Creative Demobilisation E.A. Gutkind,2013-10-08 This is Volume II in a series of eighteen on Public Policy Welfare and Social Work Originally published in 1998 part one of creative demobilisation looks at the principles of national planning The book attempts to lay down principles of planning on a national scale It is not concerned with the working out of details which belong rather to the sphere of regional and local planning Planning has become the catchword of our age not merely one suspects because it is a necessity inherent in our historical situation but also because it offers for many people a welcome escape from the ambiguities of political action Documents in International Economic Law Christian J. Tams,Christian Tietje,2012-08-30 International economic law is one of the crucial branches of international law and of major importance both practically and conceptually This document collection brings together all of the most important treaties regulations and other documents in this area It presents the key documents of contemporary international economic law in one single volume so to provide students as well as practitioners with an accessible reference guide The book will feature a brief introduction providing readers with a roadmap through what is perceived by many as the maze of international economic law The collection brings together documents relating to the three main pillars of international economic law namely world trade law international monetary law and international investment law These are preceded by texts of a more general character notably issued by the United Nations and clarifying the parameters of international economic relations This broad focus enables readers to view international economic law in its breadth and to avoid the pitfalls of a compartmentalised approach which exclusively focuses on for example WTO law or investment law without appreciating their interrelation By bringing together key texts of all three branches the book should be invaluable to students taking general courses of international economic law as well as more specialised courses such as WTO law or investment law The Price of Aid David C. Engerman,2018-02-19 This study of US and Soviet aid efforts in India during the Cold War makes a major contribution towards a necessary discussion of the politics of aid Times Higher Education Debates over foreign aid are often strangely ahistorical Economists argue about how to make aid work while critics bemoan money wasted on corruption ignoring the fundamentally political character of aid The Price of Aid turns the standard debate on its head By exposing the geopolitical calculus underpinning development assistance it also exposes its costs India stood at the center of American and Soviet aid competition throughout the Cold War as both superpowers saw developmental aid as a way of pursuing their geopolitical

goals by economic means Drawing on recently declassified files from seven countries David Engerman shows how Indian leaders used Cold War competition to win battles at home eroding the Indian state in the process As China spends freely in Africa the political stakes of foreign aid are rising once again A superb field changing book A true classic Sunil Amrith

Third-World Political Organizations Gwyneth Williams,1987-04-17 **Globalization and Common**

Responsibilities of States Koen De Feyter,2017-05-15 There is a growing awareness that international law insufficiently protects common global interests and that States and non State actors need to work together to protect global aims The focus of this book is on the different fields of international law where there is a need for global cooperation to achieve common aims for example the law of the sea protection of world cultural heritage sustainable development biological diversity and climate change human rights and international crimes The volume also identifies the legal developments which have taken place for example treaties which use the language of common heritage of mankind or common concern of humanity thereby identifying global concerns and reflecting a global set of values and interests independent of the interests of States

The World Economy through the Lens of the United Nations José Antonio Ocampo,Anis Chowdhury,Diana Alarcón,2018-03-16 This edited volume documents the intellectual influence of the United Nations Department of Economic and Social Affairs UN DESA through its flagship publication the World Economic and Social Survey WESS on its 70th Anniversary First published in 1948 as World Economic Report WESS is the oldest continuous post World War II publication recording and analysing the performance of the global economy and social development trends It offers relevant policy recommendations and highlights how well the United Nations UN annual report has tracked global economic and social conditions and how its analyses influenced and were influenced by the prevailing development discourse during the past seven decades It also critically reflects on its policy recommendations and their influence on actual policy making and the shaping of the world economy The World Economy through the Lens of the United Nations reflects on this report amongst others to provide valuable insights on global economic challenges and their differential impacts on different groups of countries requiring global policy coordination as well as context specific policy responses It demonstrates that UN reports have often been ahead of the curve and played a critical role in policy debate especially in the area of international policy coordination and coherence for balanced global development and offers rich and path breaking analyses of contemporary problems of growth development trade and stabilization

The Fair and Equitable Treatment Standard in the International Law of Foreign Investment Ioana Tudor,2008-03-13 The treatment of foreign investors and of their investments on the territory of a host State is often subject to a bilateral investment treaty BIT signed by the national State of the investors and the host State These BITs usually contain a clause in which the two States offer fair and equitable treatment FET to the foreign investors on their territory Moreover this clause has become a norm of customary law implying that investors may rely on it even outside the context of the BIT Foreign investors whose rights under this clause have not

been respected may bring the State in front of an international tribunal This book analyses not only the conventional and customary framework of the FET clause but also its scope and all its applications in the existing case law This book tackles the standard of fair and equitable treatment by applying four conceptual frames the legal basis of FET its nature as a standard its content and finally the implications of its breach The first two chapters explore the two classical sources of international law as possible sources for FET The main sources of FET lie in a rich conventional framework mainly bilateral and regional Yet the high number of BITs does not appear to offer a uniform model of FET clauses quite the opposite the book offers a classification of the FET clauses found in more than 400 BITs Having concluded that the conventional framework is essential to FET the book turns to the examination of the possible customary character of FET and argues that the view equating FET with the International Minimum Standard is erroneous and it limits the scope of FET Alternatively it suggests that the FET standard is an independent standard of customary nature Then the book looks at the nature of FET that of being a standard and retains three direct consequences for its meaning its flexibility the absence of a fixed content and its evolutionary character With these three characteristics in mind it proceeds to the third conceptual framework the content of FET Although no fixed content may be given to it it identifies and develops each one of those situations in which the FET standard has already been applied Finally the last conceptual framework aims at discussing the final act of a FET claim i e the amount of compensation awarded It argues that FET is a standard which balances the interests and behaviours of both the States and the investors at the stage of compensation

Not For Sale Anatole Anton, 2020-01-16 Not for Sale In Defense of Public Goods contains a variety of essays aimed at developing a timely philosophical defense of public goods against neo liberal criticisms The defense proceeds on both a conceptual level with essays treating such concepts as collective action collective provision common property intellectual property and a substantive The Other Canon of Economics, Volume 1 Erik Reinert, 2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies
