William Herschel Discoverer of the Deep Sky Wolfgang Steinicke, 2021-11-16 The book describes the observational work of William and Caroline Herschel It focuses on deep sky objects observed 1774-1817 Most were discovered by William in the monumental sweep campaign 1783-1802 assisted by his talented sister 2500 objects were published in three catalogues The study of the sky from southern England also concerned double stars and the Solar System yielding the Uranus discovery in 1781 But William Herschel was much more than a mere observer He built large reflectors developed new methods and thought about the nature and evolution of cosmic objects and the structure of the Milky Way He was an extremely influential astronomer and had a worthy successor his son John Private Journal During the Recent Voyage of Discovery Under Captain Parry George Francis Lyon, 1824 **The Annual of Scientific Discovery, Or, Year-book of Facts in Science and Art**, 1869 **Pamphlets on Anaesthesia [and] Vulcanite: no.4. Schmadel, 2013-03-09 According to

a long standing astronomical tradition the naming of minor planets in the solar system is the privilege of the discoverers Contrary to most other kinds of celestial objects which receive complex alpha numerical designations the names of minor planets often say more about the discoverers than about the object in question There is a rich and colourful variety of ingenious names from those of heavenly goddesses in the nineteenth century to the more prosaic and sometimes very specific names of observatories towns and mountains computers and persons given by present day discoverers Commission 20 of the International Astronomical Union under whose auspices the naming of minor planets falls has long been concerned with the need to establish a complete catalogue of these names as well as of the interpretation of their meanings For this purpose a Study Group on the Origin of Minor Planet Names was set up at the time of the IAU General Assembly in Baltimore in August 1988 The Working Group immediately started to collect information about these matters from all available sources including some earlier incomplete compilations made in the U S and in Europe and also by personal interaction with living discoverers of minor planets
