The Architecture of Sunderland Graham Potts, Michael Johnson, 2013-09-02 Sunderland is largely a product of the eighteenth and nineteenth centuries when coalmining and shipbuilding fuelled rapid expansion and development Once known as the largest shipbuilding town in the world Sunderland's proud and distinctive identity is embodied in its historic buildings and in its changing urban form *The Architecture of Sunderland* 1700 1914 examines the city's architectural history during the highpoint of its growth and prosperity Exploring the cityscape from the richest to the humblest buildings it brings to life the economic social and cultural forces that have shaped the city The text is illustrated with fascinating archival images and photographs taken especially for this volume **Antebellum Architecture of Kentucky** Clay

Lancaster, 2014-07-15 During the eight decades preceding the Civil War Kentucky was the scene of tremendous building activity Located in the western section of the original English colonies midway between North and South Kentucky saw the rise of an architecture that combined the traditions of nationally known designers eager to achieve the refinements of their English mother culture alongside the innovativeness and bold originality proper to the frontier Tradition thus provided a

tangible link with world architectural development while innovation offered refreshing variations The result was a distinctive regional architecture In his newest look at Kentucky architecture Clay Lancaster broadens his scope to include analyses of significant structures from throughout the commonwealth illustrating the entire range of stylistic development Like his acclaimed earlier book *Antebellum Houses of the Bluegrass* the current volume provides historical background as well as drawings photographs and floor plans showing both general features and details Among the many Kentucky buildings discussed are examples by such well known early American architects as Benjamin Henry Latrobe Thomas Jefferson James Dakin Isaiah Rogers Alexander J Davis and Francis Costigan as well as the work of local master builders such as Matthew Kennedy Micajah Burnett Gideon Shryock Thomas Lewinski and John McMurtry Also included are Kentucky buildings designed from nationally distributed architectural books and builders guides Lancaster gives special attention to the Geometric Style which evolved further and produced more noteworthy monuments in Kentucky than anywhere else in America Such buildings in turn bestowed a simplicity and straightforwardness on structures in later styles As Lancaster shows the architecture that resulted from Kentucky's fertile eclecticism constitutes a rich and rewarding architectural heritage All lovers of fine architecture will treasure this handsome and informative book
