The International Labour Organization Daniel Maul, 2019-11-05 This book is the first comprehensive account of the International Labour Organization's 100 year history At its heart is the concept of global social policy which encompasses not only social policy in its national and international dimensions but also development policy world trade international migration and human rights The book focuses on the ILO's roles as a key player in debates on poverty social justice wealth distribution and social mobility subjects and as a global forum for addressing these issues The study puts in perspective the manifold ways in which the ILO has helped structure these debates and has made through its standard setting technical cooperation and myriad other activities practical contributions to the world of work and to global social policy

The Future of the International Labour Organization in the Global Economy Francis Maupain, 2013-10-23 The International Labour Organization was created in 1919 as part of the Treaty of Versailles that ended the First World War to reflect the belief that universal and lasting peace can be accomplished only if it is based on social justice As the oldest organisation in the UN system approaching its 100th anniversary in 2019 the ILO faces unprecedented strains and challenges Since before the financial crisis the global economy has tested the limits of a regulatory regime which was conceived in 1919 The organisation's founders only entrusted it with balancing social progress with the constraints of an interconnected open economy but gambled almost entirely on tools of persuasion to ensure that this would happen Whether that gamble is still capable of paying off is the subject of this book by a former ILO insider with an unrivalled knowledge of its work The book forms part of a broader inquiry into the relevance of founding institutional principles to today's context and strives to show that the bet made on persuasion may yet pay off In part the text argues that there may be little alternative anyway showing that the pathways to more binding solutions are fraught with difficulty It also shows the ILO's considerable future potential for promoting effective universal regulations by extending its tools of persuasion in as yet insufficiently

explored directions Starting with an examination of how the organisation s institutional context differs from 93 years ago the author goes on to evaluate the prospects of numerous proposals put forward today including the trade labour linkage but going beyond this As a case study in how strategic choices can be made under legal social and institutional constraints the book should be valuable not only to those with an interest in the ILO but to anyone who studies international organisation labour law law and society or political economy

Record of Proceedings ,1991 *Steps to Compliance with International Labour Standards* Lars Thomann,2011-09-26

For more than nine decades the International Labour Organization ILO has been responsible for setting up monitoring and implementing international labour standards in order to ensure that workers around the globe enjoy minimum social protection and workers rights Lars Thomann examines the ILO s wide ranging efforts to achieve compliance with international labour standards adopted by the organization and ratified by its member states The author draws on different compliance schools of various strands of international relations theory and discusses them against the background of the ILO s compliance efforts in general and regarding the abolition of forced labour in particular He shows that even though the ILO has experience in bringing about compliance given its seniority and is in many cases successful in doing so it is not well equipped to deal with persistent cases of non compliance The book is valuable reading for researchers and students in the field of social sciences as well as for practitioners working on international labour standards Social Reform,

Modernization and Technical Diplomacy Véronique Plata-Stenger,2020-04-20 Founded in 1919 under the Treaty of Versailles as part of the League of Nations system the ILO is still today the main organization responsible for the international organization of work and the improvement of working conditions in the world Widely recognized for its efforts in building international labour standards the ILO remains little studied by development specialists and historians This book intends to fill this gap and traces the history of international development and its early pioneers through an analysis of the activities of the International Labour Office the Secretariat of the International Labour Organization between 1930 and 1946 In this book development is used as a key to questioning the ILO s place and function in the expanding inter war world The development

practices and discourses that emerged in the 1930s were mainly intended to support the ILO's universalization strategy which was made necessary by the events that shook Europe at the time. Development discourses and practices were also part of the *esprit du temps* as they were closely linked to the affirmation of the planist and rationalist ideas of the 1930s. However, development for the ILO was not reduced to a project of economic modernization but was seen as a tool for social engineering as evidenced by the ILO's missions of technical assistance organized since 1930. The analysis of the expertise work makes it possible to highlight the logics that prevailed in technical assistance which was more in line with institutional objectives than with the dissemination of a genuine expertise. This book therefore hopes to bring new insight on the history of internationalism and international organizations during the inter war period and the Second World War as well as on the role of the ILO in the history of international development thinking and practices.

Child Labour in a Globalized World Luca Nogler, Marco Pertile, 2016-04-15 This volume examines the legal dimension of the ILO's action in the field of Child Labour. The authors investigate the implementation of the relevant legal instruments and assess the effectiveness of the ILO supervisory system. All relevant instruments are considered while particular attention is given to Convention 182 on the elimination of the worst forms of child labour. *Child Labour in a Globalized World* describes the ILO's activities concerning the eradication of child labour whilst assessing and evaluating the effectiveness of the relevant legal framework and functioning of the supervisory system. This book contextualizes the issue of the eradication of the worst forms of child labour in the recent doctrinal debate on the nature of labour standards and the transformation of the ILO. This important work will be a valuable resource for academics, researchers and policy makers with an interest in labour law, international law and children's rights.

International Health Organisations and Movements, 1918-1939 Paul Weindling, 1995-07-20 A series of original studies on inter war international health and welfare organisations.

[Global Values and International Trade Law](#) Csongor István Nagy, 2021-12-26 Exploring the relationship and interaction between economic interests and normative non trade values, this book argues that the emergence and development of non trade values is based on a complex dialectic interaction between selfish economic interests and normative values and examines how their structural interdependence has given rise to a remarkable evolution in

international trade Conceiving this relationship as an intricate dialectic one that is neither purely value driven nor purely economic interest driven it addresses the emergence function and role of non trade values in international trade with a synthetizing approach and explores the results of their interaction in international economic intercourse Approaching the non trade issues of trade in a holistic manner the book demonstrates that trade can operate smoothly only if it is framed by an architecture of normative value standards and international trade liberalization has reached the level where further development calls for cooperation also in fields that at first glance may appear to be non trade in nature **Labour welfare and industrial hygiene ,**
