The Inner Sea The Mediterranean Its People:

The Inner Sea Robert Fox, 1993-09-01 Known to the early cartographers as the Inner Sea the Mediterranean is emerging anew today its tastes and styles now almost universal But even as its influence in the form of everything from politics to cookery art design and organized crime continues to grow throughout the rest of the world the sea and its people are now witnessing the most dramatic changes in their history Who are the new Mediterraneans How do they see themselves and their future and how will their world change ours Robert Fox explores these questions in a journey to every country bordering the Inner Sea and the great islands scattered across its waters In the past five years he has seen the mountains of Morocco the deserts of Syria the sylvan wasteland of Albania the monasteries of Athos the slums of Naples Gaza in riot Beirut in civil war Cairo in celebration He presents each people and country from France to Libya from Greece to Malta from Italy to Israel and everyone along the way as they see themselves and he shares the lives and thoughts of poets and politicians popes and peasants bishops brigands and barons In Fox s animated and perceptive chronicles we discover a world in fermentation stirred by irresistible forces of change the growth of populations in the south owing to overwhelming waves of migration from North Africa the ever mounting pressures on a perilously fragile ecosystem the revival of ancient religions in more fanatical form Perhaps most alarming are the political changes The Mediterranean has always been a varied human mosaic in which ties of tribe and custom have been more meaningful than national boundaries But as Fox persuasively shows the new order now emerging after the end of the Cold War calls into question the very survival of the traditional nation state most notably in Yugoslavia where long suppressed ethnic rivalries have been unleashed leading to full blown war and in Italy where regional differences and the ever more powerful grip of organized crime threaten the dissolution of that nation As the promise and menace of this fascinating world increasingly capture our attention Robert Fox s lively and probing book will prove an indispensable guide

The Inner Sea Robert Fox, 1993 Recounting a five year journey that encompassed every country and island of the Inner Sea from the mountains of Morocco to the monasteries of Mt Athos the bloodstained streets of Beirut the slums of Naples and beyond Fox offers an astonishingly vivid human mosaic that answers the questions Who are the new Mediterraneans and what is the future of their world

Islamic Civilization draws upon the works of Western scholars to make the case that without the tremendous contribution of the Muslim world there would have been no Renaissance in Europe For almost a thousand years Islam was arguably one of the leading civilizations of the world spanning a geographic area greater than any other It eliminated social distinctions between classes and races made clear that people should enjoy the bounties of the earth provided they did not ignore morals and ethics and rescued knowledge that would have been lost if not forever then at least for centuries The genius of its scholars triggered the intellectual tradition of Europe and for over seven hundred years its language Arabic was the international language of science Strange then that its legacy lies largely ignored and buried in time In the words of Aldous Huxley Great is truth but still greater from a practical point of view is silence about truth By simply not mentioning certain subjects propagandists have influenced opinion much more effectively than they could have by the most eloquent denunciations Studies in Islamic Civilization is a compelling attempt to redress this wrong and restore the historical truths of a golden age that ushered in the Islamic renaissance and as a by product that of the West In doing so it gives a bird's eye view of the achievements of a culture that at its height was considered the model of human progress and development

The New Italians Charles Richards, 1995-04-27 Italy has seduced generations with its sunshine landscapes art treasures and the warmth and vitality of its people devoted to style sensuality and the pleasures of life The reality is less rosy Italy is as exasperating as it is enchanting Appalling public services a rotten political class the creeping tentacles of the Mafia the all

forgiving Mother Church and infinitely indulgent mamma have long prevented Italians facing up to their collective failings In The New Italians journalist Charles Richards paints a compelling group portrait of the country and people spanning football to Freemasonry kickbacks to kidnappings He concludes that however much things change the Italians will remain essentially the same and pull through with their customary brio

Adriatic Robert D. Kaplan, 2023-04-25 An elegantly layered exploration of Europe's past and future a multifaceted masterpiece The Wall Street Journal A lovely personal journey around the Adriatic in which Robert Kaplan revisits places and peoples he first encountered decades ago Peter Frankopan author of The Silk Roads ONE OF THE BEST BOOKS OF THE YEAR The New Yorker In this insightful travelogue Robert D Kaplan geopolitical expert and bestselling author of Balkan Ghosts and The Revenge of Geography turns his perceptive eye to a region that for centuries has been a meeting point of cultures trade and ideas He undertakes a journey around the Adriatic Sea through Italy Slovenia Croatia Montenegro Albania and Greece to reveal that far more is happening in the region than most news stories let on Often overlooked the Adriatic is in fact at the center of the most significant challenges of our time including the rise of populist politics the refugee crisis and battles over the control of energy resources And it is once again becoming a global trading hub that will determine Europe's relationship with the rest of the world as China and Russia compete for dominance in its ports Kaplan explores how the region has changed over his three decades of observing it as a journalist He finds that to understand both the historical and contemporary Adriatic is to gain a window on the future of Europe as a whole and he unearths a stark truth The era of populism is an epiphenomenon a symptom of the age of nationalism coming to an end Instead the continent is returning to alignments of the early modern era as distinctions between East and West meet and break down within the Adriatic countries and ultimately throughout Europe With a brilliant cross pollination of history literature art architecture and current events in Adriatic Kaplan demonstrates that this unique region that exists at the intersection of civilizations holds revelatory truths for the future of global affairs
