Brann, 2014-10-07 Since ancient times philosophers have written about the will But the will is more than a philosophic and scholarly topic In our everyday speech what do we mean when we speak of the will Will words turn up everywhere in the English language We make wills We exert our willpower We are willful at times but merely willing at others Above all will is there a hundred times a day when we use the auxiliary verb will to express our intentions or expectations for the future or simply to indicate the future tense Yet it takes only a moment s reflection to see that there s a tremendous range of meaning here and so something to think about Moreover all of us have wondered now and then probably both as children and as adults whether we are really free and whether being free means being able to do what we want or being free of wants and desires or something else entirely That is we ve all wrestled with the issue of free will in our informal non scholarly ways

Finally we've probably all asked ourselves whether people who talk about will and willpower are all talking about the same thing or even talking sense. These are all among the issues that Eva Brann puts at the center of *Un Willing*. She takes the whole range of questions about the will that are implicit in our everyday lives and everyday thinking, articulates them, shows us how they have been dealt with within the philosophic tradition and contemporary scientific thought, and then wrestles with them herself. Eva Brann has a true aptitude for felicitous expression, and one can feel through her prose the presence of a great and patient teacher.

Doug Lansky, 2005. This collection captures the wackiest experiences of writers whose travels took a detour, such as Dave Barry vainly trying to learn more Japanese than how to order a beer, and Mary Roach who discovers that utilizing an Antarctic outhouse at the very moment a seal chooses to use its opening as a blowhole may not be the best way to start the day. Richard M. Juang, Noelle Morrisette, 2008-03-12. This encyclopedia explores the many long-standing influences of Africa and people of African descent on the culture of the Americas while tracing the many ways in which the Americas remain closely interconnected with Africa. Ranging from the 15th century to the present, *Africa and the Americas: Culture, Politics, and History* explores the many ways Africa and African peoples have shaped the cultural life of the Americas and how, in turn, life in the Americas reverberates in Africa. This groundbreaking three-volume encyclopedia offers hundreds of alphabetically organized entries on African history, nations, and peoples, plus African-influenced aspects of life in the Americas. It also features authoritative introductory essays on history, culture, and religion; demography; international relations; economics and trade; and arts and literature. In doing so, it traces the complex and continuous movement of peoples of African descent to the West, the mechanics and lingering effects of colonialism and the slave trade, and the crucial issues of cultural retention and adaptation that are essential to our understanding of the effects of globalization.

The Secret Lives of Anthropologists Bonnie L. Hewlett, 2019-11-26. This book addresses the difficult conditions researchers may face in the field and provides lessons in how to navigate the various social, political, economic, health, and environmental challenges involved in fieldwork. It also sheds important light on aspects often considered secret or taboo. From anthropologists just starting out to those with over forty years in the field, these researchers offer the benefit of their experience conducting research in diverse cultures around the world. The contributions combine engaging personal narrative with consideration of theory and methods. The volume emphasizes how being adaptable and aware of the many risks and rewards of ethnographic research can help foster success in quantitative and qualitative data collection. This is a valuable resource for students of anthropological methods and those about to embark on fieldwork for the first time.
