The Inertia Of Fear And The Scientific Worldview:

The Inertia of Fear and the Scientific Worldview Valentin F. Turchin, **The Inertia of Fear** Valentin F. Turčín, 1981-01

The Inertia of Fear and the Scientific Worldview Valentin Turchin, 1981 *The Inertia of Fear and the Scientific Worldview* Valentin Fedorovich Turchin, 1981-01-01 Criticizes the Soviet regime viewing consciousness as the determining factor in the development of society as a whole **The Private World of Soviet Scientists from Stalin to Gorbachev** Maria Rogacheva, 2017-07-10 A major new contribution to understanding the transition of Soviet society from Stalinism to a more humane model of socialism The Neo-Stalinist State Victor Zaslavsky, 1994 Underlying current controversies about environmental regulation are shared concerns divided interests and different ways of thinking about the earth and our proper relationship to it This book brings together writings on nature and environment that illuminate thought and action in this realm **The Path to Posthumanity** Ben Goertzel, Stephan Vladimir Bugaj, 2006 Describing the near future technologies and scientific changes that will affect human life in the next 25 years this book covers key topics in artificial intelligence as well as looking at computing and biotechnology *The KGB File of Andrei Sakharov* Joshua Rubenstein, Alexander Gribov, 2008-10-01 DIVAndrei Sakharov 1921 1989 a brilliant physicist and the principal designer of the Soviet hydrogen bomb later became a human rights activist and as a result a source of profound irritation to the Kremlin This book publishes for the first time ever KGB files on Sakharov that became available during Boris Yeltsin s presidency The documents reveal the untold story of KGB surveillance of Sakharov from 1968 until his death in 1989 and of the regime s efforts to intimidate and silence him The disturbing archival materials show the KGB to have had a profound lack of understanding of the spiritual and moral nature of the human rights movement and of Sakharov s role as one of its leading figures div *Evolution, Culture, and the Human Mind* Mark Schaller, Ara Norenzayan, Steven J. Heine, Toshio Yamagishi, Tatsuya Kameda, 2011-03-17 *Evolution Culture and the Human Mind* is the first scholarly book to integrate evolutionary and cultural perspectives on human psychology The contributors include world renowned evolutionary cultural social and cognitive psychologists These chapters reveal many novel insights linking human evolution to both human cognition and human culture including the evolutionary origins of cross cultural differences **Boundary Objects and Beyond** Geoffrey C. Bowker, Stefan Timmermans, Adele E. Clarke, Ellen Balka, 2016-02-26 The multifaceted work of the late Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues Susan Leigh Star 1954 2010 was one of the most influential science studies scholars of the last several decades In her work Star highlighted the messy practices of discovering science asking hard questions about the marginalizing as well as the liberating powers of science and technology In the landmark work *Sorting Things Out* Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems Star s most celebrated concept was the notion of boundary objects representational forms things or theories that can be shared between different communities with each holding its own understanding of the representation

Unfortunately Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work This volume collects articles by Star that set out some of her thinking on boundary objects marginality and infrastructure together with essays by friends and colleagues from a range of disciplines from philosophy of science to organization science that testify to the wide ranging influence of Star s work Contributors Ellen Balka Eevi E Beck Dick Boland Geoffrey C Bowker Janet Ceja Alcal Adele E Clarke Les Gasser James R Griesemer Gail Hornstein John Leslie King Cheris Kramarae Maria Puig de la Bellacasa Karen Ruhleder Kjeld Schmidt Brian Cantwell Smith Susan Leigh Star Anselm L Strauss Jane Summerton Stefan Timmermans Helen Verran Nina Wakeford Jutta Weber The Golden Thread Fuad Udemans,2013-09-23 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live social system society Profit motives and the clinical nature of science became muddled with norms rules and laws of social systems and how different people applied and responded to these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret societys rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak ones current position may be it is very possible and relatively easy to escape conditions of poverty oppression and subjugation vital issues that citizens in all countries face today **The Communist Party and Soviet Science** Stephen Fortescue,1986-06-18 From Newspeak to Cyberspeak Slava Gerovitch,2004-09-17 In this book Slava Gerovitch argues that Soviet cybernetics was not just an intellectual trend but a social movement for radical reform in science and society as a whole Followers of cybernetics viewed computer simulation as a universal method of problem solving and the language of cybernetics as a language of objectivity and truth With this new objectivity they challenged the existing order of things in economics and politics as well as in science The history of Soviet cybernetics followed a curious arc In the 1950s it was labeled a reactionary pseudoscience and a weapon of imperialist ideology With the arrival of Khrushchev s political thaw however it was seen as an innocent victim of political oppression and it evolved into a movement for radical reform of the Stalinist system of science In the early 1960s it was hailed as science in the service of communism but by the end of the decade it had turned into a shallow fashionable trend Using extensive new archival materials Gerovitch argues that these fluctuating attitudes reflected profound changes in scientific language and research methodology across disciplines in power relations within the scientific community and in the political role of scientists and engineers in Soviet society His detailed analysis of scientific discourse shows how the Newspeak of the late Stalinist period and the Cyberspeak that challenged it eventually blended into CyberNewspeak Russia and the Idea of the West Robert English,2000-10-25 An intriguing intellectual portrait of a generation of Soviet reformers this book is also a fascinating case study of how ideas can

change the course of history In most analyses of the Cold War's end the ideological aspects of Gorbachev's new thinking are treated largely as incidental to the broader considerations of power as gloss on what was essentially a retreat forced by crisis and decline Robert English makes a major contribution by demonstrating that Gorbachev's foreign policy was in fact the result of an intellectual revolution English analyzes the rise of a liberal policy academic elite and its impact on the Cold War's end English worked in the archives of the USSR Foreign Ministry and also gained access to the restricted collections of leading foreign policy institutes He also conducted nearly 400 interviews with Soviet intellectuals and policy makers from Khrushchev and Brezhnev era Politburo members to Perestroika era notables such as Eduard Shevardnadze and Gorbachev himself English traces the rise of a Westernizing worldview from the post Stalin years through a group of liberals in the late 1960s 70s to a circle of close advisers who spurred Gorbachev's most radical reforms

Religious Human Rights in Global Perspective John Witte Jr., Johan D. van der Vyver, 2023-12-11 In this Dickensian century of human rights the world has cultivated the best of religious rights protections but witnessed the worst of religious rights abuses In this volume Jimmy Carter John T Noonan Jr and a score of leading jurists assess critically and comparatively the religious rights laws and practices of the international community and of selected states in the Atlantic continents This volume and its companion Religious Human Rights in Global Perspective Religious Perspectives are products of an ongoing project on religion human rights and democracy undertaken by the Law and Religion Program at Emory University

Not a Movement of Dissidents Christie Miedema, 2019-06-03 Wie der osteuropäische Menschenrechtsaktivismus das für Amnesty International so wichtige Prinzip der Unparteilichkeit auf die Probe stellte Der Menschenrechtsaktivismus von Amnesty International entstand inmitten des Kalten Krieges mit dem ausdrücklichen Ziel den ideologischen Konflikt zu beenden Zu diesem Zweck entwickelte die Organisation das Prinzip der Unparteilichkeit Es beruhte darauf Menschenrechtsverletzungen in Ost und West in gleichem Maße zu kritisieren und eine gewisse Distanz zwischen Aktivisten und Gefangenen zu wahren Die politisierte ideologische Landschaft in der Amnesty tätig war und der Menschenrechtsaktivismus in Osteuropa stellten diese Politik insbesondere in den siebziger Jahren in Frage Osteuropäische Menschenrechtsaktivisten lieferten dringenden Informationen über eine Region die für Amnestys Politik der Balance wichtig war Aber je enger die Zusammenarbeit wurde desto mehr gerieten die Regeln von Amnesty unter Druck insbesondere das Prinzip der Distanz Als Aktivisten zunächst in der Sowjetunion und später in Polen versuchten Amnesty Gruppen und Sektionen in ihren jeweiligen Ländern zu etablieren wurde die Kluft zwischen den nominell universellen Regeln der Organisation und ihrer Praxis in Osteuropa deutlich

The Optician and Scientific Instrument Maker, 1927 **The Black Panthers and the Soviets** Meredith L. Roman, 2025-05-15 The contemporaneous movements for human rights that Soviet rights defenders and the Black Panthers waged during the 1960s are analysed in a comparative fashion here for the very first time The book also examines the extra legal measures that both the KGB and FBI employed to destroy them The Black Panthers and the Soviets innovatively compares Soviet human

rights activists exposure of the workings of the Soviet police state with the miniature city level surveillance police states that the Black Panthers exposed as operating across the United States It illuminates the legal tactics of counter surveillance that Soviet rights defenders and the Black Panthers employed as a means of restraining acts of state sanctioned violence The book also highlights how the U S production of knowledge about Soviet dissidents reified white supremacist anti communist notions of dissent human rights and state violence that facilitated the repression of the Black Panthers and the mass incarceration of African Americans as criminals Meredith L Roman disrupts the enduring Cold War binaries of authoritarianism democracy and oppression freedom that obscure our understanding of the complex overlapping histories of these two superpowers Roman convincingly argues that the Soviet rights defenders and the Black Panthers vast documentation of domestic human rights abuses and the repressive measures that they faced for mobilizing to end them serve as an important societal reminder they reaffirm that genuine democracy and the safeguarding of human rights are incompatible with authoritarian practices the conditions of racial capitalism and the ideology of national security
