore signalling are also featured adding to the interest of many of the photographs

*Wartime on the Railways* David Wragg, 2012-10-01 Presenting an account of the part played by Britain's railways during the Second World War this book deals with operational matters and the impact of enemy action on railways It also looks at financial arrangements the part played by railway workshops in producing equipment for the military and the wartime experience of the railways ships

Steam in the North West Fred Kerr, 2018-04-30 When BR ran its 15 guinea Special in August 1968 many believed that steam locomotives would quickly become a thing of the past and that future workings would be restricted to the heritage lines which had begun to appear Initially that seemed to be the case with the only exception being the famed A3 Class Pacific 4 6 2 Flying Scotsman whose owner had signed a contract with BR that allowed the locomotive to operate beyond that date Change came in 1971 when BR trialled the operation of King Class 4 6 0 6000 King George V then based at Bulmers Hereford site on a tour of the UK which confirmed the value of steam operation as a valuable aspect of publicity which the railways of the day desperately needed Many locomotives operating on preserved lines had been bought with the hope of being able to operate on the main line at some future date and their owners began to use this success as a lever to further ease the restriction on steam locomotive usage on the national network Over time BR identified routes where steam traction could be operated and the centres where steam locomotives could be based as part of the new ethos It was fitting that as the last bastion of steam operation in 1968 the North West of England still retained its affection for steam locomotives with Carnforth locomotive depot still available as a maintenance centre The status of steam operation was fully realised in the 1993 Railway Bill which not only privatised the network but also enshrined the right of steam locomotives to operate on the main line subject to meeting the normal operating standards that were applied to all locomotive operations The North West of England quickly proved to be the area which offered the best of operations with the stiff gradients of Shap on the West Coast Main Line and the Long Drag of Ais Gill on the Settle and Carlisle route providing a challenge to the footplate crews an experience for the passengers and a sight to see from the lineside The lineside view has been captured by the author who lives within the area at Southport hence has been well placed to record many of these workings within the area and the wide variety of locomotive types whose owners have finally achieved the ambition of their locomotives joining the
