Bison and People on the North American Great Plains Geoff Cunfer, Bill Waiser, 2016-10-04 The near disappearance of the American bison in the nineteenth century is commonly understood to be the result of over hunting capitalist greed and all but genocidal military policy This interpretation remains seductive because of its simplicity there are villains and victims in this familiar cautionary tale of the American frontier But as this volume of groundbreaking scholarship shows the story of the bison s demise is actually quite nuanced Bison and People on the North American Great Plains brings together voices from several disciplines to offer new insights on the relationship between humans and animals that approached extinction The essays here transcend the border between the United States and Canada to provide a continental context Contributors include historians archaeologists anthropologists paleontologists and Native American perspectives This book explores the deep past and examines the latest knowledge on bison anatomy and physiology how bison responded to climate change especially drought and early bison hunters and pre contact trade It also focuses on the era of European contact in particular the arrival of the horse and some of the first known instances of over hunting By the nineteenth century bison reached a tipping point as a result of new tanning practices an early attempt at protective legislation and ventures to introducing cattle as a replacement stock The book concludes with a Lakota perspective featuring new ethnohistorical research Bison and People on the North American Great Plains is a major contribution to environmental history western history and the growing field of transnational history

The Archaeology of the North American Great Plains Douglas B. Bamforth, 2021-09-23 In this volume Douglas B Bamforth offers an archaeological overview of the Great Plains the vast open grassland bordered by forests and mountain ranges situated in the heart of North America Synthesizing a century of scholarship and new archaeological evidence he focuses on changes in resource use continental trade connections social formations and warfare over a period of 15 000 years Bamforth investigates how foragers harvested the grasslands more intensively over time ultimately turning to maize farming and examines the persistence of industrial mobile bison hunters in much of the region as farmers lived in communities ranging from hamlets to towns with thousands of occupants He also explores how social groups formed and changed migrations of peoples in and out of the Plains and the conflicts that occurred over time and space Significantly Bamforth s volume demonstrates how archaeology can be used as the basis for telling long term problem oriented human history

Reconstructing Human-Landscape Interactions Pam Dickinson, Jason Jeandron, Lucy Wilson, 2009-03-26 Reconstructing Human Landscape Interactions demonstrates the high quality of work presented at the first Developing International Geoarchaeology conference DIG 2005 held in Saint John New Brunswick Canada and exemplifies the over riding theme of this discipline People have always used the landscape in many ways as a place to live as a place to grow crops as a source of natural resources Those actions leave their traces The characteristics of the landscape constrain which activities are possible just as social and cultural habits condition people s connection with the environment Geoarchaeology is about finding the traces of these interactions and using them to reconstruct how people in the past behaved in their environmental context The material covered in the proceedings ranges from broad themes of climate change and landscape use to more specific subjects such as river avulsion and the use of tidal ponds The papers move us from the land to the coastal margin and back onto land to examine particular techniques The final paper leads us beyond archaeology and points out that geoarchaeological data must contribute to the debate about the sustainability of present day land use practices a fitting challenge to take us into the future
