The Killing Table:

Crime in the United States, 2003 From Lynch Mobs to the Killing State Charles J. Ogletree, Jr., Austin

Sarat, 2006-05-01 Situates the linkage between race and the death penalty in the history of the U S Since 1976 over forty percent of prisoners executed in American jails have been African American or Hispanic This trend shows little evidence of diminishing and follows a larger pattern of the violent criminalization of African American populations that has marked the country's history of punishment In a bold attempt to tackle the looming question of how and why the connection between race and the death penalty has been so strong throughout American history Ogletree and Sarat headline an interdisciplinary cast of experts in reflecting on this disturbing issue Insightful original essays approach the topic from legal historical cultural and social science perspectives to show the ways that the death penalty is racialized the places in the death penalty process where race makes a difference and the ways that meanings of race in the United States are constructed in and through our practices of capital punishment From Lynch Mobs to the Killing State not only uncovers the ways that race influences capital punishment but also attempts to situate the linkage between race and the death penalty in the history of this country in particular the history of lynching In its probing examination of how and why the connection between race and the death penalty has been so strong throughout American history this book forces us to consider how the death penalty gives meaning to race as well as why the racialization of the death penalty is uniquely American *When Father Kills Mother* Jean

The Encyclicon - Volume 1 Thomas L. Saaty,Mujgan S. Ozdemir,2021-02-26 Volume 1 has a very comprehensive chapter that describes the Analytic Network Process and a step by step description on how to design and implement a Benefits Opportunities Costs and Risks model The Encyclicon is an advanced dictionary of structures used to represent complex decisions The first dictionary of hierarchic decision making was the Hierarchon Since hierarchies are a special case of networks the examples given here can be regarded as more general and complete representation of decision making In particular except for a group of market share examples they all involve decisions made by considering Benefits B Opportunities O Costs C and Risks R They also involve a synthesis of these BOCR merits into a single overall best outcome

for a decision This is the first volume of the series of Encyclicon books Each of the books contains different models from different years collected by a different author along with Thomas L Saaty and although all books tackle similar topics there are different models and different approaches on how to summarize and represent models for general use These books are meant as a reference guide when you try to set up ANP or AHP complex decision models The case studies in the books are linked to online reference material related to that which often include the super decision model power point presentation and the original report of the case **The National Provisioner** ,1920 Targeted Killings, Law and Counter-Terrorism Effectiveness Ophir Falk,2020-06-01 This book examines the permissibility and effectiveness of targeted killing in campaigns against terror Targeted killing has become a primary counterterrorism measure used by several countries in their confrontation with lethal threats The practice has been extensively used by the US in Afghanistan Iraq Pakistan Yemen and Somalia and by Israel in the West Bank and Gaza Several studies have already explored the difficult balance between achieving security while maintaining the liberties and rights of a country s civilians This book goes a step further by seeking to examine whether maintaining those liberties by complying with legal standards and minimizing unintended deaths can be more effective for national security Using targeted killing applied by Israel in particular as well as the United States during the first decade of the twenty first century as case studies this book explores that question and ultimately assesses whether compliance with legal standards can strengthen a state in its campaign against terrorism and thus provide stronger security The book focuses on civilian related criteria hypothesizing that minimizing civilian casualties will maximize effectiveness in an asymmetric war setting The conclusions are not limited to a specific tactic or theater and if adopted might have far reaching implications for how asymmetric warfare is strategized This book will be of much interest to students of counter terrorism law Middle Eastern studies and security studies *Ancient Supplication* Fred Naiden,2006-07-20 Ancient Supplication is the first book length treatment of a key religious practice in ancient Mediterranean civilizations Besides setting forth a typology that applies to hundreds of acts of supplication in both Greek and Latin sources this book traces the links between an originally quasi legal practice into features of Greek and Roman legal systems **Research in Retail Merchandising of Farm Products** Bennett A.
