Japanese Industrial Governance Yul Sohn, 2005 Japanese Industrial Governance uses a wide range of original Japanese sources to explore the evolution of Japanese developmental debates arguing that the core of the industrial governance system was in fact the result of infant industry protection and high barriers to foreign entry In response to international pressures in particular penetration by Anglo American multinational corporations the licensing system as Sohn refers to it was not purely an internal domestic decision as it is commonly regarded Using primarily the cases of prewar petroleum and automobiles industries the focus of this book lies mainly in the late nineteenth century when the Meiji leaders 1868 1912 established non tariff protective mechanisms which were strengthened by the massive entry of foreign multinationals during the 1920s Combined with other industrial policy tools such as subsidies and other financial incentives the licensing system helped to establish regulated markets

Ting, 1988-03-11 An inclusive treatment of political risk assessment aimed at a readership consisting of students of international business and executives of multinational firms concerned with this issue Ting examines the sociopolitical foundations of the issue approaches to political risk assessment found in the literature micro risk assessment associated with individual projects forms of business macro policy and exchange rates The author also considers host country investments applications of risk rating systems and integration of political risk assessment into a risk return calculus Extremely clear the book is more usable than earlier volumes Choice Ting argues that a preoccupation with catastrophic and revolutionary changes such as those that occurred in Iran and Nicaragua has skewed models of risk analysis away from the most significant and likely forms of political risk legal regulatory and technocratic changes in the host country toward the much rarer dramatic and cataclysmic event He proposes instead a model based on a micro or project specific analysis and demonstrates how to integrate this analysis and the information it generates into actual international planning and operational decisions abroad Sustainability David Mollica, 2017-03-02 Sustainability is one of the key concepts underlying

our thinking about corporate responsibilities particularly with respect to the environment and inter generational justice but also in relation to corporate governance and the long term economic viability The advantages of the discourse of Sustainability are that it brings together contemporary economic and moral imperatives in the context of scientific knowledge Its disadvantages relate to its open ended content its systematic ambiguity and the internal tensions between economic growth human survival and global justice The essays in this volume reflect these strengths and weaknesses from a variety of viewpoints economic scientific social and philosophical They illustrate and illuminate the varied and contested content and utility of this currently popular concept and point to its multiple implications for the development of corporate responsibilities *Corporate Environmental Responsibility* Neil Gunningham, 2017-03-02 Traditionally industry has been accused of sacrificing sustainable development in the pursuit of short term profit Yet today under the banner of Corporate Environmental Responsibility CER a growing number of business organizations are claiming to be part of the solution rather than part of the problem So what is this emerging phenomenon of CER and what does it aspire to achieve How pervasive is it and what are its implications for both business and the environment This collection of essential articles and papers maps the development of the CER concept traces the principal debates concerning its contribution to environmental protection assesses the evidence as to what extent corporations are seeking to do well be doing good and explains why some companies have gone down this path when others similarly situated have been unwilling to do so In essence it asks what has CER accomplished what can it accomplish and what is beyond its reach
