The Last Picture Show Artists Using Photography 1960-1982:

The Last Picture Show Douglas Fogle, 2003 Photography has become an increasingly pervasive medium of choice in contemporary art practice and is even employed at times by artists who do not necessarily consider themselves to be photographers How did this come to be The Last Picture Show will address the emergence of this phenomenon of artists using photography by tracing the development of conceptual trends in postwar photographic practice from its first glimmerings in the 60s in the work of artists such as Bernd and Hilla Becher portraiture and cultural identity the formal and social architectonics of the built environment societal and individual interventions in the landscape photography's relationship to sculpture and painting the visual mediation of meaning in popular culture and the poetic and conceptual investigation of visual non sequiturs disjunctions and humorous absurdities Bringing together a newly commissioned body of scholarship with reprints of important historical texts The Last Picture Show seeks to define the legacy that has produced a rich body of photographic practice in the art world today

African American Artists Performing for the Camera After 1970 Martyna Ewa Majewska, 2025-03-27 This study demonstrates how African American artists active since the 1970s have instrumentalized performance for the camera to intervene in existing representations of Black and Brown people in America and beyond Majewska argues that producing carefully designed photographs films and videos via performance became a key strategy for dismantling the conceptions of race and gender fixed by US popular culture jurisprudence and pseudoscience Studying the work of Adrian Piper Glenn Ligon Lyle Ashton Harris Senga Nengudi Maren Hassinger Howardena Pindell David Hammons and Pope L this book examines the ways in which these artists incorporate their bodies and personal experience into their respective performances simultaneously courting and foreclosing autobiographical readings The strategies examined here while diverse all challenge conventional interpretations of performance art especially those overdetermined by race gender and sexuality The book will be of interest to scholars working in art history performance studies photography and African American studies

Shifting Places Alexander Streitberger,2011 This book provides for the first time a profound insight into Peter Downsbrough s diverse and complex use of photography within his artistic work over the last 40 years

Aesthetics After Modernism Diarmuid Costello,2024 Aesthetics after Modernism argues for the ongoing relevance of aesthetics to art after modernism In it I show that even what are typically taken to be the hardest of hard cases engage us in recognisably aesthetic ways and as such remain amenable to aesthetic analysis Why if that is true do so many art theorists critics and sometimes even artists appear to think otherwise I trace the artworld s rejection of aesthetic theory to Clement Greenberg s success in co-opting the discourse of aesthetics notably Kant s aesthetics to underwrite his own formalism about modernist art Not only has this led to Kant being tarred with the brush of Greenbergian formalism it has also led critics and theorists of later art to miss the resources of the aesthetic tradition perhaps especially Kant for capturing what is distinctive about our cognitive relation to the kinds of art that interest them There is a tendency simply to assume that Kant s aesthetics cannot speak to the more conceptual aspects of our interactions with art I trace the legacy of Greenberg s modernism and formalism for later art criticism and theory before offering an interpretation of Kant s theory of art that seeks to show otherwise I take Conceptual Art as my test case here is a form of art that often claims to forgo sensible properties altogether But if Kant s aesthetics can accommodate to our cognitive relation to art with no sensible features relevant to its appreciation as art then it should in principle withstand the challenge of any form of art

Digital Image Systems Claus Gunti, 2020-01-07 In Digital Image Systems Claus Gunti examines the antagonizing reactions to digital technologies in photography While Thomas Ruff Andreas Gursky and J rg Sasse have gradually adopted digital imaging tools in the early 1990s other photographers from the D sseldorf School have remained faithful to film based technologies By evaluating the aesthetic and discursive preconditions of this situation and by extensively analyzing the digital work of these three photographers this book shows that the digital turn in photography was anticipated by the conceptualization of images within systems and thus offers new perspectives for understanding the digital revolution

Lacan at the Scene Henry Bond, 2012-09-21 A Lacanian approach to murder scene investigation What if Jacques Lacan the brilliant and eccentric Parisian psychoanalyst had worked as a police detective applying his theories to solve crimes This may conjure up a mental film clip starring Peter Sellers in a trench coat but in Lacan at the Scene Henry Bond makes a serious and provocative claim that apparently impenetrable events of violent death can be more effectively unraveled with Lacan s theory of psychoanalysis than with elaborate technologically advanced forensic tools Bond s exposition on murder expands and develops a resolutely i ekian approach Seeking out radical and unexpected readings Bond unpacks his material utilizing Lacan s neurosis psychosis perversion grid Bond places Lacan at the crime scene and builds his argument through a series of archival crime scene photographs from the 1950s the period when Lacan was developing his influential theories It is not the horror of the ravished and mutilated corpses that draws his attention instead he interrogates seemingly minor details from the everyday isolating and rephotographing what at first seems insignificant a single high heeled shoe on a kitchen table for example or carefully folded clothes placed over a chair From these mundane details he carefully builds a robust and comprehensive manual for Lacanian crime investigation that can stand beside the FBI s standard issue Crime Classification Manual

Geographical Aesthetics Elizabeth Straughan, 2016-03-03 Geographical Aesthetics places the terms aesthetics and geography under critical question together responding both to the increasing calls from within geography to develop a geographical aesthetics and a resurgence of interdisciplinary interest in conceptual and empirical questions around geoaesthetics environmental aesthetics as well as the spatialities of the aesthetic Despite taking up an identifiable role within

the geographical imagination and sensibilities for centuries and having what is arguably a key place in the making of the modern discipline aesthetics remains a relatively under theorized field within geography Across 15 chapters Geographical Aesthetics brings together timely commentaries by international interdisciplinary scholars to rework historical relations between geography and aesthetics and reconsider how it is we might understand aesthetics In renewing aesthetics as a site of investigation but also an analytic object through which we can think about worldly encounters Geographical Aesthetics presents a reworking of our geographical imaginary of the aesthetic **Bernd & Hilla Becher** Jeff L. advance the idea that contemporary art functions as a form of architectural history theory and analysis Over the course of fourteen essays by both emerging and established scholars this volume examines a diverse group of artists in conjunction with the vernacular canonical and fantastical structures engaged by their work I Manglano Ovalle Matthew Barney Monika Sosnowska Pipo Nguyen duy and Paul Pfeiffer are among those considered as are the compelling questions of architecture s relationship to photography the evolving legacy of Mies van der Rohe the notion of an architectural unconscious and the provocative concepts of the unbuilt and the unbuildable Through a rigorous investigation of these issues Contemporary Art About Architecture calls attention to the fact that art is now a vital form of architectural discourse Indeed this phenomenon is both pervasive and in its individual incarnations compelling a reason to think again about the entangled histories of architecture and art

What Was History Painting and What Is It Now? Mark Salber Phillips, Jordan Bear, 2019-10-10 The dominant visual language of European painting from the Renaissance to the nineteenth century history paintings were formidable in their monumental scale ambitious moral lessons and intricate narratives With the rise of modernist avant gardes the genre receded from the forefront of artistic production into the realm of nostalgia Yet history painting cast a shadow that would subtly colour even the works that sought to displace it Exploring the resilience of this distinctive mode of visual representation What Was History Painting and What Is It Now brings together an internationally distinguished group of scholars to trace the endurance adaptation and mutation of history painting These studies offer a reexamination of the fortunes of the genre from North America to Europe and Africa Organized around illuminating themes the book explores the creation of an audience attuned to the genre s didactic aims the entry of history painting into the marketplace of commercial art and attractions and the reimagination of the mode in response to the edicts of modern and contemporary art Spanning the full range and diversity of history painting this collection is a broad reconsideration of the tradition and the vibrant ways in which it resonates through the art of the present
