White, 2011-01-26 An examination of population movements both forced and voluntary within the broader context of Europe in the aftermath of the Second World War in both Western and Eastern Europe The authors bring to life problems of war and post war chaos and assess lasting social political and demographic consequences      Sir Harold Nicolson and International Relations Derek Drinkwater, 2005-02-17 Sir Harold Nicolson 1886 1968 is well known as a diarist man of letters diplomatic historian gardener and broadcaster Nicolson's bestselling diaries and letters his many biographies including the highly acclaimed official life of King George V and his numerous essays and broadcasts have made him in the words of his friend and fellow MP Robert Bernays an international figure of the second degree Yet there was more to this urbane man than his finely observed diary stylish writing and Sissinghurst Castle Garden in Kent the joint creation of Nicolson and his wife the writer V Sackville West He also produced a rich and ambitious corpus of writing on the theory and practice of international relations Nicolson's aristocratic background and upbringing in a diplomatic household followed by an Oxford classical education and twenty years in diplomacy combined to forge his distinctive philosophy of international affairs As a young attaché in Constantinople before the Great War and in Whitehall during the conflict at the Paris Peace Conference of 1919 and en poste in Persia and Germany throughout the 1920s Nicolson was ideally placed to observe the maelstrom of international politics As an anti appeasement and wartime MP 1935 1945 he became a highly regarded authority on international relations During and after World War II he turned his mind to the issues of European integration world government and the ultimate possibility of global peace Nicolson has been the subject of two fine biographies This is the first study of his contribution to international thought He emerges from it as an important international thinker alongside theorists as diverse as E H Carr and Leonard Woolf Nicolson's international thought contains elements of realism and idealism while retaining a distinctive character and a breadth and consistency that render it unique      *Making Minorities History* Matthew Frank, 2017-03-09 *Making Minorities History* examines the various attempts made by European states over the course of the first half of the twentieth century under the umbrella of international law and in the name of international peace and reconciliation to rid the Continent of its ethnographic misfits and problem populations It is principally a study of the concept of population transfer the idea that in order to construct stable and homogeneous nation states and a peaceful international order out of them national minorities could be relocated en masse in an orderly way with minimal economic and political disruption as long as there was sufficient planning bureaucratic oversight and international support in place Tracing the rise and fall of the concept from its emergence in the late 1890s through its 1940s zenith and its geopolitical and historiographical afterlife during the Cold War

Making Minorities History explores the historical context and intellectual milieu in which population transfer developed from being initially regarded as a marginal idea propagated by a handful of political fantasists and extreme nationalists into an acceptable and a progressive instrument of state policy as amenable to bourgeois democracies and Nobel Peace Prize winners as it was to authoritarian regimes and fascist dictators In addition to examining the planning and implementation of population transfers and in particular the diplomatic negotiations surrounding them Making Minorities History looks at a selection of different proposals for the resettlement of minorities that came from individuals organizations and states during this era of population transfer

**Australia and the Birth of the International Bill of Human Rights, 1946-1966** Annemarie Devereux, 2005 Australia and the Birth of the International Bill of Human Rights provides the first in depth examination of Australia's first reactions to international human rights during the negotiations for the International Bill of Rights the Universal Declaration of Human Rights the ICCPR and ICESCR It follows Australian policy from 1946 the first year in which the United Nations began discussing a Bill of Rights until 1966 when the twin Covenants were finalized The book looks at what successive Australian Governments understood by human rights and how they responded to discussion of sensitive domestic topics such as immigration policies self determination for inhabitants of trust territories equal pay for men and women and balancing human rights and national security As well as considering Australian policies towards substantive rights the book looks at Australian policies towards international schemes for protecting rights including early proposals for an International Court of Human Rights and its later support for more modest technical expertise based assistance for States debates often taking place against the background of highly politicised issues such as the Cold War and the fight against apartheid In looking at this 20 year period the book demonstrates the way in which Australian policy changed substantially over time as between Labor and Liberal administrations between Ministers and bureaucrats and as between decision makers with markedly distinct visions of the ideal relationship between citizens and a State and the individual State and the international community In highlighting the

diversity of views about human rights this book thus challenges the notion that Australia has historically supported a universally understood set of human rights norms and underlines the number of variables which may be affecting ongoing implementation of human rights standards

**Hungary's Cold War** Csaba Békés, 2022-05-03 In this magisterial and pathbreaking work Csaba Békés shares decades of his research to provide a sweeping examination of Hungary's international relations with both the Soviet Bloc and the West from the end of World War II to the dissolution of the Soviet Union in 1991 Unlike many studies of the global Cold War that focus on East West relationships often from the vantage point of the West Békés grounds his work in the East drawing on little used non English sources As such he offers a new and sweeping Cold War narrative using Hungary as a case study demonstrating that the East Central European states have played a much more important role in shaping both the Soviet bloc's overall policy and the East West relationship than previously assumed Similarly he shows how the relationship between Moscow and its allies as well as among the bloc countries was much more complex than it appeared to most observers in the East and the West alike

**The World Refugees Made** Pamela Ballinger, 2020-03-15 In *The World Refugees Made* Pamela Ballinger explores Italy's remaking in light of the loss of a wide range of territorial possessions colonies protectorates and provinces in Africa and the Balkans the repatriation of Italian nationals from those territories and the integration of these national refugees into a country devastated by war and overwhelmed by foreign displaced persons from Eastern Europe Post World War II Italy served as an important laboratory in which categories differentiating foreign refugees who had crossed national boundaries from national refugees those who presumably did not were debated refined and consolidated Such distinctions resonated far beyond that particular historical moment informing legal frameworks that remain in place today Offering an alternative genealogy of the postwar international refugee regime Ballinger focuses on the consequences of one of its key omissions the ineligibility from international refugee status of those migrants who became classified as national refugees The presence of displaced persons also posed the complex question of who belonged culturally and legally in an Italy that was territorially and politically reconfigured by decolonization The process of demarcating types of refugees thus represented a critical moment for Italy one that endorsed an ethnic conception of identity that citizenship laws made explicit Such an understanding of identity remains salient as Italians still invoke language and race as bases of belonging in the face of mass immigration and ongoing refugee emergencies Ballinger's analysis of the postwar international refugee regime and Italian decolonization illuminates the study of human rights history humanitarianism postwar reconstruction fascism and its aftermaths and modern Italian history Open Access edition funded by the National Endowment for the Humanities

**Rebirth** Cyril Black, 2018-05-04 *Rebirth A History of Europe*

Since World War II examines the transition of Europe from a period of crisis to an era of political confidence and economic strength. As the title suggests, the pervasive theme of the book is that of rebirth. The most recent decades are set in the context of modern European history as a whole. The authors trace the disillusionment and uncertainty that overcame Europe at the turn of the twentieth century and that culminated in the devastation of the Second World War. In their analysis of the political and economic causes of the renaissance that has followed the demise of the Cold War, the authors highlight the themes of national integration and economic modernization. The chapters are uniquely organized to present both international and domestic developments in Europe as coherent wholes as well as the importance of their interaction. The initial analysis of key international developments in the twentieth century helps students to understand the relationship between foreign and domestic events and provides background for the substantial discussion of the major European countries that follows in chapters devoted to each national experience. The political and economic histories of these nation states are considered in terms of their individual traditions and challenges, and the authors explore difficult issues such as the overall costs and benefits of the scientific technological revolution, the pursuit of social justice, the proper role of the state and of political parties, and contrasting national paths of economic and political development. *Rebirth* is designed as a text for use in courses on modern European history, especially twentieth century Europe, and for students of comparative politics who are seeking a substantial consideration of the historical factors of European politics. In this revised edition, the authors have updated the text with an analysis of developments since 1991 and added recent scholarship to the lists of Suggested

L. Claude.
