C S Lewis's extremely popular works of fiction have been widely discussed in terms of the ideas and religious themes they express and defend but less often in terms of their purely literary qualities Ironically Lewis himself a noted literary critic would have objected to any such one-sided analysis of his works To concentrate exclusively or even primarily on the content of a work without a consideration of its form and style was in his view a seriously unbalanced method of criticism The Longing for a Form corrects this critical imbalance by supplying a theoretical background and detailed close readings for a better understanding and appreciation of Lewis's fiction as works of art Following three general studies a section of the book is devoted to each of Lewis's major efforts in fiction the Ransom trilogy the Chronicles of Narnia and Till We Have Faces considering the distinctive literary features of each group and individual books within the group Running through the book is an emphasis on form as literary kind and as structure and a recurrent attention to three themes of particular importance in Lewis as a writer of fiction objectivism longing and the literary artist as creator Individually the essays supply fresh insights into the style and meaning of specific works by Lewis as a group they illustrate a depth technical skill and unity of thought and theme which have not previously been accorded Lewis as an artist in fiction
